To meet the expectations of clinical radiologists, thorough clinical expertise and familiarity with all the imaging modalities appropriate to address their clinical questions are necessary, regardless of one's favoured subspeciality. To keep the content relevant to them, we have tried to stay upgraded to their level. It will serve as a primary reference for residents and subspeciality trainees and fellows to facilitate their learning in preparation for their examination, and also the consultant radiologists in their daily clinical practice. This volume is subdivided into three sections. Section 1 covers the principles of clinical radiology and deals with basic to advanced aspects of general radiology. The physics of each imaging modality is described in detail for radiology residents. Handbook on Drowning Joost J.L.M. Bierens, 2006-02-08 by Jan-Carel van Dorp The board of Governors of the Maatschappij tot Redding van Drenkelingen is happy to introduce this congress book, the fruit of much effort in recent years of many devoted researchers in the fields of prevention, rescue and treatment of drowned people. It is a compilation of the results of their successful studies, as laid down during the World Congress on Drowning held in Amsterdam on 26-28 June 2002. Background Through the ages death by drowning, like so many other causes, was accepted as a part of life. Water brings life, water takes life; burial follows. It was not until the 17th or even as late as the 18th century that it became

apparent that people could be effectively rescued by bystanders, that many seemingly dead drowning victims only died after burial and that some of them could have been saved from this fate had they received medical attention. In Europe it was the so-called Age of Enlightenment, with changing attitudes towards fellow man and social initiatives underway, including the founding of charitable societies. At that time three noblemen in Amsterdam realised that too many victims who had fallen in the waters of Amsterdam were left to their fate and died. Hence, in 1767, they founded a society for the rescue of drowning victims, de Maatschappij tot Redding van Drenkelingen. Their initiative was widely applauded. In the years that followed other cities in Holland started their own initiatives.
