Creative Intelligence in the 21st Century Don Ambrose, Robert J. Sternberg, 2016-07-15 How can creative individuals and societies adapt to complex 21st-century conditions? Will civilizations thrive or collapse in the decades to come if they are not creative enough, or if they are too creative? Interest in these questions is growing; however, until now there has been inadequate understanding of the socioeconomic and cultural trends and issues that influence creativity. This book provides that understanding while yielding insights from many of the world's leading creativity researchers and educational experts. The book begins with a big-picture, interdisciplinary overview of the socioeconomic, cultural, and technological pressures

emerging from 21st-century globalization and describes some ways in which those pressures simultaneously suppress, distort, and invigorate creativity in general, and creative education in particular. After that, prominent scholars of creativity and education use their impressive knowledge bases to clarify how we can adjust our thoughts and actions in order to give ourselves the best possible chances for success in this complex world. “The world’s problems are complex, messy, and seemingly intractable, but history tells us that human creativity finds solutions to even the most daunting problems. This book collects perspectives on creative development from many of the most respected scholars and educators working in creativity and innovation today, helping chart a path forward for creativity in the 21st century.” – Jonathan Plucker, Julian C. Stanley Endowed Professor of Talent Development, Johns Hopkins University “A volume taking on macro-opportunities and macroproblems by editors Ambrose and Sternberg is a treat for readers who want to think ‘big’ and think ‘forward.’ Kick back for an imaginative journey that reaches back to early global insights but propels us solidly into the 21st century and beyond.” – Ann Robinson, Past President, National Association for Gifted Children

Moonwalking with Einstein Joshua Foer, 2011-03-03 The blockbuster phenomenon that charts an amazing journey of the mind while revolutionizing our concept of memory “Highly entertaining.” —Adam Gopnik, The New Yorker “Funny, curious, erudite, and full of useful details about ancient techniques of training memory.” —The Boston Globe An instant bestseller that has now become a classic, Moonwalking with Einstein recounts Joshua Foer's yearlong quest to improve his memory under the tutelage of top mental athletes. He draws on cutting-edge research, a surprising cultural history of remembering, and venerable tricks of the mentalist's trade to transform our understanding of human memory. From the United States Memory Championship to deep within the author's own mind, this is an electrifying work of journalism that reminds us that, in every way that matters, we are the sum of our memories.

Conscious Bob Rosen, Emma-Kate Swann, 2018-07-19 Conscious is a deeply human approach to personal change Our world is changing faster than our ability to adapt. Ambushed by speed, complexity, and uncertainty, many of us are unprepared for this acceleration. We act on autopilot as new challenges confront us. We are too reactive to problems and miss out on opportunities. We get hijacked by conflicting values and polarizing relationships. We face uncertainty with fear and mistrust. Stress and burnout are pervasive as many of us do not perform up to our potential. Organizations are not adapting well either. Seventy percent of change efforts fail. Slow execution, unrealized growth, unhealthy cultures, and obsession with short-term results undermine long-term success. Inside communities, there is more tension, diminishing trust in our institutions, and a growing inability to solve our most complex social problems. The primary culprit for these maladies is our lack of awareness. Let’s face it: Our current approach to change is running out of steam. And the cost of unaware people is too high to pay. In this age of acceleration, we need a fresh approach to living and leading. CONSCIOUS is our wake-up call – to be aware, awake, and accountable. Nothing is more important than understanding ourselves, our

relationships, and our surroundings. Being conscious helps us think deeper, learn faster, and collaborate better. The more conscious we are, the faster we adapt, and the higher performing we become. Conscious is the new smart. As one of the premier global experts on leadership and transformation, Bob Rosen and Healthy Companies have revealed a profound truth about modern-day change: the most successful people, at all levels of society, follow four powerful practices of being conscious: Go Deep – Discover your inner self Think Big – See a world of possibilities Get Real – Be honest and intentional Step Up – Act boldly and responsibly Conscious is your personal roadmap through transformation – helping you adapt and accelerate into the future. To create sustainable change for yourself and your business. Why not be the one with your head lights on while others are driving in the dark?

The Man Who Knew the Answer Richard Segal,2020-05-29 The afternoon began innocently enough with a lunch meeting in Tower Hill, but gathered pace when I hesitated upon my departure from the Rotunda, and overheard a quartet of deal-making Continentals: ‘The names for an apple are not the fruit itself.’ Code for a transaction they were negotiating or aphorisms for the spewing aside, one picaresque experience leads to another and the next thing I knew, I was on the 73 bus heading out of Harvard Square, with the Armenian driver working the crowd and apologizing for our poor geography. Vijay finally breaks loose of his winter skin while sampling comedy clubs up and down the East Coast, and discovers that The Impresario represents truth in advertizing. In his black and blue swan t-shirt, every clown does have a silver lining. However, these are but preludes to the existential challenges soon to face a young nation, in search of the one man able to solve these riddles, and deliver a cure for us all.

The Bill Gates Problem Tim Schwab,2023-11-14 New York Times Editors' Choice A powerful investigation of Bill Gates and the Gates Foundation, showing how he uses philanthropy to exercise enormous political power without accountability

Through his vaunted philanthropy, Bill Gates transformed himself from a tech villain into one of the most admired people on the planet. Even as divorce proceedings and allegations of misconduct have recently tarnished his public image, the beneficence of the Gates Foundation, celebrated for spending billions to save lives around the globe, is taken as a given. But as Tim Schwab shows in this fearless investigation, Gates is still exactly who he was at Microsoft: a bully and monopolist, convinced of his own righteousness and intent on imposing his ideas, his solutions, and his leadership on everyone else. At the core, he is not a selfless philanthropist but a power broker, a clever engineer who has innovated a way to turn extreme wealth into immense political influence—and who has made us believe we should applaud his acquisition of power, not challenge it. Piercing the blinding halo that has for too long shielded the world's most powerful (and most secretive) charitable organization from public scrutiny, *The Bill Gates Problem* shows how Gates's billions have purchased a stunning level of control over public policy, private markets, scientific research, and the news media. Whether he is pushing new educational standards in America, health reforms in India, global vaccine policy during the pandemic, or Western industrialized agriculture throughout Africa, Gates's heady social experimentation has shown itself to be not only undemocratic, but also ineffective. In many places, Bill Gates is hurting the very people he intends to help. No less than dark-money campaign contributions or big-business political lobbying, Bill Gates's philanthropic empire needs to be seen as a problem of money in politics. It is a dangerous model of unconstrained power that threatens democracy and demands our attention.

Who? Charles Edward Gerson, 2011-12-07 *WHO?* is a very true accounting of my life, with all of it's ups and downs. The difference in my ups and downs, and the normal persons ups and downs are that mine are extreme, rare, funny, up-setting, emotional, and gross all mixed together, on a regular basis. Not to mention that i am A. D. D. (Attention Deficit Disorder) and have written a book. Go figure! This book starts when my mom and dad met in a Chinese restaurant, and ends when i am so old that i can't remember when my mom and dad met! *WHO?* spans many years, and includes my gain of moderate wealth too being a pauper, and many unique adventures that you may have lived, only in your mind. Try it! Buy it! You'll like it!

Black and Brown Planets Isiah Lavender III, 2014-09-25 Black and Brown Planets embarks on a timely exploration of the American obsession with color in its look at the sometimes-contrary intersections of politics and race in science fiction. The contributors, including De Witt D. Kilgore, Edward James, Lisa Yaszek, and Marleen S. Barr, among others, explore science fiction worlds of possibility (literature, television, and film), lifting blacks, Latin Americans, and indigenous peoples out from the background of this historically white genre. This collection considers the role of race and ethnicity in our visions of the future. The first section emphasizes the political elements of black identity portrayed in science fiction from black America to the vast reaches of interstellar space framed by racial history. In the next section, analysis of indigenous science fiction addresses the effects of colonization, helps discard the emotional and psychological baggage carried from its impact, and recovers ancestral traditions in order to adapt in a post-Native-apocalyptic world. Likewise, this section explores the affinity between science fiction and subjectivity in Latin American cultures from the role of science and industrialization to the effects of being in and moving between two cultures. By infusing more color in this otherwise monochrome genre, Black and Brown Planets imagines alternate racial galaxies with viable political futures in which people of color determine human destiny.

Shooting Ladders Gary Keeney, 2010-08-03 Shooting Ladders is a book of advice written to a little girl named Tori. She was four years old when the author started writing the first topic, and she was eight years old when he finished the last

topic. But he didn't write it for the Tori of then or even the Tori of now; instead he wrote it for the Tori of the future, as something to help her make the right decisions in her late childhood/early adult years and throughout her life. The book contains the author's opinions on hundreds of various subjects—some of them practical, many of them philosophical; some serious, some whimsical. On a typical subject, the author tells a story from his own personal experiences and then adds a moral lesson for her to learn from the story. Although he's not trying to tell her what to think; he is trying to guide her into making the proper decisions in life. The author hopes that she'll carefully weigh all the options and choose the paths that lead her to a good and happy life.
