Information Sciences 2007 - Proceedings Of The 10th Joint Conference Paul P Wang, 2007-07-18 This proceeding contains the cutting-edge research results in information science and technology, and their related technology. Recent scientific breakthroughs such as invisibility cloak and meta-materials, data mining techniques, advanced game playing in artificial intelligence, nano-technology, unlikely event probability, and fuzzy logic reasoning are just a few outstanding examples. Walter Freeman's 80th birthday celebration is another highlight of this proceedings, because this major event is attended by many leading scientists from around the world. Key speakers include Charles Falco, Water Freeman, Thomas Huang, Meyya Meyyappan, Lotfi Zadeh, Bernette Bouchon Meunier, Heather Carlson, Ling Guan, Etienne Kerre and John Mordese.

European Origins of Library and Information Science Fidelia Ibekwe, 2019-04-23 This book explores the history of Library and Information Science (LIS) across non-English speaking European countries, including France, ex-Yugoslavia, Denmark, Sweden, Norway, Spain and Portugal.

The AI Revolution Antonio Baraybar-Fernández, Sandro Arrufat-Martín, Belén Díaz Díaz, 2025-03-22 This book presents an overview of the vast landscape of artificial intelligence (AI) in the media industry, more specifically in the audiovisual sector. Readers are guided through the fundamental pillars of AI, from machine learning algorithms to advanced neural networks, revealing the technological foundations that drive innovation in the field of communication and media. The possibilities of AI in this area are explored and discussed with real case studies. The book highlights not only the technological developments, but also the ethical dilemmas that arise. From privacy issues to equity in access to education, the book provides a comprehensive view of the challenges that must be addressed to ensure the ethical and sustainable development of artificial intelligence. Altogether, this book illuminates how AI continues to transform the way we communicate, learn, and relate to technology.

Re-writing Women as Victims María José Gámez Fuentes, Sonia Núñez Puente, Emma Gómez Nicolau, 2019-10-17 This volume critically analyses political strategies, civil society initiatives and modes of representation that challenge the conventional narratives of women in contexts of violence. It deepens into the concepts of victimhood and agency that inform the current debate on women as victims. The volume opens the scope to explore initiatives that transcend the pair

abuser-victim and explore the complex relations between gender and violence, and individual and collective accountability, through politics, activism and cultural productions in order to seek social transformation for gender justice. In innovative and interdisciplinary case studies, it brings attention to initiatives and narratives that make new spaces possible in which to name, self-identify, and resignify the female political subject as a social agent in situations of violence. The volume is global in scope, bringing together contributions ranging from India, Cambodia or Kenya, to Quebec, Bosnia or Spain. Different aspects of gender-based violence are analysed, from intimate relationships, sexual violence, military contexts, society and institutions. *Re-writing Women as Victims: From Theory to Practice* will be a key text for students, researchers and professionals in gender studies, political sciences, sociology and media and cultural Studies. Activists and policy makers will also find its practical approach and engagement with social transformation to be essential reading.

Handbook of Research on the Future of Advertising and Brands in the New Entertainment Landscape Miguélez-Juan, Blanca, Bonales-Daimiel, Gema, 2023-01-09 In a globalized world full of noise, brands are constantly launching messages through different channels. For the last two decades, brands, marketers, and creatives have faced the difficult task of reaching those individuals who do not want to watch or listen to what they are trying to tell them. By producing fewer ads or making them louder or more striking, more brands and communications professionals are not going to get those people to pay more attention to their messages; they will only want to avoid advertising in all media. The *Handbook of Research on the Future of Advertising and Brands in the New Entertainment Landscape* provides a theoretical, reflective, and empirical perspective on branded content and branded entertainment in relation to audience engagement. It reviews different cases about branded content to address the dramatic change that brands and conventional advertising are facing short term. Covering topics such as branded content measurement tools, digital entertainment culture, and government storytelling, this major reference work is an excellent resource for marketers, advertising agencies, brand managers, business leaders and managers, communications professionals, government officials, non-profit organizations, students and educators of higher education, academic libraries, researchers, and academicians.

It covers recent advances in the field of digital communication and processes digital social media, software, big data, data mining, and intelligent systems.

Advances in Human Factors in Simulation and Modeling Daniel N. Cassenti, 2017-06-13 This book focuses on

computational modeling and simulation research that advances the current state-of-the-art regarding human factors in simulation and applied digital human modeling. It reports on cutting-edge simulators such as virtual and augmented reality, on multisensory environments, and on modeling and simulation methods used in various applications, such as surgery, military operations, occupational safety, sports training, education, transportation and robotics. Based on the AHFE 2017 International Conference on Human Factors in Simulation and Modeling, held on July 17-21, 2017, in Los Angeles, California, USA, the book is intended as a timely reference guide for researchers and practitioners developing new modeling and simulation tools for analyzing or improving human performance. It also offers a unique resource for modelers seeking insights into human factors research and more feasible and reliable computational tools to foster advances in this exciting research field.

Entrepreneurship in the Fourth Sector María Isabel Sánchez-Hernández, Luísa Carvalho, Conceição Rego, Maria Raquel Lucas, Adriana Noronha, 2021-06-09 “The fourth sector” is a relatively new sector that consists of for-benefit organizations that combine market-based approaches of the private sector with the social and environmental aims of the public and non-profit sectors. This book examines trends of entrepreneurship in the fourth sector, describes specific ecosystems fostering new ventures around the world, and characterizes the most common and innovative business models. It covers as well the main effects, among others, of technological change, innovation, and institutional behavior on the sector in the last years.

Handbook on Data Centers Samee U. Khan, Albert Y. Zomaya, 2015-03-16 This handbook offers a comprehensive review of the state-of-the-art research achievements in the field of data centers. Contributions from international, leading researchers and scholars offer topics in cloud computing, virtualization in data centers, energy efficient data centers, and next generation data center architecture. It also comprises current research trends in emerging areas, such as data security, data protection management, and network resource management in data centers. Specific attention is devoted to industry

needs associated with the challenges faced by data centers, such as various power, cooling, floor space, and associated environmental health and safety issues, while still working to support growth without disrupting quality of service. The contributions cut across various IT data technology domains as a single source to discuss the interdependencies that need to be supported to enable a virtualized, next-generation, energy efficient, economical, and environmentally friendly data center. This book appeals to a broad spectrum of readers, including server, storage, networking, database, and applications analysts, administrators, and architects. It is intended for those seeking to gain a stronger grasp on data center networks: the fundamental protocol used by the applications and the network, the typical network technologies, and their design aspects. The Handbook of Data Centers is a leading reference on design and implementation for planning, implementing, and operating data center networks.

The Routledge Companion to Diasporic Jazz Studies Ádám Havas, Bruce Johnson, David Horn, 2024-11-15 The Routledge Companion to Diasporic Jazz Studies recognizes the proliferation of jazz as global music in the 21st century. It illustrates the multi-vocality of contemporary jazz studies, combining local narratives, global histories, and cultural criticism. It rests on the argument that diasporic jazz is not a passive, second-hand reflection of music originating in the US, but possesses its own integrity, vitality, and distinctive range of identities. This companion reveals the contradictions of cultural globalization from which diasporic jazz cultures emerge, through 45 chapters within seven thematic parts: • What is Diasporic Jazz? • Histories and Counter-Narratives • Making, Disseminating, and Consuming Diasporic Jazz • Culture, Politics, and Ideology • Communities and Distinctions • Presenting and Representing Diasporic Jazz • Challenges and New Directions The Routledge Companion to Diasporic Jazz Studies traces how cultural dynamics related to race, coloniality, gender, and politics traverse and shape jazz. Employing a cross section of approaches to the study of diasporic jazz as eloquently showcased by the entries, this book seeks to challenge the dominant jazz narratives through championing a more all-encompassing, multi-paradigmatic alternative. Bringing together contributions from authors all over the world, this volume is a vital resource for scholars of jazz, as well as professionals in the music industries and those interested in learning about the cultural and historical origins of jazz.

Public Opinion and Turmoil In Latin American Democracies Helcimara Telles, Joscimar Silva, 2025-05-27 This book analyzes the impacts of growing political turmoil and distrust in democracy on public opinion, political communication and electoral behavior of Latin American citizens over the first two decades of the 21st century. During this period, Latin American's young democracies, which were in the process of consolidation, have faced a number of unresolved challenges, such as growing distrust in representative institutions and the judiciary, anti-system protests, the emergence of radical right groups and the election of outsiders and populist leaders. At the same time, Latin American citizens became more suspicious of corporate communication channels and started to trust more in information from social media, while scientific denialism

and support to the Armed Forces and to religious groups have also grown. The rise of new right-wing and left-wing forces in Latin America, along with the proliferation of populist leaders from various ideological camps, have produced informational reconfigurations, with the strengthening of digital social media as an important source of political information and disinformation. All these processes have deeply affected public opinion and political behavior in the region, making election campaigns more polarized, radicalized and based on false messages, while the electorate also has gone through major changes, becoming more independent of parties, less young, more religious and with a greater presence of women. Public Opinion and Turmoil in Latin American Democracies analyzes how political turbulence, sociodemographic changes and frustration with the unfulfilled promises of the democratic regimes inaugurated in the last decades of the 20th century have produced important transformations on public opinion that deeply reshaped political behavior leading to an unprecedented crisis of democracy across the region.

Intelligent Sustainable Systems Atulya Nagar, Dharm Singh Jat, Durgesh Mishra, Amit Joshi, 2025-02-19 This book provides insights of World Conference on Smart Trends in Systems, Security and Sustainability (WS4 2024) which is divided into different sections such as Smart IT Infrastructure for Sustainable Society; Smart Management Prospective for Sustainable Society; Smart Secure Systems for Next Generation Technologies; Smart Trends for Computational Graphics and Image Modeling; and Smart Trends for Biomedical and Health Informatics. The proceedings is presented in four volumes. The book is helpful for active researchers and practitioners in the field.

Encyclopedia of Information Science and Technology, Fifth Edition Khosrow-Pour D.B.A., Mehdi, 2020-07-24 The rise of intelligence and computation within technology has created an eruption of potential applications in numerous professional industries. Techniques such as data analysis, cloud computing, machine learning, and others have altered the traditional processes of various disciplines including healthcare, economics, transportation, and politics. Information technology in today's world is beginning to uncover opportunities for experts in these fields that they are not yet aware of. The exposure of specific instances in which these devices are being implemented will assist other specialists in how to successfully utilize these transformative tools with the appropriate amount of discretion, safety, and awareness. Considering the level of diverse uses and practices throughout the globe, the fifth edition of the Encyclopedia of Information Science and Technology series continues the enduring legacy set forth by its predecessors as a premier reference that contributes the most cutting-edge concepts and methodologies to the research community. The Encyclopedia of Information Science and Technology, Fifth Edition is a three-volume set that includes 136 original and previously unpublished research chapters that

present multidisciplinary research and expert insights into new methods and processes for understanding modern technological tools and their applications as well as emerging theories and ethical controversies surrounding the field of information science. Highlighting a wide range of topics such as natural language processing, decision support systems, and electronic government, this book offers strategies for implementing smart devices and analytics into various professional disciplines. The techniques discussed in this publication are ideal for IT professionals, developers, computer scientists, practitioners, managers, policymakers, engineers, data analysts, and programmers seeking to understand the latest developments within this field and who are looking to apply new tools and policies in their practice. Additionally, academicians, researchers, and students in fields that include but are not limited to software engineering, cybersecurity, information technology, media and communications, urban planning, computer science, healthcare, economics, environmental science, data management, and political science will benefit from the extensive knowledge compiled within this publication.

14th International Conference on Computational Intelligence in Security for Information Systems and 12th International Conference on European Transnational Educational (CISIS 2021 and ICEUTE 2021) Juan José Gude Prego, José Gaviria de la Puerta, Pablo García Bringas, Héctor Quintián, Emilio Corchado, 2021-09-21 This book of Advances in Intelligent and Soft Computing contains accepted papers presented at CISIS 2021 and ICEUTE 2021, all conferences held in the beautiful and historic city of Bilbao (Spain), in September 2021. The aim of the 14th CISIS 2021 conference is to offer a meeting opportunity for academic and industry-related researchers belonging to the various, vast communities of computational intelligence, information security, and data mining. The need for intelligent, flexible behavior by large, complex systems, especially in mission-critical domains, is intended to be the catalyst and the aggregation stimulus for the overall event. After a thorough peer-review process, the CISIS 2021 International Program Committee selected 23 papers which are published in these conference proceedings achieving an acceptance rate of 40%. In this relevant edition, a special emphasis was put on the organization of special sessions. One special session is organized related to relevant topics as follows: building trust in ecosystems and ecosystem components. In the case of 12th ICEUTE 2021, the International Program Committee selected 17 papers, which are published in these conference proceedings. One special session is organized related to relevant topics as follows: sustainable personal goals: engaging students in their learning process. The selection of papers is extremely rigorous

in order to maintain the high quality of the conference, and we would like to thank the members of the program committees for their hard work in the reviewing process. This is a crucial process to the creation of a high standard conference, and the CISIS and ICEUTE conferences would not exist without their help.

Handbook of Research on Effective Project Management through the Integration of Knowledge and Innovation Jamil, George Leal, Lopes, Sérgio Maravilhas, Malheiro da Silva, Armando, Ribeiro, Fernanda, 2015-01-31 The field of project management experiences conceptual, technological, and decision issues when projects are created, implemented, and executed without the needed strategic connection. It is important to improve the connection between knowledge management and project management practices. The *Handbook of Research on Effective Project Management through the Integration of Knowledge and Innovation* bridges the gap between knowledge management and project management practices by providing both classical and modern views on their relationship. Discussing principles, practices, methods, and real case studies, this book describes the importance of aligning projects with a knowledge-based strategic plan to the benefit of practitioners, professionals, scholars, and researchers in the fields of management and information science.
