The 32 full and 2 short papers presented in this volume were carefully reviewed and selected from 99 submissions. They were organized in topical sections named: fundamental theory and methods of computational linguistics; information retrieval, dialogue and question answering; text generation and summarization; knowledge graph and information extraction; machine translation and multilingual information processing; minority language information processing; language resource and evaluation; social computing and sentiment analysis; and NLP applications.

A History of Chinese Mathematics Jean-Claude Martzloff,2007-08-17 This book is made up of two parts, the first devoted to general, historical and cultural background, and the second to the development of each subdiscipline that together comprise Chinese mathematics. The book is uniquely accessible, both as a topical reference work, and also as an overview that can be read and reread at many levels of sophistication by both sinologists and mathematicians alike.

Chinese Lexical Semantics Minghui Dong,Jia-Fei Hong,Jingxia Lin,Peng Jin,2024-02-27 This book constitutes the refereed proceedings of the 24th Workshop on Chinese Lexical Semantics, CLSW 2023, held in Singapore, during May 19–21, 2023. The 61 full papers and 15 short papers included in this book were carefully reviewed and selected from 215 submissions. They are organized in the following topical sections: lexical semantics and related fields, including Theoretical Linguistics, Applied Linguistics, Computational Linguistics, Computational Lexicography, Phycological Linguistics, and Sociological linguistics.

Current Issues in Chinese Linguistics Hooi Ling Soh,Liang Tao,Yun Xiao,2011-07-12 Chinese is the most commonly spoken language in the world and one of the very few contemporary languages whose history is documented in an unbroken tradition extending back to the second millennium. Compared with Western languages, Chinese has a typology with distinguished features in sound system, syntax, and discourse that have a strong impact on Chinese linguistics studies and language learning. Drawing on theoretical models from formal and functional linguistics, discourse analysis, computer-assisted corpus studies, language socialization, and second language acquisition, this volume presents new advances and addresses a broad range of current issues in the study of Chinese linguistics with research studies that originated from the

proceedings of the 21st North American Conference on Chinese Linguistics (NACCL-21). As globalization presses on, more and more people are interested in Chinese – its history, structure, research, and new developments. This volume aims to be instrumental. Written in a coherent and structured style, each section is concentrated on a particular linguistic area, and each chapter is self-contained with a clear focus and theoretical framework. It will be valuable to linguists, educators, administrators, specialists, teachers and students of Chinese as a native, second, heritage, or foreign language.

The Handbook of Chinese Linguistics C. T. James Huang,Y. H. Audrey Li,Andrew Simpson,2018-03-20 The Handbook of Chinese Linguistics is the first comprehensive introduction to Chinese linguistics from the perspective of modern theoretical and formal linguistics. Containing twenty-five chapters, the book offers a balanced, accessible and thoughtfully organized introduction to some of the most important results of research into Chinese linguistics carried out by theoretical linguists during the last thirty years. Presenting critical overviews of a wide range of major topics, it is the first to meet the great demand for an overview volume on core areas of Chinese linguistics. Authoritative contributions describe and assess the major achievements and controversies of research undertaken in each area, and provide bibliographies for further reading. The contributors refer both to their own work in relevant fields, and objectively present a range of competitor theories and analyses, resulting in a volume that is fully comprehensive in its coverage of theoretical research into Chinese linguistics in recent years. This unique Handbook is suitable both as a primary reader for structured, taught courses on Chinese linguistics at university level, and for individual study by graduates and other professional linguists.

Knowledge Engineering and Management Yinglin Wang,Tianrui Li,2011-11-25 Proceedings of the Sixth International Conference on Intelligent System and Knowledge Engineering presents selected papers from the conference ISKE 2011, held

December 15-17 in Shanghai, China. This proceedings doesn't only examine original research and approaches in the broad areas of intelligent systems and knowledge engineering, but also present new methodologies and practices in intelligent computing paradigms. The book introduces the current scientific and technical advances in the fields of artificial intelligence, machine learning, pattern recognition, data mining, information retrieval, knowledge-based systems, knowledge representation and reasoning, multi-agent systems, natural-language processing, etc. Furthermore, new computing methodologies are presented, including cloud computing, service computing and pervasive computing with traditional intelligent methods. The proceedings will be beneficial for both researchers and practitioners who want to utilize intelligent methods in their specific research fields. Dr. Yinglin Wang is a professor at the Department of Computer Science and Engineering, Shanghai Jiao Tong University, China; Dr. Tianrui Li is a professor at the School of Information Science and Technology, Southwest Jiaotong University, China.

The Routledge Handbook of Chinese Discourse Analysis Chris Shei,2019-01-14 Chinese is a discourse-oriented language and the underlying mechanisms of the language involve encoding and decoding so the language can be correctly delivered and understood. To date, there has been a lack of consolidation at the discourse level such that a reference framework for understanding the language in a top-down fashion is still underdeveloped. The Routledge Handbook of Chinese Discourse Analysis is the first to showcase the latest research in the field of Chinese discourse analysis to consolidate existing findings, put the language in both theoretical and socio-functional perspectives, offer guidance and insights for further research and inspire innovative ideas for exploring the Chinese language in the discourse domain. The book is aimed at both students and scholars researching in the areas of Chinese linguistics and discourse analysis.

Norwegian Discourse Ellipsis Mari Nygård,2018-04-15 This book develops a grammar model which accounts for discourse ellipses in spoken Norwegian. This is a previously unexplored area, which has also been sparsely investigated internationally. The model takes an exoskeletal view, where lexical items are inserted late and where syntactic structure is generated independently of lexical items. Two major questions are addressed. Firstly, is there active syntactic structure in the ellipsis site? Secondly, how are discourse ellipses licensed? It is argued that both structural and semantic restrictions are

required to account for the empirical patterns. Discourse ellipses can be seen as a contextual adaptation. Ellipsis is only possible in certain contexts. The existence of ellipsis may lead to the impression that syntax is partly destroyed. However, the analysis shows that narrow syntax is not affected. The underlying structure stays intact, as the licensing restrictions concern only phonological realization. Hence, the grammar of discourse ellipses is best characterized as an interface phenomenon.

Thinking Chinese Translation Valerie Pellatt,Eric T. Liu,2010-06-10 Thinking Chinese Translation is a practical and comprehensive course for advanced undergraduates and postgraduate students of Chinese. Thinking Chinese Translation explores the ways in which memory, general knowledge, and creativity (summed up as 'schema') contribute to the linguistic ability necessary to create a good translation. The course develops the reader's ability to think deeply about the texts and to produce natural and accurate translations from Chinese into English. A wealth of relevant illustrative material is presented, taking the reader through a number of different genres and text types of increasing complexity including: technical, scientific and legal texts journalistic and informative texts literary and dramatic texts. Each chapter provides a discussion of the issues of a particular text type based on up-to-date scholarship, followed by practical translation exercises. The chapters can be read independently as research material, or in combination with the exercises. The issues discussed range from the fine detail of the text, such as punctuation, to the broader context of editing, packaging and publishing translations. Major aspects of teaching and learning translation, such as collaboration, are also covered. Thinking Chinese Translation is essential reading for advanced undergraduate and postgraduate students of Chinese and translation studies. The book will also appeal to a wide range of language students and tutors through the general discussion of the principles and purpose of translation.

Foreign Language Learning Alice F. Healy,Lyle E. Bourne, Jr.,2013-05-13 Based on a research project funded by the Army Research Institute, Foreign Language Learning reports original empirical and theoretical research on foreign language acquisition and makes recommendations about applications to foreign language instruction. The ultimate goal of this project was to identify a set of psychological principles that can provide the foundation for--or at least, argumentation for--a foreign language training course. This book reviews the various studies of which the project is comprised. It begins with an overview chapter outlining the scope of the project and summarizing some of the experiments that were conducted in the laboratory. In each of the following chapters, the contributors report on previously unpublished research on selected specific psycholinguistic training principles; vocabulary and concept acquisition; language comprehension; reading processes; and bilingualism. The final chapter--prepared by a prominent expert on second language training--provides an overview and evaluation of the contribution of the research described in earlier chapters to the goal of improving instructional methods in foreign language learning. Sandwiched between the introductory and final chapters are four major sections: * Vocabulary and Concept Acquisition, which discusses the effect of first-language phonological configuration on lexical acquisition in a second language, contextual inference effects in foreign language vocabulary acquisition and retention, mediated processes in foreign language vocabulary acquisition and retention, and the status of the count-mass distinction in a mental grammar; * Language Comprehension, which addresses voice communication between air traffic controllers and pilots who are nonnative speakers of English, cognitive strategies in discourse processing, and the effects of context and word order in Maasai sentence production and comprehension; * Reading Processes, which discusses the enhancement of text comprehension through highlighting, the effect of alphabet and fluency on unitization processes in reading, and reading proficiency of bilinguals in their first and second languages; and * Bilingualism, which addresses Stroop interference effects in bilinguals between similar and dissimilar languages, the individual differences in second language proficiency, and the hierarchical model of bilingual representation.

Accessing Noun-Phrase Antecedents Mira Ariel,2014-02-03 Accessing Noun-Phrase Antecedents offers a radical shift in the analysis of discourse anaphora, from a purely pragmatic account to a cognitive account, in terms of processing procedures. Mira Ariel defines referring expressions as markers signalling the degree of Accessibility in memory of the antecedent. The notion of Accessibility is explicitly defined, the crucial factors being the Salience of the antecedent, and the Unity between the antecedent and the anaphor. This analysis yields an astonishing array of new results. The precise distribution of referring expressions in actual discourse is directly predicted. Several universals of anaphoric relations are stated. Thus, although not all languages necessarily have the same markers, and nor do they assign them precisely the same

function, Ariel shows that they all obey the same Accessibility marking hierarchy. This book will be compulsory reading for anyone with an interest in the semantics and pragmatics of referring expressions, in the interaction of semantics and pragmatics, and more generally in the interaction between peripheral and central cognitive systems.

Linguistic Landscapes in South-East Asia Seyed Hadi Mirvahedi,2022-05-17 Anchored within current issues and debates in the field of Linguistic Landscape (LL) scholarship, this edited volume is concerned with politics of language and the semiotic construction of space in multilingual and multi-ethnic Asian countries. Spanning Malaysia, Singapore, Vietnam, Indonesia, the Philippines, Hong Kong, Taiwan and China, the chapters explore how different individuals and collectivities use semiotic resources in different spaces – schools, airports, streets and shops as well as online platforms – to reinforce or contest existing social structures, bearing strong implications for language maintenance and cultural revitalization, construction of ethnolinguistic and national identities, and socioeconomic mobility. Part I looks into how globalization and its accompanying forces and influences – such as the importance of English in socioeconomic mobility – come into contact with local Asian cultures and languages. Part II examines minority languages, demographically and socio-politically established in the countries, shedding light on the role of LL that plays in both their minorization and revitalization processes. Part III investigates how LL is utilized as a site for constructing identities to pursue socioeconomic, political and cultural goals. It is within this perspective that the presence and salience of English in the LL of the countries along with the use of the Asian languages is analyzed and understood, shedding light on how Asian heritage languages and cultures are preserved and/or certain identities in the times of political unrest or economic development are expressed. This fascinating insight into linguistic landscapes in Asia will be of interest to researchers, students and policy makers in sociolinguistics and applied linguistics anywhere in the world.
