Indigenous People and Mobile Technologies Laurel Evelyn Dyson, Stephen Grant, Max Hendriks, 2015-10-05 In the rich tradition of mobile communication studies and new media, this volume examines how mobile technologies are being embraced by Indigenous people all over the world. As mobile phones have revolutionised society both in developed and developing countries, so Indigenous people are using mobile devices to bring their communities into the twenty-first century. The explosion of mobile devices and applications in Indigenous communities addresses issues of isolation and building an environment for the learning and sharing of knowledge, providing support for cultural and language revitalisation, and offering the means for social and economic renewal. This book explores how mobile technologies are overcoming disadvantage and the tyrannies of distance, allowing benefits to flow directly to Indigenous people and bringing wide-ranging changes to their lives. It begins with general issues and theoretical perspectives followed by empirical case studies that include the establishment of Indigenous mobile networks and practices, mobile technologies for social change and, finally, the ways in which mobile technology is being used to sustain Indigenous culture and language.

Food, Agriculture, and Rural Development Kostas G. Stamoulis, 2001-01-01 This publication is not intended to sketch a research agenda for FAO; rather, the paper contributes to the overall objective of identification of research priorities among the scientific community and those more directly involved in development policy. It contains in-depth reviews on current and emerging issues in the economic analysis of food, agriculture and rural development, written by well-known scholars in the field. The selection of the issues for in-depth review was the result of a survey conducted among FAO staff involved in policy assistance activities in the main developing regions. Thus, the choice reflects their and, by extension, the policy-makers's perception as to the main research priorities in the economic analysis of agriculture, rural development, poverty and food security. A synthesis of the survey results is included as a chapter.

International Educational Innovation and Public Sector Entrepreneurship Alexander W. Wiseman, 2014-01-10 This volume in the International Perspectives on Education and Society Series focuses on the ways that social entrepreneurs innovatively contribute to the development and implementation of education worldwide.

Primary Education in Ecuador's Chota Valley Kevin Lucas, 2000 In November 1998, the author arrived in Mascarilla, a small village in Ecuador's predominantly-black Chota Valley, to begin a six-month teaching assignment at the Escuela Hernando Tquez (the local primary school). Based both on his own observations and on the assessments offered by various former students, parents, community leaders, and Ecuadorean scholars, the author judges the educational performance of the Escuela Hernando Tquez to be grossly inadequate. Indeed, the various shortcomings attributed to the school (and documented as a case study in chapters three and four of this book) are so glaring that the author was led to question how such a dysfunctional school could be allowed to exist in a country where the government states that to improve education is to improve the quality of life of Ecuador's people. Ultimately, the school's failure to provide quality education to its students forced the author to reconsider the true purpose of public education. Indeed, why does the state provide public education? It is generally assumed that the state builds and supports public schools because it believes in the potential of education to affect great changes in society. Specifically, most government officials contend that public school systems are designed with two primary goals: to contribute to the state's socio-economic development through the creation of human capital, and to preserve and promote national unity and democratic values. Reflecting on the poor performance of the Escuela Hernando Tquez, the author (in chapter five) asks whether there might be a hidden agenda regarding the state's role in public education. Perhaps the state's rhetoric regarding the potential socio-economic and political benefits of public education is used to obscure the public school system's true purpose. Perhaps the state (acting as the representative of society's dominant classes) provides public education in order to control oppressed groups, to ensure that they do not challenge the status quo.

Perhaps the state provides public education solely in order to ensure the social reproduction of injustice and inequality. The final chapter considers the relationship between education and development, observing how the prevailing development-as-economic-development definition has often led to increased inequality and injustice. Proposing a new understanding of development based on humanist ideals, the author explores how public schools such as the Escuela Hernando Tquez could be transformed from the control mechanisms that they are, into the instruments of social justice that they could be.

Finance & Development, December 2005 International Monetary Fund. External Relations Dept.,2005-12-01 This paper reviews the resurgence of Latin America. The paper highlights that much of the region has witnessed a swift and robust recovery from the successive financial crises of 2001-02. Within two years, the region's economic growth reached 5.6 percent in 2004, a 24-year high. Growth rates of about 4 percent in 2005 and 3¾ percent projected for 2006 are well above historical averages. Mexico and South American countries have gained, in particular, from the surge in fuel, food, and metals prices, and have generally been able to exploit these opportunities by expanding production.

Contemporary Research and Perspectives on Early Childhood Mathematics Education Iliada Elia,Joanne Mulligan,Ann Anderson,Anna Baccaglini-Frank,Christiane Benz,2018-02-21 This book brings together a collection of research-based papers on current issues in early childhood mathematics education that were presented in the Topic Study Group 1 (TSG 1) at the 13th International Congress on Mathematical Education (ICME-13), held at the University of Hamburg in 2016. It will help readers understand a range of key issues that early childhood mathematics educators encounter today. Research on early childhood mathematics education has grown in recent years, due in part to the well-documented, positive relation between children's early mathematical knowledge and their later mathematics learning, and to the considerable emphasis many countries are now placing on preschool education. The book addresses a number of central questions, including: What is mathematical structural development and how can we promote it in early childhood? How can multimodality and embodiment contribute to early mathematics learning and to acquiring a better understanding of young children's mathematical development? How can children's informal mathematics-related experiences affect instruction and children's learning in different mathematics content areas? What is the role of tools, including technology and picture books, in supporting early mathematics learning? What are the challenges in early childhood mathematics education for teachers' education and professional development?

Women's Lives around the World Susan M. Shaw, Nancy Staton Barbour, Patti Duncan Ph.D., Kryn Freehling-Burton Ph.D., Jane Nichols, 2018-01-04 Providing an in-depth look at the lives of women and girls in approximately 150 countries, this multivolume reference set offers readers transnational and postcolonial analysis of the many issues that are critical to the success of women and girls. For millennia, women around the world have shouldered the responsibility of caring for their families. But in recent decades, women have emerged as a major part of the global workforce, balancing careers and family life. How did this change happen? And how are societies in developing countries responding and adapting to women's newer roles in society? This four-volume encyclopedia examines the lives of women around the world, with coverage that includes the education of girls and teens; the key roles women play in their families, careers, religions, and cultures; how issues for women intersect with colonialism, transnationalism, feminism, and established norms of power and control. Organized geographically, each volume presents detailed entries about the lives of women in particular countries. Additionally, each volume offers sidebars that spotlight topics related to women and girls in specific regions or focus on individual women's lives and contributions. Primary source documents include sections of countries' constitutions that are relevant to women and girls, United Nations resolutions and national resolutions regarding women and girls, and religious statements and proclamations about women and girls. The organization of the set enables readers to take an in-depth look at individual countries as well as to make comparisons across countries.

American Universities and Colleges Praeger Publishers, 2010-04-16 For well over a half century, American Universities and Colleges has been the most comprehensive and highly respected directory of four-year institutions of higher education in the United States. A two-volume set that Choice magazine hailed as a most important resource in its November 2006 issue, this revised edition features the most up-to-date statistical data available to guide students in making a smart yet practical decision in choosing the university or college of their dreams. In addition, the set serves as an indispensable reference source for parents, college advisors, educators, and public, academic, and high school librarians. These two volumes provide extensive information on 1,900 institutions of higher education, including all accredited colleges and

universities that offer at least the baccalaureate degree. This essential resource offers pertinent, statistical data on such topics as tuition, room and board; admission requirements; financial aid; enrollments; student life; library holdings; accelerated and study abroad programs; departments and teaching staff; buildings and grounds; and degrees conferred. Volume two of the set provides four indexes, including an institutional Index, a subject accreditation index, a levels of degrees offered index, and a tabular index of summary data by state. These helpful indexes allow readers to find information easily and to make comparisons among institutions effectively. Also contained within the text are charts and tables that provide easy access to comparative data on relevant topics.
