The First History of Man John Bershof, MD, 2024-05-16 In the spirit of medieval writer Chaucer, all human activity lies within the artist's scope, the History of Man Series uses medicine as a jumping off point to explore precisely that, all history, all science, all human activity since the beginning of time. The jumping off style of writing takes the reader, the listener into worlds unknown, always returning to base, only to jump off again. History of Man are stories and tales of nearly everything. The First History of Man uses infection in general—bacteria, viruses, fungus, parasites, epidemics & pandemics, COVID-19—to lay the foundation for the next five books, narratives and stories that delve deeper into human infectious diseases. This first volume jumps off into accounts of the Big Bang Theory—the real one, but also the sitcom—the origin of the Universe, from atoms to DNA to us and how exactly it happened. In our journey we'll explore Einstein and Newton who were probably aliens (he said jokingly), the Roman Empire, British history and all those wives of King Henry VIII, the why and how of the Protestant Reformation, why Pluto lost its planet status in our solar system, what exactly is the sweet spot of a solar system, all the while digging up some archeology, and even paying a visit with Dr. Livingstone, I presume. We'll trudge from the top of Everest, the highest point on Earth, to the bottom of the Mariana Trench, the lowest point on Earth, and LUA in between, the Last Universal Ancestor that gave rise to all life on Earth.

The Romans ,

The Life and Times of Julius Caesar Jim Whiting, 2019-12-05 Julius Caesar is one of the most famous figures in ancient Rome. He was born into a turbulent era, when different factions were trying to control the government. He survived and began a steady rise in importance. He became a very successful military commander who added more than 200,000 square

miles to the territories under Rome's control. But his triumphs created powerful enemies in Rome. They wanted to strip him of his power. He defeated those enemies in a civil war that made him even more powerful. He had a famous love relationship with Cleopatra, the queen of Egypt. When it seemed that nothing could hold him back, he was assassinated in the Roman Senate. One of his most notable accomplishments still affects people today. He reformed the calendar and established the length of a year at its present 365 days, with a leap year every four years. The month of July is named after him.

Boccaccio and the Book Rhiannon Daniels, 2017-07-05 As a new digital era increasingly impacts on the 'age of print', we are ever more conscious of the way in which information is packaged and received. The influence of the material form on the reading process was no less important during the gradual shift from manuscript to early print culture. Focusing on the physical structure and presentation of manuscripts and printed books containing texts by one of the most influential authors of the medieval period, Rhiannon Daniels traces the evolving social, cultural, and economic profile of Boccaccio's readership and the scribes and printers who laboured to reproduce three of his works: the *Teseida*, *Decameron*, and *De mulieribus claris*. Rhiannon Daniels is a British Academy Postdoctoral Fellow in the Department of Italian at the University of Leeds.

Asphalt Kenneth O'Reilly, 2021-07 La Brea Tar Pits once trapped prehistoric mammals. Today that killer has a chemical cousin in the Athabasca oil sands of Alberta, Canada—immense deposits of natural asphalt destined for upgrading to synthetic crude oil. If the harvesting of this natural asphalt continues unabated, we might find ourselves stuck in a muck of a different kind. Humanity has used asphalt for thousands of years. This humble hydrocarbon may have glued the first arrowhead to the first shaft, but the changes wrought by this material are most dramatic since its emergence as pavement. Since the 1920s the automobile and blacktop have allowed unprecedented numbers of Americans to experience the beauty of their continent from the Adirondacks to the Rockies and beyond, to Big Sur and the Pacific Coast Highway. Blacktop roads, runways, and parking lots constitute the central arteries of our environment, creating a distinct “political territory” and a “political economy of velocity.” In *Asphalt: A History* Kenneth O'Reilly provides a history of this everyday substance. By tracing the history of asphalt—in both its natural and processed forms—from ancient times to the present, O'Reilly sets out to identify its importance within various contexts of human society and culture. Although O'Reilly argues that asphalt creates our environment, he believes it also eventually threatens it. Looking at its role in economics, politics, and global warming, O'Reilly explores asphalt's contribution to the history, and future, of America and the world.

His Civil War portrays two of the most colorful and powerful figures of the age-Julius Caesar and Pompey the Great, enemies in a vicious struggle for power that severed bloodlines and began the transformation of Roman civilization. We Can't Go Home Again Clarence E. Walker, 2001-06-14 Afrocentrism has been a controversial but popular movement in schools and universities across America, as well as in black communities. But in *We Can't Go Home Again*, historian Clarence E. Walker puts Afrocentrism to the acid test, in a thoughtful, passionate, and often blisteringly funny analysis that melts away the pretensions of this therapeutic mythology. As expounded by Molefi Kete Asante, Yusef Ben-Jochannan, and others, Afrocentrism encourages black Americans to discard their recent history, with its inescapable white presence, and to embrace instead an empowering vision of their African (specifically Egyptian) ancestors as the source of western civilization. Walker marshals a phalanx of serious scholarship to rout these ideas. He shows, for instance, that ancient Egyptian society was not black but a melange of ethnic groups, and questions whether, in any case, the pharaonic regime offers a model for blacks today, asking if everybody was a King, who built the pyramids? But for Walker, Afrocentrism is more than simply bad history--it substitutes a feel-good myth of the past for an attempt to grapple with the problems that still confront blacks in a

racist society. The modern American black identity is the product of centuries of real history, as Africans and their descendants created new, hybrid cultures--mixing many African ethnic influences with native and European elements. Afrocentrism replaces this complex history with a dubious claim to distant glory. Afrocentrism offers not an empowering understanding of black Americans' past, Walker concludes, but a pastiche of 'alien traditions' held together by simplistic fantasies. More to the point, this specious history denies to black Americans the dignity, and power, that springs from an honest understanding of their real history.

Dunstan, 2010-11-16 Ancient Rome masterfully synthesizes the vast period from the second millennium BCE to the sixth century CE, carrying readers through the succession of fateful steps and agonizing crises that marked Roman evolution from an early village settlement to the capital of an extraordinary realm extending from northern Britain to the deserts of Arabia. Dunstan highlights such key topics as the physical environment, women, law, the roles of slaves and freedmen, the plight of unprivileged free people, the composition and power of the ruling class, education, popular entertainment, food and clothing, marriage and divorce, sex, death and burial, finance and trade, scientific and medical achievements, religious institutions and practices, and artistic and literary masterpieces.
