Inside Relationships Sandra Faulkner, 2021-12-29 The second edition of this book again uses original case studies as a means to bring home to students, through lived experiences, the theories and concepts of interpersonal communication. Each piece takes an arts-based approach—spanning essays, short stories, scripts, photographs, poetry— and has been newly written for this edition by communication researchers, writers, and artists. The case studies focus on the aesthetic dimensions of relating to illustrate to students the workings of relationship management with regards to friendship, race, class, gender, family interaction, sexuality, and other key topics in relational communication. The case studies are framed from a critical interpersonal perspective to encourage students to consider how power and cultural discourses about relationships influence their relating. Faulkner's introduction to each section provides important pedagogical content to give context and meaning to the cases that follow. Each case closes with questions for discussion, activities, and additional resources to help students analyze the material. The book is suited as core or supplemental reading for courses in interpersonal or relational communication.

Encyclopedia of Human Relationships Harry T. Reis, Susan Sprecher, 2009-03-15 Library Journal Best Reference 2009 An excellent gateway to further examination of any of the subdisciplines of relationship science, or as a research tool in its own right. —Library Journal Relationships are fundamental to nearly all domains of human activity, from birth to death. When people participate in healthy, satisfying relationships, they live, work, and learn more effectively. When relationships are distressed or dysfunctional, people are less happy, less healthy, and less productive. Few aspects of human experience have as broad or as deep effects on our lives. The Encyclopedia of Human Relationships offers an interdisciplinary view of all types of human associations—friends, lovers, spouses, roommates, coworkers, teammates, parents and children, cousins, siblings, acquaintances, neighbors, business associates, and so forth. Although each of these connections is unique in some respect, they share a common core of principles and processes. These three volumes provide a state-of-the-art review of the extensive theories, concepts, and empirical findings about human relationships. Key Features Compiles leading-edge information about how people think, feel, and act toward each other Presents the best in the field—authors who have contributed significant scientific knowledge about personal relationships over the past several decades. Sexuality & Ageing Walter Pierre Bouman, Peggy J. Kleinplatz, 2017-10-02 Across the globe, both in developed and developing countries, the population is rapidly ageing. In the fields of sexual and relationship therapy and sexual health, ageing has not been an issue of priority. Too often, ageing is thought of as a process that relates to problems, deficits, and taboos, and less to pleasure, change, growth and diversity. It is treated as a separate life stage and not a process throughout the lifecycle. Sexuality and sexual health are important parts of the lives of older people, as they have a significant impact on quality of life, psychological well-being and physical health, as well as social and family life. This book brings together contributions from those currently writing on and researching ageing as it relates, in a therapeutic context, to gender identity, to sex and sexuality, and to intimate relationships. This book was originally published as a special issue of Sexual

and Relationship Therapy.

Modern Relationships Mahzad Hojjat, Anne Moyer, 2024 This volume compiles the latest research and theory on close relationships in the twenty-first century from multi-disciplinary and international perspectives with the intent of taking stock of the cultural, political, and legal changes that have shaped the relationship landscape. Some of the important shifts that are captured are the rise of singlehood, online dating, and cohabitation, the new importance of social media, marriage equality, and changes in gender norms. New ways of forming families and unions via adoption, assisted reproduction, and remarriage are also covered, as well as coupling across cultural, racial, religious, and national lines.

Towards a Theology of Relationship Michael Berra, 2024-01-25 With the theme of relationship receiving renewed attention in a variety of areas, theological expressions of the subject are also being brought back into the spotlight. Although the concept of a personal relationship with God is a common Christian expression, it is often poorly defined. Here, Michael Berra draws on the Swiss theologian Emil Brunner to redefine and rehabilitate the analogy of relationship. Basing his study primarily on Brunner's seminal work *Truth as Encounter*, Berra proposes that relationship ought to be the central motif for the whole of theology. He investigates the theme in light of modern relationship science, arguing that God-human interaction categorically meets the definition of a relationship, and that it is existentially intended to be intimate. Scholars and church leaders will find in Berra's approach a refreshing voice in this dynamic field.

Identity and Interethnic Marriage in the United States Stanley Gaines, Jr., 2017-05-25 Drawing on psychological and sociological perspectives as well as quantitative and qualitative data, *Identity and Interethnic Marriage in the United States* considers the ways the self and social identity are linked to the dynamics of interethnic marriage. Bringing together the classic theoretical contributions of George Herbert Mead, Erving Goffman, and Erik Erikson with contemporary research on ethnic identity inspired by Jean Phinney, this book argues that the self and social identity—especially ethnic identity—are reflected in individuals' complex journey from singlehood to interethnic marriage within the United States.

The Developmental Course of Romantic Relationships Brian G. Ogolsky, Sally A. Lloyd, Rodney M. Cate, 2013-07-18 Recipient of the 2014 International Association for Relationship Researchers Book Award! This multidisciplinary text highlights the development of romantic relationships, from initiation to commitment or demise, by highlighting the historical context, current research and theory, and diversity of patterns. Engagingly written with colorful examples, the authors examine the joy, stress, power-struggles, intimacy, and aggression that characterize these relationships. Readers gain a better understanding as to why, even after the pain and suffering associated with a breakup, most of us go right back out and start again. Relationships are examined through an interdisciplinary lens –psychological, sociological, environmental and communicative perspectives are all considered. End of chapter summaries, lists of key concepts, and additional readings serve as a review. As a whole the book explores what precipitates success or failure of these relationships and how this has

changed over time. Highlights of the book's coverage: Incorporates both cross-sex and same-sex romantic relationships Examines the roles of gender, race, class, culture, age, and sexuality in relationship development Looks at multiple types of romantic relationships in emerging adulthood, including dating and cohabitation Explores both positive and negative relational processes Analyzes the latest and most important scholarship. The book opens with an introduction followed by a historical overview of the development of relationships. Next relationship development models are examined including the influence of social factors and the interaction of the partners involved. This volume examines how partners initiate romantic relationships, including infatuation, sexual attraction, and the impact of technology; how cohabitation affects the quality of the future of the relationship; and the individual, social, and circumstantial factors that predict stability or break-ups in romantic relationships. The book ends with an examination of the "dark side" of relationships, and suggestions for future research on romantic pairings. Intended as a supplement for advanced undergraduate or graduate courses in marriage and family, personal/close/intimate relationships, or interpersonal/family communication taught in human development and family studies, psychology, social work, sociology, communication, counseling and therapy, this book also appeals to researchers and practitioners interested in the romantic relationship processes.

Resilience Process and Its Personal and Social Bases Chau Kiu Cheung, 2024-10-30 This book is to elucidate personal and social bases for personal resilience, thus addressing the issue concerning the predominance of social factors in shaping resilience. Essentially, the book starts with a clarification of resilience as a phenomenon rather than a trait. The clarification also identifies the personal bases in terms of the resilience process, which specifies belief about resilience as a precursor to learning about resilience, action for resilience, and resilience successively. To justify the personal and social bases, the book expounds the analytical-functionalist framework to specify voluntaristic and deterministic mechanisms to perform the four requisite functions of goal attainment, adaptation, integration, and latency. Equipped with the conceptual

and theoretical grounds, the book proceeds to scrutinize the effects of personal and social factors on resilience and its process. The personal factors include personal background characteristics, personality, functional disability, and various beliefs, whereas the social factors include experiences of caring, peace, violence, and social exclusion in society, kindness, sociability, and aid from other people, and social capital. The scrutiny engages five databases about 6.948 Chinese people in Hong Kong and neighboring Chinese cities, composed of the public, service users, older adults, students, and people with visual impairment. Overall, the book presents ample theoretical and empirical substances to clarify the genesis of resilience.
