14 Fun Facts About the Sun Jeannie Meekins, Our sun is an average star in our galaxy. It is a sphere of burning gas that provides light and heat. It makes our plants grow and allows them to turn carbon dioxide into breathable oxygen. If our sun were to shine a little less or a little more brightly, life as we knew it would not exist. A drop of less than 2% of the sun's energy output would turn Earth into an ice-covered planet. So how much do you know about this glowing sphere that controls our world. Can you answer these questions: What is the sun made up of? How long does it take the sun to orbit the center of our galaxy? How many layers of atmosphere does the sun have? What are solar winds and what do they do to Earth? What impact do solar flares have on Earth? Find out more about the Sun and amaze your family and friends with these fun facts. Ages 8 and up. Your Guide to the 2017 Total Solar Eclipse Michael E. Bakich, 2016-06-01 In this book Astronomy Magazine editor Michael Bakich presents all the information you'll need to be ready for the total solar eclipse that will cross the United States on August 21, 2017. In this one resource you'll find out where the eclipse will occur, how to observe it safely, what you'll experience during the eclipse, the best equipment to choose, how to photograph the event, detailed weather forecasts for locations where the Moon's shadow will fall, and much more. Written in easy-to-understand language (and with a glossary for those few terms you may not be familiar with), this is the must-have reference for this unique occurrence. It's not a stretch to say that this eclipse will prove to be the most viewed sky event in history. That's why even now, more than a year before the eclipse, astronomy clubs, government agencies, cities — even whole states — are preparing for the unprecedented onslaught of visitors whose only desire is to experience darkness at midday. Bakich informs observers what anyone will need to observe, enjoy, and understand this event.

The Sun Nick Hunter, 2014-11-01 What is the Sun like, and could we ever visit there? Taking the form of an imaginary trip, this book explores the science and history of the Sun, looking at recent studies and possibilities for the future.

Facts and Myths Facing Today's World John Durbin Husher, 2008 The author provides facts and myths concerning global warming, as well as a detailed discussion of DNA and its affects on a person's genetics. He brings forth the fantasies surrounding HIV and AIDS and frees the reader's mind from any fear concerning these afflictions. The reader is introduced to the human genome and stem cells with their promises for the near future. He details how global warming is a normal cycle that our Earth has followed and is not due to atmospheric carbon dioxide. He insists the Earth will have a cooling period near the turn of the century that will cause more concern than the warming cycle we are experiencing. Each of the subjects is presented in a novel manner that the layman will find entertaining.
