Mental Health Nursing Skills Patrick Callaghan, Tommy Dickinson, Anne Felton, 2024-09-02 Mental health nurses require a diverse set of skills to aid service users and their carers on their journey to recovery. During their training, students need to acquire and demonstrate skills to show that the care they provide is evidence-based and effective. Skills as diverse as assessment, forming therapeutic interactions, caring for physical and mental health needs, as well as leadership and management, can be difficult to learn and master - until now! Mental Health Nursing Skills provides students with a highly evidence-based and practical account of the skills required for nursing practice. The original text was developed in response to the Chief Nursing Officer's review of Mental Health Nursing in England and that of the Scottish Executive. The authors have updated the content to include reference to the "Playing Our Part" Review of Mental Health Nursing and the latest NMC pre-registration standards. The authors translate theory into clearly applied skills supported by practice examples, tips from service users, and accompanying online activities. With contributions from nursing academics, researchers, practitioners, and service users, this text reflects the best of theory and practice. Clearly mapped against all the benchmarks expected by professional nursing bodies and suitable for all settings, Mental Health Nursing Skills provides a high quality and student friendly account of the skills required for successful nursing practice.

Psychiatric and Mental Health Nursing Phil Barker, 2008-12-26 Supported by relevant theory, research, policy, and philosophy, this second edition of Psychiatric and Mental Health Nursing: The craft of caring provides a comprehensive overview of the practice of psychiatric and mental health nursing. The concept of the craft of caring dictates that the basis of good nursing practice is a combination of both art and science, encouraging nurses to take a holistic approach to the practice of psychiatric and mental health nursing. Reflecting current developments in nursing practice and the understanding of mental health disorders, this edition includes twelve additional chapters, placing more emphasis on specific groups such as children and young people, women, older people, asylum seekers, and refugees. Case studies include patients with anxiety,

schizophrenia, and bipolar disorder as well as victims of sexual abuse, those with an eating disorder, homeless patients, and those with dementia and autism. The book also examines specialist services such as psychiatric liaison and spiritual care and includes discussion on psychiatric diagnosis and mental health legislation in relation to human rights. This is an essential text for all psychiatric and mental health nurses at the diploma and degree level, as well as qualified mental health nurses seeking to update their knowledge. It will also be a useful reference for professionals in other disciplines such as social work, medicine, and psychology.

Basic Concepts of Psychiatric-mental Health Nursing Louise Rebraca Shives, 2007 This seventh edition includes new chapters and maintains popular features from previous editions such as self awareness prompts while adding research boxes and student worksheets at the end of each chapter.
