Enseñar y aprender geografía para un mundo sostenible Jesús Granados Sánchez, Rosa María Medir Huerta, 2021-12-01 Este libro quiere ser una contribución al marco de la educación para el desarrollo sostenible (EDS) para el 2030. Su principal objetivo consiste en presentar reflexiones y propuestas innovadoras en el campo de la didáctica de la geografía y la EDS, con la finalidad de avanzar en la mejora de los contenidos y en la manera como aprenden nuestros alumnos competencias geográficas y de EDS, de modo que ayuden a la transformación de la realidad y a la creación de un mundo más sostenible. La obra se estructura a partir de tres grandes secciones. La primera parte aborda la sostenibilización curricular en diferentes niveles educativos, es decir, se reflexiona sobre cómo introducir los contenidos, los valores y las competencias propios de la EDS en la enseñanza de la geografía. La sección reúne experiencias y propuestas innovadoras en didáctica de la geografía que facilitan la consecución de los objetivos de desarrollo sostenible. La segunda parte del libro se centra en el papel de la geografía en la construcción de una ciudadanía global sostenible y en ella se esbozan las competencias y los principios básicos. La tercera y última parte trata la didáctica del paisaje sostenible. El paisaje es un concepto e instrumento didáctico interdisciplinar que permite visualizar la forma que adquiere la sostenibilidad en distintos contextos geográficos. La sección presenta propuestas didácticas centradas en el trabajo por proyectos, los itinerarios didácticos por espacios naturales y el análisis de problemáticas ambientales localizadas en lugares concretos. La educación en paisaje sostenible es una educación para el futuro que es integradora, propositiva y creativa, y que promueve la identificación, el análisis, la evaluación de alternativas y la creación de paisajes sostenibles.

Investigar la educación Margarita Isabel Asensio Pastor, Juana Celia Domínguez Oller, Anastasio García Roca, María Jesús Lirola Manzano, Manuel José López Martínez, 2021-12-10 La Comisión de Investigación del Departamento de Educación de la Universidad de Almería, en colaboración con el Vicerrectorado de Extensión y Comunicación de esta universidad, organizó el pasado 27 de abril el V Encuentro de Investigación Del Alumnado (EIDA). Como en ediciones anteriores, esta Comisión contó con la colaboración imprescindible de estudiantes matriculados en los diferentes grados, másteres y

doctorados de esta universidad, sin los que sería imposible poder llevar a cabo EIDA. Este encuentro, abierto a toda la comunidad universitaria, permitió reunir a estudiantes interesados en la mejora y el desarrollo de la educación. En él, se pudo compartir y discutir sobre investigación educativa, un espacio abierto al diálogo. Se trata de un evento en el que los docentes en formación se convierten en los verdaderos protagonistas. En el presente volumen se recogen las principales aportaciones compartidas en el evento con la especial participación del catedrático José Ignacio Rivas-Flores. Tierra (The Science of the Earth) DK, 2023-10-31 Esta es una introducción informativa y visualmente llamativa sobre nuestro planeta Tierra. La esencia de este libro son las fotografías grandes y detalladas de objetos concretos, la mayoría lo suficientemente pequeños como para tener en la palma de la mano. Cada objeto revela muchísima información sobre un aspecto en particular de los medios de la Tierra y de su funcionamiento. Por ejemplo, burbujas de aire atrapadas dentro de un núcleo de hielo antártico revelan cómo el clima de la Tierra ha cambiado con el tiempo. Un fragmento de piedra que fue arrojado varias millas al aire por un volcán ayuda a explicar qué sucede cuando las placas tectónicas chocan. El libro está estructurado en torno a un viaje imaginario que lleva al lector del centro a la superficie de la Tierra (incluidas la tierra y los océanos) y hasta las capas superiores de la atmósfera. A través de entornos como pastizales, bosques y arrecifes, 'Tierra' explora reinos vivos e inanimados. Las dobles páginas destacadas ponen el foco en lugares icónicos, como la selva amazónica o el Mar Muerto, o en procesos ecológicos concretos, como la erosión glacial. Muchos de los rincones más fascinantes del mundo natural nos resultan innaccesibles: este hermoso e informativo libro los pone a nuestro alcance. This is an informative, visually arresting introduction to planet Earth. The core of the book features large, detailed photographs of single objects, many of them small enough to be held in one hand, that each speak volumes about an aspect of Earth's environments and how they work. For example, bubbles of ancient air trapped inside an Antarctic ice core reveal how Earth's climate has changed over time. A piece of pumice thrown several miles into the air by a volcano helps explain what happens when tectonic plates collide. The book is structured around an imaginary journey that takes the reader from the inner core to Earth's surface (including both land and oceans) and up to the top of the atmosphere. Taking in environments such as grasslands, forests, and reefs, the coverage includes both living and inanimate realms. Feature spreads each throw a spotlight on an iconic place, such as the Amazon Rainforest or the Dead Sea, or a particular process, such as glacial erosion. Many of the most fascinating parts of the natural world are beyond reach. This beautiful, informative book brings them up close and within our grasp.

Profe, una pregunta Ruth Ibáñez Ámez,2018-09-10 Una mirada lúcida y honesta de lo que realmente ocurre en las aulas. Todos tenemos una opinión sobre los docentes: que si no están preparados, que si tienen muchas vacaciones, que si la manera de dar clases se ha quedado desfasada... Tanto quienes no han pisado una escuela desde los diecisiete años como los expertos en distintos ámbitos científicos y educativos parecen conocer las claves para una buena educación. ¿Y los maestros? ¿Qué piensan? ¿Cuáles son los problemas y los desafíos de su profesión? La autora comparte en este libro su visión de la profesión, desde la experiencia de más de veinte años y desde la humildad de quien reconoce tener más preguntas que respuestas: ¿qué cualidades definen a un buen docente? ¿Qué quiere decir la gente cuando dice Esa mujer es una maestra estupenda, Mi profesor de cuarto era maravilloso o Quiero ser un buen profesor? ¿Cómo se da una buena clase? El trabajo en el aula no es una ciencia exacta. ¿Por qué no preguntarle a alguien con años de experiencia docente?

Las tres letras de RÍO,2021-11-17 ¿Cómo estructurar el aprendizaje de sistemas?, ¿cómo favorecer el incremento en la complejidad de los modelos sobre el río de nuestros estudiantes? Son algunas de las cuestiones en las que hemos trabajado a lo largo de nuestra carrera profesional con alumnado de los distintos niveles educativos. Para responder a estas cuestiones, en este libro, se presentan fundamentos didácticos y ecológicos que se utilizan como base para el desarrollo de actividades en torno al río propuestas en el último capítulo. Éstas se estructuran buscando una progresión en la complejidad del modelo del río en los estudiantes.

Una montaña de mentiras Steffen Jacobsen, 2024-03-04 La famosa pareja policiaca, Lene Jensen y Michael Sander, vuelven en un caso globalmente relevante en la modernidad. Cuando el geólogo jefe de Nobel Oil, Peter Holm, termina de analizar las pruebas de perforación más recientes en la estación geológica groenlandesa, parece que la explotación más lucrativa de la historia se avecina. Todo el mundo, desde las autoridades groenlandesas hasta inversores en el extranjero, quieren participar en este proyecto. Sin embargo, poco después de que Holm regresara a Copenhague, su cadáver es encontrado con golpes mortales en su cabeza. A la subcomisaria Lene Jensen le asignan la investigación del asesinato de Holm. Al mismo tiempo, Nobel Oil contrata a Michael Sanders para encontrar al asesino y garantizar que los planes de la empresa puedan llevarse a cabo según lo previsto, lo que inicia una trepidante carrera contrarreloj. La extraña pareja de investigadores se verá obligada a colaborar en un caso que implica a una organización en defensa del medio ambiente y a un magnate de petróleo danés, para así poder destruir la montaña de mentiras que envuelven el caso. ¿Podrán Jensen y Sanders parar a estas peligrosas personas y organizaciones que no se detendrán hasta salirse con la suya y esconder la verdad del misterio? Tercera entrega de la serie Lene Jensen y Michael Sanders de Steffen Jacobsen. Steffen Jacobsen (1956) es un escritor danés que se especializa en el género de crimen y suspense. En 2008 publicó su primera novela, El pasajero, y en 2013 consiguió su primer gran éxito con La cacería, el primer título de una serie de novelas de suspense protagonizadas por la pareja de investigadores Michael Sander y Lene Jensen. Gracias a la popularidad de sus obras, las novelas de Jacobsen se publican en la mayor parte de Europa, EE.UU., Japón, China y Taiwán. Igualmente, se han vendido los derechos cinematográficos de sus novelas.
