Théories des organisations Linda Rouleau,2011-04-22T00:00:00-04:00 Ce livre, qui regroupe des théories élaborées autant dans le monde anglophone que dans le monde francophone, s'adresse à tous ceux et celles qui s'intéressent au fonctionnement et à la transformation des organisations. En plus de présenter un tableau complet de l'évolution des diverses théories, il pose un regard averti sur les apports et les limites de chacune, et fournit un aperçu des derniers développements qui caractérisent ce champ d'études.

L'éthique dans la société de l'information Patrick J. Brunet,2001 Examine sous quel rapport nos pratiques communicationnelles individuelles, collectives et institutionnelles posent des questions éthiques en présentant une synthèse des différents enjeux éthiques soulevés par ces pratiques.

Impacts du crédit dans la promotion des PME Célestin Murengezi,2008 La présente thèse porte sur l'analyse des impacts du crédit dans le cadre d'une problématique générale de la microfinance et en particulier sur un terrain empirique de la ville de Ouagadougou, au Burkina Faso. Notre thèse démontre d'abord les

Mondialisation et stratégies d'entreprises Sophieane Tahi,Collectif,2001-11-27 Etudie la mondialisation comme développement de formes nouvelles d'approfondissement de processus anciens d'internationalisation de la production et des échanges de marchandises et de capitaux. Analyse les stratégies développées par les entreprises et les Etats pour répondre à la nouvelle donne économique et sociale mondiale.

De la firme sous-traitante de premier rang à la firme pivot Frédéric Mazaud,2007 Cette thèse analyse les transformations des relations industrielles verticales et plus particulièrement le glissement actuel de la fonction de sous-traitant de premier rang, vers une fonction de firme pivot, qui est un acteur intermédiaire entre le donneur d'ordres et les sous-traitants de second rang. L'objectif est de caractériser cette fonction d'intermédiation, en se basant sur la segmentation stratégique de la

chaîne des fournisseurs et en prenant pour exemple l'organisation industrielle d'Airbus. Deux modes de coordination arm's length et systems integration coexistent au sein d'une même architecture industrielle. Le recours à l'un ou l'autre varie en fonction de la politique d'achat et du degré stratégique des systèmes sous-traités. L'argumentation s'articule en deux parties. La première revient sur la nature des relations verticales dans le cadre de productions complexes, en mobilisant la théorie des ressources et des compétences. La seconde caractérise et définit la firme pivot et analyse les transformations du système productif Airbus, en éclairant la stratégie d'achat et l'émergence d'un mode de coordination dual des sous-traitants de premier rang. L'architecture industrielle d'Airbus s'organise autour de firmes pivots.

Contrôle de gestion et gestion des ressources humaines Emmanuel Okamba,2005

Traité de gouvernance corporative Ahmed Naciri,2006 Les crises financières de la fin du vingtième siècle - la crise asiatique et, un peu plus tard, la série noire des scandales corporatifs - nous ont confirmé que certaines organisations se sont laissées aller à la manipulation des comptes et quelquefois carrément à la fraude. Même si les économies occidentales sont très souvent l'objet de ces controverses, d'autres ne sont pas pour autant écartées du problème et encore aujourd'hui les différents intervenants font les frais de la crise de confiance qui a résulté de ces situations. Les investisseurs et les citoyens doutent de la capacité des dirigeants à garantir la disponibilité d'une information fiable et pertinente sur la santé financière des organisations. En conséquence, partout dans le monde, les législateurs en sont arrivés à la nécessité de reconsidérer certains processus de gouvernance corporative. Les auteurs de cet ouvrage nous font part des expériences de réforme d'un certain nombre de pays et décrivent ce qu'est la gouvernance corporative comme fondement des affaires. (cf. quatrième de couverture). [SDM].

Repenser la responsabilité sociale de l'entreprise Corinne Gendron,Bernard Girard,2013-05-08 Au confluent des traditions de pensée anglo-saxonne et continentale, les chercheurs de l'École de Montréal ont développé une perspective distinctive de la responsabilité sociale qui nourrit la recherche francophone tout autant qu'elle renouvelle les paradigmes anglo-saxons. Attentive aux dimensions sociologiques et institutionnelles de l'activité des entreprises, cette perspective n'en occulte pas pour autant les défis gestionnaires et opérationnels qu'induisent un contexte ou une stratégie de responsabilité sociale. Les chercheurs de l'École de Montréal ont ainsi développé une problématique originale, bien ancrée dans la réalité des entreprises, qui leur a permis d'élaborer des concepts nouveaux comme celui de Nouveau Mouvement Social Économique et de Régulation hybride ou d'approfondir des thématiques encore peu explorées telles que le rôle de l'État dans les différentes configurations de la responsabilité sociale. Ce sont les travaux de ces chercheurs et de ceux qui les ont, au fil des années, rejoints que présente ce livre au travers de quelques-uns des articles les plus importants de ce mouvement. Plusieurs de ceux-ci témoignent de l'approche critique d'auteurs qui envisagent la responsabilité sociale non seulement comme une initiative avant-gardiste d'entreprise, mais bien comme une nouvelle modalité de l'action économique.

Théorie et Pratique du Workflow Thomas Schael,1997-08-27 Les entreprises modernes doivent faire preuve de capacités d'adaptation très importantes et d'une pratique du management et de l'organisation aussi souple que durable dans le temps. Cet ouvrage présente et met en perspective un modèle d'organisation fondée sur l'adaptation aux marchés et la structuration du travail en équipes flexibles, interconnectées et motivées par la qualité du service rendu au client. Il présente et teste les concepts très prometteurs du travail coopératif par ordinateur (Computer Supported Cooperative Work ou CSCW), en particulier ceux qui sous-tendent les systèmes de workflow. La démarche méthodologique utilisée permet d'identifier les défauts actuels des systèmes commercialisés et de lever les ambiguïtés qui pèsent sur la définition même du travail coopératif.

La contractualisation dans les systèmes de santé. Pour une utilisation efficace et appropriée BOURRAUX Marie-Dominique, CHRETIEN Jean-Pierre et LECUIR Jean,2005-11-01 La démarche contractuelle est nouvelle dans les systèmes de santé, notamment dans les pays en développement. La multiplication et la diversification mais aussi la spécialisation des acteurs travaillant dans le domaine de la santé impliquent des relations entre eux qu'il faut organiser : la contractualisation le permet. Ces données montrent l'importance du champ de la contractualisation que ce livre parcourt en offrant aux lecteurs une double entrée : par la démarche et par les acteurs.

La gestion financière des PME Josée St-Pierre,1999-07-29T00:00:00-04:00 PRIX PRICEWATERHOUSE COOPERS DU LIVRE D'AFFAIRES 2000. Des réflexions critiques et éclairées sur la véritable situation des PME. L'auteure décrit, par des anecdotes et des statistiques récentes, les divers facteurs exerçant une influence significative sur le développement et la santé financière des PME: leur niveau de maturité, leur taille, leur développement technologique, la présence d'actionnaires externes, leur degré de dépendance commerciale, etc.

Auteurs et textes classiques de la théorie des organisations Laurent Bélanger,Jean Mercier,2006 La théorie des organisations, qui se développe surtout avec les débuts du XXe siècle, est une entreprise authentiquement interdisciplinaire qui fait appel à des approches qui vont de la sociologie interprétative jusqu'à la gestion et à l'organisation du travail. La grande diversité de ces approches est présentée ici en onze écoles ou perspectives qui vont des précurseurs - Max Weber, Adam Smith, Frederick W. Taylor, par exemple - jusqu'aux tendances récentes : néo-institutionnalisme, écologie des populations. Chacune de ces écoles est d'abord contextualisée puis représentée par des textes précis, venant d'auteurs dont on aura d'abord tracé les principaux éléments biographiques. Pour les étudiants et les professeurs du monde francophone, dans des domaines aussi différents que l'administration ou l'une ou l'autre des disciplines des sciences sociales, ce volume présente 36 textes classiques d'auteurs très différents. Certains de ces textes ont été écrits en français mais plusieurs ont été traduits de l'anglais, dont certains spécifiquement pour ce volume. -- [payot.ch].
