Genetics, Genomics and Breeding of Peanuts Nalini Mallikarjuna, Rajeev K. Varshney, 2014-05-15 Peanut, an amphidiploid, is an important food and oil crop and has an interesting evolutionary history. This book provides a glimpse of the advances in genetic resources and genomics research of peanut made during the last decade. It contains an overview of germplasm, advances in genetic and genomic resources, genetic and trait mapping, proteomic and transcriptomic analyses, functional and comparative genomics studies, and molecular breeding applications. This book should prove useful to students, teachers, and young researchers as a ready reference to the latest information on peanut genetics and genomics.

Quantum Dot Molecules Jiang Wu, Zhiming M. Wang, 2013-10-28 A quantum dot molecule (QDM) is composed of two or more closely spaced quantum dots or “artificial atoms.” In recent years, QDMs have received much attention as an emerging new artificial quantum system. The interesting and unique coupling and energy transfer processes between the “artificial atoms” could substantially extend the range of possible applications of quantum nanostructures. This book reviews recent advances in the exciting and rapidly growing field of QDMs via contributions from some of the most prominent researchers in this scientific community. The book explores many interesting topics such as the epitaxial growth of QDMs, spectroscopic characterization, and QDM transistors, and bridges between the fundamental physics of novel materials and device applications for future information technology. Both theoretical and experimental approaches are considered. Quantum Dot Molecules can be recommended for electrical engineering and materials science department courses on the science and design of advanced and future electronic and optoelectronic devices.

Proceedings of the 19th Latin American Conference on Learning Technologies (LACLO 2024) Alejandra Beatriz Llitas, Antonio Silva Sprock, Vanessa Agredo-Delgado, 2025-06-15 This book presents the proceedings of the XIX Latin American Conference on Learning Technologies-LACLO 2024. It showcases advances in learning science research, learning resources, and challenges and solutions in various Latin American countries, bringing together and disseminating emerging innovations and studies that are transforming the educational field in this region. This book presents case studies, comparative analyses, and methodological proposals that have proven effective in diverse educational contexts. In addition, it features detailed illustrations and tables to facilitate the understanding and application of the concepts included. Peanuts Thomas Stalker,Richard F. Wilson,2015-12-29 Peanuts: Genetics, Processing, and Utilization (Oilseed Monograph) presents innovations in crop productivity and processing technologies that help ensure global food security and high quality peanut products. The authors cover three central themes, modern breeding methods for development of agronomic varieties in the U.S., China, West Central Africa, and India, enhanced crop protection and quality through information from the peanut genome sequence, and state-of-the-art processing and manufacturing of products in market environments driven by consumer perception, legislation, and governmental policy. - Discusses modern breeding methods and genetically diverse resources for the development of agronomic varieties in the U.S., China, India, and West Central Africa - Provides enhanced crop protection and quality through the application of information and genetic tools derived from analysis of the peanut genome sequence - Includes state-of-art processing and manufacture of safe, nutritious, and flavorful food products

Constructivist learning models in training programs Noelia Olmedo Torre ,Oscar Farrerons Vidal,Anna Pujol Ferran,2021-03-08 With more than 25 years of university teaching in technical careers behind them, book's authors have been observing for a long time Constructivism. It is an essential part in training students process and how interaction between them and Instruction are decisive in learning, being equal or greater importance than the content or the way information is presented. The authors carry out their teaching activities involved with GOMS, Learning by Doing and Situated Learning models, as well as Problem Based Learning and the Case Method. All have led them to reach high levels of performance among their students. The reader can discover numerous publications made in prestigious magazines in this book. The book you are holding makes a review of the most important theories and constructivism's models, attempting to shed light on the wide range of methodological proposals. Everything to achieve and develop higher quality teaching.

Epioptics-11 Antonio Cricenti,2012 The book is aimed at assessing the capabilities of state-of-the-art optical techniques in elucidating the fundamental electronic and structural properties of semiconductor and metal surfaces, interfaces, thin layers, and layer structures, and assessing the usefulness of these techniques for optimization of high quality multilayer samples through feedback control during materials growth and processing. Particular emphasis is dedicated to the theory of nonlinear optics and to dynamical processes through the use of pumpOCoprobe techniques together with the search for new optical sources. Some new applications of Scanning Probe Microscopy to Material Science and biological samples, dried and in vivo, with the use of different laser sources are also presented. Materials of particular interest are silicon, semiconductorOCometal interfaces, semiconductor and magnetic multi-layers and III-V compound semiconductors.

Howler Monkeys Martín M. Kowalewski,Paul A. Garber,Liliana Cortés-Ortiz,Bernardo Urbani,Dionisios Youlatos,2014-12-15 Howler monkeys (genus *Alouatta*) comprise 12 species of leaf-eating New World monkeys that range from southern Mexico through northern Argentina. This genus is the most widespread of any New World primate and can be found to inhabit a range of forest types from undisturbed rainforest to severely anthropogenically-impacted forest fragments. Although there have been many studies on individual species of howler monkeys, this book is the first comprehensive volume that places information on howler behavior and biology within a theoretical framework of ecological and social adaptability. This is the first of two companion volumes devoted to the genus *Alouatta*. This volume: · Provides new and original empirical and theoretical research on howler monkeys · Presents evolutionary and adaptive explanations for the ecological success of howler monkeys · Examines howler behavior and ecology within a comparative framework These goals are achieved in a collection of chapters written by a distinguished group of scientists on the evolutionary history, paleontology, taxonomy,

genetics, morphology, physiology, and anatomy of howlers. The volume also contains chapters on howlers as vectors of infectious diseases, ethnoprimateology, and conservation.
