The book not only covers comprehensive introductions to the knowledge and injury theories about explosive shock waves, but also expounds the prevention and treatment of various explosion shock injuries and their complications with generalized summaries. This book not only contains a diverse range of content, but also immense practicality. Practical Military Ordnance Identification Thomas Gersbeck, 2014-03-05 The threat variables associated with military ordnance are enormous, requiring the application of a structured process to identify unknown munitions. The focus of Practical Military Ordnance Identification is the application of a practical deductive process to identify unknown ordnance items that are commonly recovered outside military control. The author supplies a seven-step procedure to identify unknown munitions by their category, group, and type. Detailed logic trees help users narrow down the possibilities in order to accurately identify ordnance. The book covers the safety precautions associated with each category and group of ordnance. It describes many ordnance construction characteristics and explains the fundamentals of military ordnance fuzing. Appendices define terms and supply abbreviations and acronyms used to describe military ordnances. For any queries please contact the author at tgersbeck@2ig-llc.com.

Arthur H. Westing Arthur H. Westing,2012-08-20 Since the 1960s the environment has become an issue of increasing

public concern in North America and elsewhere. Triggered by the Second Indochina War (Vietnam Conflict) of 1961-1975, and further encouraged by the International Conference on the Human Environment, held in Stockholm in 1972, the environmental impact of war emerged and grew as a topic of research in the natural and the social sciences. And in the late 1980s this led additionally to a focus and debate on environmental security. Arthur Westing, a forest ecologist, was a major pioneer contributing and framing both of those debates conceptually, theoretically, and empirically, starting with *Harvest of Death: Chemical Warfare in Vietnam and Cambodia* (1972) (co-authored with wildlife biologist E.W. Pfeiffer and others). As a Senior Researcher at the Stockholm and Oslo International Peace Research Institutes (SIPRI and PRIO), and as a Professor of Ecology at Windham and Hampshire Colleges, Westing authored and edited books on *Ecological Consequences of the Second Indochina War* (1976), *Weapons of Mass Destruction and the Environment* (1977), *Warfare in a Fragile World: Military Impact on the Human Environment* (1980), *Herbicides in War: the Long-term Ecological and Human Consequences* (1984), *Environmental Warfare: a Technical, Legal and Policy Appraisal* (1984), *Explosive Remnants of War: Mitigating the Environmental Effects* (1985), *Global Resources and International Conflict: Environmental Factors in Strategic Policy and Action* (1986), *Cultural Norms, War and the Environment* (1988), *Comprehensive Security for the Baltic: an Environmental Approach* (1989), and *Environmental Hazards of War: Releasing Dangerous Forces in an Industrialized World* (1990) --- as well as authoring numerous UN reports, book chapters, and journal articles. This volume combines six of his pioneering contributions on the environmental consequences of warfare in Viet Nam and in Kuwait, on the environmental impact of nuclear war, and on legal constraints and military guidelines for protecting the environment in wartime

Not Exactly the CIA Roger Phelps, 2020-10-30 This book is a vigorous effort to answer the question, How did we get here?—a question that troubles virtually every American over the age of fourteen. How did America lose power in the world? How did American democracy become undermined? The press industry, who once would have been charged with answering this question, is not—according to Phelps—currently capable of doing so. Closely read, this book allows an answer to emerge to this compelling American question.

In the Blink of an Eye Pat Milton, 1999-08-18 Like the sinking of the Titanic, the crash of TWA Flight 800 just off Long Island, New York, in the early evening of July 17, 1996, captured the world's imagination. Associated Press reporter Pat Milton has covered the story from day one and was granted unprecedented access to the FBI investigation--the largest and most complex in the agency's history. Initially suspecting that a crime had been committed, James Kallstrom, the head of the FBI's New York office, led the two-year investigation from the start. *In the Blink of an Eye* offers a rare look at the efforts of several government agencies--which often had different missions--to find the truth about the most mysterious and disturbing disaster in aviation history. Commercial jets don't just fall out of the sky. So what happened? Was TWA's Flight 800 the first plane to be downed by enemy action within the United States? On the night of the crash, President Clinton told his national

security advisors to ready a plan to retaliate if the destruction of Flight 800 proved to be a state-sponsored terrorist attack. If a bomb or missile had caused the disaster, Kallstrom was determined to find the perpetrators before they struck again. If it wasn't either of these, he was no less determined to preclude the sort of conspiracy theorizing that followed the Warren Commission report on the assassination of JFK. As Kallstrom and his agents tried to piece together the sequence of events that preceded the explosion of Flight 800's center fuel tank, the victims' families also had to come to terms with the tragedy. Their anguish was as much on Kallstrom's mind as the details of the mystery itself. In this vivid account, Pat Milton takes us inside the homes and lives of the victims' families as well as inside the investigation, and as close to the real cause of the crash as we'll ever come.

Homeland Security Jane Bullock, George Haddow, Damon P. Coppola, 2012-10-19 Homeland Security: The Essentials sets a new standard for security textbooks, concisely outlining the risks facing the US today and the structures we have put in place to deal with them. The authors expertly delineate the bedrock principles of preparing for, mitigating, managing, and recovering from emergencies and disasters. From cyber warfare to devastating tornados to car bombs, all hazards currently fall within the purview of the Department of Homeland Security. Yet the federal role must be closely aligned with the work of partners in the private sector, and the authors examine the challenges involved in these collaborative efforts. Homeland Security: The Essentials lays a solid foundation for the study of present and future threats to our communities and to national security, and challenges readers to imagine more effective ways to manage these risks. As with Bullock's other textbooks, the text contains ample full-color illustrations, but in a streamlined and affordable paperback format.

It serves as an indispensable resource for students seeking to understand the role of the United States in the world today. Addressing the U.S. conflicts in Iraq, Afghanistan, and the Global War on Terror from the year 2001 to the present, this comprehensive, three-volume encyclopedia covers the significant individuals, key events, and important places involved in these recent military events. The set's A-Z organization makes it an easy-to-use ready reference for high school and college students. Perspective essays on several controversial topics—such as the use of torture and the effects of the Patriot Act—serve to inspire readers to apply critical thinking. A detailed chronology is provided to help students place all the important events that have occurred in the Afghanistan War, Iraq War, and War on Terror. Each of the chronologically arranged primary documents is introduced with a

brief overview to provide important background information and context.
