Though the crisis started with the subprime mortgage sector in the US, its genesis can be traced to excessively loose monetary policy in the US during 2002-04. *Climate Change Science Facts - US EPA* Human causes include burning fossil fuels, cutting down forests, and developing land for farms, cities, and roads. These activities all release greenhouse gases into the atmosphere. *Climate Change: Evidence & Causes 2020 - Royal Society* The National Research Council, the operating arm of the National Academy of Sciences and the National Academy of Engineering, has issued numerous reports on the causes of and potential responses to climate change. *Deforestation and Forest Degradation: Concerns, Causes ...* Concern about deforestation has been focused primarily upon the tropics. In the past, this was motivated largely by concern about the potential for loss of the enormous biodiversity pos-sessed by tropical forests. **Causes, consequences, and solutions** This framework helps analyse problems by making the links between causes, effects and solutions.
