**Charles Anderson Dana, George Ripley**

The Light of the Fireflies Paul Pen, 2016 From bestselling Spanish author Paul Pen comes a haunting and hopeful tale of discovering light in even the darkest of places. For his whole life, the boy has lived underground, in a basement with his parents, grandmother, sister, and brother. Before he was born, his family was disfigured by a fire. His sister wears a white mask to cover her burns. He spends his hours with his cactus, reading his book on insects, or touching the one ray of sunlight that filters in through a crack in the ceiling. Ever since his sister had a baby, everyone's been acting very strangely. The boy begins to wonder why they never say who the father is, about what happened before his own birth, about why they're shut away. A few days ago, some fireflies arrived in the basement. His grandma said, There's no creature more amazing than one that can make its own light. That light makes the boy want to escape, to know the outside world. Problem is, all the doors are locked. And he doesn't know how to get out...

**Computational Intelligence for Water and Environmental Sciences** Omid Bozorg-Haddad, Babak Zolghadr-Asli, 2022-07-08 This book provides a comprehensive yet fresh perspective for the cutting-edge CI-oriented approaches in water resources planning and management. The book takes a deep dive into topics like meta-heuristic evolutionary optimization algorithms (e.g., GA, PSA, etc.), data mining techniques (e.g., SVM, ANN, etc.), probabilistic and Bayesian-oriented frameworks, fuzzy logic, AI, deep learning, and expert systems. These approaches provide a practical approach to understand and resolve complicated and intertwined real-world problems that often imposed serious challenges to traditional deterministic precise frameworks. The topic caters to postgraduate students and senior researchers who are interested in computational intelligence approach to issues stemming from water and environmental sciences.

*Night Science for Kids* Terry Krautwurst, 2005 Kids will want to grab a flashlight and start discovering the night world with the help of this safety-minded, abundantly illustrated and exciting combination of nature guide and fun activity book. Staying up late is just part of the fun, because children will also find the answers to many of the most intriguing questions: Why is the nighttime dark? Why does the length of the night change with the seasons? Why is darkness important to plant and animal life? Youngsters will meet fascinating nocturnal creatures, build a bat house, and begin to recognize different owl

hoots. The stars will beckon as kids learn how to read the night sky, recognize constellations, and understand how Earth fits into the big picture. And these new night explorers can construct a camouflage blind, and garden by moonlight, too. Plenty of parent-friendly safety considerations are included.
