An introduction to evolution Evolution helps us to understand the living world around us, as well as its history. Biological evolution is not simply a matter of change over time. **Evolution News - SciTechDaily** Aug 10, 2025 · Evolution is the scientific theory that explains how life on Earth has changed over time through processes such as natural selection, genetic drift, mutation, and gene flow. It describes the gradual development of species from common ancestors, shaping the incredible diversity of life seen today. *What is evolution? | Definition of evolution - YourGenome* In biology, evolution is the change in the characteristics of a species over several generations and relies on the process of natural selection. The theory of evolution is based on the idea that all species are related and gradually change over time. [Evolution | Learn Science at Scitable - Nature](#) Evolution is a process that results in changes in the genetic content of a population over time. There are two general classes of evolutionary change: microevolution and macroevolution. *How Evolution Works - HowStuffWorks* In this article, we will explore the theory of evolution and how it works. We will also examine several important areas that show holes in the current theory -- places where scientific research will be working in the coming years in order to complete the theory. *Evolution - Definition, Types, Advantages, Examples* Nov 13, 2024 · Evolution is the process by which species change over time through the gradual accumulation of genetic variations, driven by mechanisms like natural selection, genetic drift, and mutation, leading to the development of new traits or species. *Evolution - Wikipedia* The scientific theory of evolution by natural selection was conceived independently by two British naturalists, Charles Darwin and Alfred Russel Wallace, in the mid-19th century as an explanation for why organisms are adapted to their physical and biological environments.

EVOLUTION Definition & Meaning - Merriam-Webster Evolution is a process of continuous branching and diversification from common trunks. This pattern of irreversible separation gives life's history its basic directionality.

Evolution | Definition, History, Types, & Examples | Britannica Jul 31, 2025 · evolution, theory in biology postulating that the various types of plants, animals, and other living things on Earth have their origin in other preexisting types and that the distinguishable differences are due to modifications in successive generations. **Theory of Evolution - National Geographic Society** Oct 19, 2023 · Darwin and a scientific contemporary of his, Alfred Russel Wallace, proposed that evolution occurs because of a phenomenon called natural selection. In the theory of natural selection, organisms produce more offspring than are able to survive in their environment.
