Pour une histoire des Alpes, Moyen Age et Temps Modernes Jean-François Bergier, 2024-10-28 The Alps, as Professor Bergier shows in this selection of his work, should not be considered an impassable barrier, nor an isolated region, but rather as an integral part of the history of Europe. The lowlanders' typical view of the mountains as fearful heights to be crossed, and the image of those who lived there as existing in a delicate balance with nature, are part only of the story. These articles are particularly concerned with transalpine traffic, and the different routes it took in response to changing circumstances in the lands to south and north, and with the exploitation and use of mountain resources. A number aim also to identify the particularities of the mountain way of life, and its social and political organisation.

Halophilic Microorganisms Antonio Ventosa, 2013-11-21 Various groups of microorganisms - bacteria, archaea, algae and even fungi - have adapted to a life in a hypersaline environment. *Halophilic Microorganisms* explores the many-fold aspects of life under these extreme conditions. Several contributions analyze the microbial communities in different hypersaline environments such as salterns, soda lakes, and the Dead Sea or salt sediments. Reviews of their biodiversity, phylogeny, and genetics are given as well as of the diverse adaptation strategies of salt-tolerant or salt-requiring microorganisms. Microorganisms that have adapted to moderate salt concentrations or to habitats with drastic fluctuations are also treated in addition to the extreme halophiles. Their physiological, biochemical and molecular mechanisms developed in response to salinity and high osmotic pressure as well as current and future biotechnological applications are presented.

Сборник Чехословацких Химических Работ, 1929 Publishes original papers and reviews in English by authors from various countries. The journal covers not only traditional fields, such as organic, physical and inorganic chemistry and biochemistry, but also interdisciplinary areas ranging from chemical physics to bioorganic chemistry.

Gender, Space and Illicit Economies in Eighteenth-Century Europe Anne Montenach, 2024-02-23 This book seeks to contribute a multi-dimensional, multi-layered and gendered approach to the illicit economy in the historiography of early modern Europe. Using original source material from several countries, this volume concentrates on a border and

transnational area—approximately the Lyon-Geneva-Turin triangle—located at the heart of European trade. It focuses on three products—salt, cotton and silk—all of which fuelled the black market between the last decades of the seventeenth century and the French Revolution. This volume offers an original contribution to wider studies of smuggling, illicit markets and women's economic roles by taking into account the economic life of remote mountain communities and industrious cities. Showing that irregular practices were a structural characteristic of early modern economies, it provides insight into the opportunities offered to women in a highly flexible economy where licit and illicit activities were intermingled in a very complex way. This research monograph is aimed at a historical audience and constitutes a useful resource for students and scholars interested in gender history, social and economic history, urban history and French studies.

Renaissance Dynasticism and Apanage Politics Matthew Vester, 2012-06-01 One of the most brilliant courtiers and military leaders in Renaissance France, Jacques de Savoie, duke of Nemours, was head of the cadet branch of the house of Savoy, a dynasty that had ruled over a collection of lands in the Western Alps since the eleventh century. Jacques' cousin Emanuel Filibert, duke of Savoy and ruler of the Sabaudian lands, fought against Jacques, and each expanded their influence at the other's expense, while also benefitting from the other's position. This study examines the complex and rich relationship of the noble cousins that spanned the battlefields, bedchambers, courts, and backrooms of taverns from Paris to Turin to the frontiers between the Genevois and Geneva. Each prince played key roles in sixteenth-century European politics due to their individual and dynastic identities. Jacques' apanage of the Genevois was a virtual state-within-a-state, the institutional expression of a simultaneously competitive and cooperative relationship between two branches of a sovereign house. Here Matthew Vester provides a new picture of the nobility and of the European political landscape that moves beyond old views and taps into the unspoken cultural rules governing dynastic relations.

The Military Orders Volume V Peter #N/A, 2017-07-05 Scholarly interest and popular interest in the military orders show no sign of abating. Their history stretches from the early twelfth century to the present. They were among the richest and most powerful religious corporations in pre-Reformation Europe, and they founded their own states on Rhodes and Malta

and also on the Baltic coast. Historians of the Church, of art and architecture, of agriculture and banking, of medicine and warfare and of European expansion can all benefit from investigating the orders and their archives. The conferences on their history that have been organized in London every four years have attracted scholars from all over the world. The present volume records the proceedings of the Fifth Conference in 2009 (held in Cardiff as the London venue was in the process of refurbishment), and, like the earlier volumes in the series, will prove essential for anyone interested in the current state of research into these powerful institutions. The thirty-eight papers published here represent a selection of those delivered at the conference. Three papers deal with the recent archaeological investigations at the Hospitaller castle at al-Marqab (Syria); others examine aspects of the history of the military orders in the Latin East and the Mediterranean lands, in Spain and Portugal, in the British Isles and in northern and eastern Europe. The final two papers address the question of present-day perceptions of the Templars as moulded by the sort of popular literature that most of the other contributors would normally keep at arm's length.

Salt and Civilization S.A.M. Adshead, 2016-07-27 'Highly recommended as a thorough examination of the commodity history of salt'-The Geographical Journal. Salt has been called the primordial addiction. It has been an object of almost universal consumption since Neolithic times. This book sets out to place the particular histories of salt in a global perspective and write the history of a human commodity as a theme in world history. From pagan man, through classical Rome, Byzantium, early Islam, the Dark Ages, the Renaissance to the modern world, the production, distribution, consumption and taxation of salt are examined. The author shows how a history of salt cannot be separated from the histories of commerce, medicine, diet, cooking, taxation, invention and war. Although taken for granted today, salt has been of critical economic and cultural importance to countries and peoples throughout history; the instigator and catalyst to actions and events ranging from the first maritime expedition of Muslim forces to Columbus's discovery of America. After Salt and Civilization salt can not be taken for granted again.

Inequality and Climate Change Delgado-Ramos, Gian Carlo, 2015-12-01 Climate change is one of the most pressing challenges of the twenty-first century. Anthropogenic activities, such as fossil fuel consumption and other activities focused on enhancing economic growth, have been identified as the main drivers of changes in the environment that defy planetary boundaries. The transgression of planetary boundaries has profound implications for practically all biophysical and human systems and their impact could also be related to the exacerbation of existing problems such as land tenure insecurity, poverty and inequality, marginalization of poorer populations, climate induced migration, and resource wars or conflicts. From a global South perspective, research on the multifaceted nature of climate change is thus necessary and appropriate, including the analysis of socioeconomic, political and cultural aspects. This book is an outcome of the Comparative Research

Workshop on Inequality and Climate Change: Perspectives from the South of the South-South Collaborative Programme of CLACSO-CODESRIA-IDEAS. It gathers a diversity of case studies from the South with ample biophysical differences and particular social and cultural realities. As such, it is a fresh contribution offering a vantage point from which to examine some of the current perspectives on inequality and climate change.
