The US Pivot and Indian Foreign Policy H. Pant,Y. Joshi,2015-11-05 China's exponential rise and America's relative decline have led to a transition of power in contemporary Asia. The US pivot towards Asia is the most evident manifestation of such a transition, and Indian foreign policy shows signs of a hedging strategy, with attempts to strengthen ties with both China and the US.

**The Routledge Handbook of Language and Digital Communication** Alexandra Georgakopoulou,Tereza Spilioti,2015-07-16 The Routledge Handbook of Language and Digital Communication provides a comprehensive, state of the art overview of language-focused research on digital communication, taking stock and registering the latest trends that set the agenda for future developments in this thriving and fast moving field. The contributors are all leading figures or established authorities in their areas, covering a wide range of topics and concerns in the following seven sections: • Methods and Perspectives; • Language Resources, Genres, and Discourses; • Digital Literacies; • Digital Communication in Public; • Digital Selves and Online-Offline Lives; • Communities, Networks, Relationships; • New debates and Further directions. This volume showcases critical syntheses of the established literature on key topics and issues and, at the same time, reflects upon and engages with cutting edge research and new directions for study (as emerging within social media). A wide range of languages are represented, from Japanese, Greek, German and Scandinavian languages, to computer-mediated Arabic, Chinese and African languages. The Routledge Handbook of Language and Digital Communication will be an essential resource for advanced undergraduates, postgraduates and researchers within English language and linguistics, applied linguistics and media and communication studies.

Handbook on Wealth and the Super-Rich Iain Hay,Jonathan V Beaverstock,2016-01-29 Fewer than 100 people own and control more wealth than 50 per cent of the world's population. The Handbook on Wealth and the Super-Rich is a landmark multidisciplinary evaluation of both the lives and lifestyles of the super-rich, as well as the processes that underpin super-wealth generation and its unequal distribution. Drawing on international case studies, leading experts from across the social sciences offer 22 accessible and coherently organized chapters, which critically analyse a range of topics including: • the legitimacy of extreme wealth from a moral economic perspective • biographies of illicit super-wealth • London's housing markets • how the very wealthy fly • the environmental consequences of super-rich lives • crafting immigration policies to

attract the rich. Students and scholars studying a host of topics such as development studies, economics, geography, history, political science and sociology will find this book eminently engaging. It will also be of great interest to public commentators, charitable organizations and NGOs concerned with wealth and income distributions.

*Rankings and the Reshaping of Higher Education* Ellen Hazelkorn, 2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation. This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective, drawing in new original research and extensive analysis. It is essential reading for policymakers, managers and scholars.

**The Belt and Road Initiative at Ten** CICC Research, CICC Global Institute, 2024-08-27 This open access book analyzes the achievements and challenges of the Belt and Road Initiative (BRI) from the macro and industrial, real and financial, domestic and international perspectives, and explores the opportunities for future development and related public policy issues. It is a new research achievement of CICC Research and CICC Global Institute on major issues in China's new development stage. The year 2023 marks the tenth anniversary of the Belt and Road Initiative (BRI). Over the past decade, BRI has established more than 3,000 cooperation projects, galvanized nearly 1 trillion U.S. dollars of investment, created more than 420,000 jobs, and lifted nearly 40 million people out of poverty. BRI has made remarkable achievements in promoting connectivity and cooperative development between China and participating countries, and has been welcomed by the international community both as a public good and a cooperation platform. Compared with ten years ago, the global environment has undergone profound changes. COVID-19 epidemic has brought great impacts to the world, and the post-epidemic economic recovery is uneven, with some long-term scarring effects still emerging. New changes and constraints, such as geopolitical events, industry chain adjustment, and green transition, have also exerted far-reaching influences on the economic fundamentals and global governance. Under the new situation, international cooperation mechanisms, including BRI, are facing new problems and challenges, which need to be explored and solved in practice. This book is both academically rigorous and readable, and provides valuable references for public policy departments, enterprises, and financial institutions who seek to better understand the macro, financial and industrial trends of BRI.

**Bad for You** Kevin C. Pyle, Scott Cunningham, 2014-01-07 SHOULD U.S. COMICS BE BANNED? SATANIC HARRY POTTER BOOKS BURNT PLAYGROUNDS POSE THREAT TO CHILDREN TEXT-MAD YOUTH LOSING WRITING ABILITIES CHILD SUSPENDED FOR BRANDISHING CHICKEN SOCIAL WEBSITES HARM CHILDREN'S BRAINS STUDENT ARRESTED FOR PASSING GAS AT SCHOOL These are all real headlines screaming about the terrible stuff that's out there . . . stuff that's supposed to be BAD FOR YOU. But, honestly—is it?! *Bad for You* asks this question and many more—and not just about the things that modern parents fear like violent video games, social media, and dirty hands. Stuff in this book goes back centuries—all the way to Plato (yeah, that one) and his worries over the new technology of his time: the written word!

Kevin C. Pyle and Scott Cunningham cleverly expose the long-standing CAMPAIGN AGAINST FUN for what it really is: a bunch of anxious adults grasping at straws, ignoring scientific data, and blindly yearning for the good old days that never were. *Bad for You* presents the facts, figures, and a whole lot more—in eye-grabbing graphics—to debunk these myths and give kids the power to prove there's nothing wrong with having fun . . . or with being young.

*The Economics of Sustainable Transformation* Anna Szelągowska, Aneta Pluta-Zaremba, 2021-10-19 This book presents the ways in which three key issues of the modern world – transformation, digitalisation and sustainability – may be combined for the greater good and highlights which activities may be designed to integrate these three directly linked paths. It is an experience-derived and evidence-based analysis of how sustainable development impacts the transformation of the economy and how the business environment influences economic transformation in the light of the sustainable development principles. The book addresses the current challenges and shows how the economy can be transformed further in an organic way that meets the needs of society and the environment, through the use of digital technologies. The multidisciplinary approach to sustainability transformation is one of the core strengths of the book, as it emphasises the need for a holistic approach to the functioning of sustainable development ideas at the micro- and macro-levels. The authors present a fresh perspective, particularly around the regulations stimulating the sustainable development of enterprises, tax systems, and the allocation of capital. Moreover, the book brings together and makes available the results of the latest research on the subject, using a vast amount of primary evidence and both quantitative and qualitative methodology. The authors' insights go beyond the obvious effects of economic transformation and call attention to ways in which smart technology and digitalisation may help to achieve the Sustainable Development Goals. The book is directed first and foremost towards academics, researchers and students, but also professionals, who would like to expand their knowledge of sustainable development from a scientific perspective. Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

**Twenty-First Century Inequality & Capitalism: Piketty, Marx and Beyond**, 2018-01-03 *Twenty-First Century Inequality & Capitalism: Piketty, Marx and Beyond* is a collection that begins with economist Thomas Piketty's 2014 book. Most chapters critique Piketty from the perspective of critical theory, global political economy or public sociology, drawing on the work of Karl Marx or the Marxist tradition. The emphasis focuses on elements that are under-theorized or omitted entirely from the economists' analysis. This includes the importance of considering class and labor dynamics, the recent rise of finance capitalism, insights from feminism, demography, and conflict studies, the Frankfurt School, the world market and the world-system, the rise of a transnational capitalist class, the coming environmental catastrophe, etc. Our goal is to fully understand and suggest action to address today's capitalist inequality crisis. Contributors are: Robert J. Antonio, J.I. (Hans) Bakker, Roslyn Wallach Bologh, Alessandro Bonanno, Christopher Chase-Dunn, Harry F. Dahms, Eoin Flaherty, Daniel Krier,

Basak Kus, Lauren Langman, Dana Marie Louie, Peter Marcuse, Sandor Nagy, Charles Reitz, William I. Robinson, Saskia Sassen, David A. Smith, David N. Smith, Tony Smith, Michael Thompson, Sylvia Walby, Erik Olin Wright.

*Biohacked* Brandon J. Weichert, 2023-05-16 When COVID-19 erupted from Wuhan, China under mysterious circumstances, the Communist Party of China covered up its existence for as long as possible. It is now apparent that there is more to COVID than what the authorities wish for us to know. *Biohacked: China's Race to Control Life* details the decades-long pursuit by the Chinese Communists to dominate the biotechnology industry—to control the very building blocks of life on Earth—to further their political control at home and their supremacy abroad. More appalling than the egregious cover-up that China's rulers engaged in with COVID-19 is the fact that Western scientists, pharmaceutical companies, and research labs have contributed to China's rapid (and dangerous) growth in the biotech industry—so much so that China, not the United States, may become the seat of the biotechnology industry. The Chinese leadership believes that biotechnology is a critical industry for the Communist Party to achieve its “China Dream” of becoming the world's dominant superpower by 2049. In China's biotech sector, truly macabre practices are being developed, from ambitious cloning programs to the creation of potential pathogens that China's military plans to use in “specific genetic attacks” against Beijing's growing list of political enemies. To stop the threat, author Brandon J. Weichert proposes the world's nations create a comprehensive set of treaties for regulating biotechnology research and development. Further, Weichert calls for Washington to slow the transfer of advanced biotechnology knowledge and funding from the United States to China using means like the Foreign Corrupt Practices Act and the Committee on Foreign Investment in the United States (CFIUS). Unless an all-of-government (and society) approach is taken to curbing irresponsible biotech development in China, then another—deadlier—COVID-19-like pandemic could be at hand.

**Management and Regulation of Pension Schemes** Nicholas Morris, 2018-03-19 Perhaps the greatest long-term challenge facing modern economies is how to pay for the living expenses and care costs of the elderly. Following policy decisions made in Australia in the 1990s, a substantial part of the pension requirements of the next cohort of retirees will be met from savings accumulated during working years. The effective management of these savings is crucial. If they are invested wisely, the assets available to fund pensions and care will grow; if not, available funds may turn out to be insufficient. Unfortunately, there is considerable evidence worldwide that the management of funds attracts rent-seeking behaviour by the financial services industry which erodes much of the potential return. Australia introduced compulsory superannuation contributions for its working population in 1991, leading to a proliferation of funded schemes that are largely run by the private sector. Complexity, and many degrees of separation between fund members and those who manage their funds, have emerged as serious problems. Combined with weak competitive pressures and governance systems, and insufficient legal and regulatory constraints, the result is a system that does not serve its members well. This book provides a

detailed evaluation of the Australian experience, highlights the extent to which the financial services industry has extracted rents from Australian pensioners, and how and why this occurred. Based on original empirical research, and examination of industry reviews and relevant literature, the book demonstrates the numerous principal-agent, conflict of interest and rent extraction problems that have emerged in Australia. The book makes suggestions for how these problems can be addressed in Australia, and also provides lessons for other countries wishing to enact pension reform.

**Interactions Between Iranian and American Literatures** Naghmeh Esmaeilpour, 2024-05-14 Introducing narrative mobility as a new approach in comparative studies of Iran and the US, this book reinterprets the politics and aesthetics of relations between the nations through an analysis of Iranian and American authors. The book focuses specifically on three authors—Simin Daneshvar, Shahriar Mandanipour, and Don DeLillo—who each employ narrative mobility to rethink intercultural negotiation, addressing parallel issues in America and Iran from different, but complementary, perspectives. The book analyzes the employment of parallel narrational techniques, presenting physically and virtually mobile characters who embody their respective countries as they move from one culture to another. The strange affinity between Iran and the US is ultimately revealed by viewing literary works as a contact zone through which the complicated relations and shared history of the two nations can be renegotiated. On a more theoretical level, the book reflects on the role of literature—in particular the novel as a transnational medium—as a bridge between nations in a period of globalization. With its focus on cross-cultural connections, the book will be of interest to anyone studying or researching comparative literature, US-Iran relations, and cultural studies generally.

*Social Issues in Sport* Ron Woods, B. Nalani Butler, 2020 *Social Issues in Sport*, Fourth Edition, explores common questions and issues about sport and its relation to society through various sociological and cultural lenses. The text is grounded in practical application and provides social theories through which students may examine real-world issues.

**Jacqueline Wilson** Lucy Pearson, 2015-11-23 Over the last 20 years, Jacqueline Wilson has published well over 100 titles and has become firmly established in the landscape of Children's Literature. She has written for all ages, from picture books for young readers to young adult fiction and tackles a wide variety of controversial topics, such as child abuse, mental illness and bereavement. Although she has received some criticism for presenting difficult and seemingly 'adult' topics to children, she remains overwhelmingly popular among her audience and has won numerous prizes selected by children, such as the Smarties Book Prize. This collection of newly commissioned essays explores Wilson's literature from all angles. The essays cover not only the content and themes of Wilson's writing, but also her success as a publishing phenomenon and the branding of her books. Issues of gender roles and child/carer relationships are examined alongside Wilson's writing style and use of techniques such as the unreliable narrator. The book also features an interview with Jacqueline Wilson herself, where

she discusses the challenges of writing social realism for young readers and how her writing has changed over her lengthy career.

A Wilkie Collins Songbook Allan W. Atlas, 2023 A Wilkie Collins Songbook consists of twenty-seven “everyday pieces” (three of them in two different versions each) that either appear in the novels and short stories of the Victorian author Wilkie Collins (1824–89) or were inspired by them. There is an overture for a stage production on which Collins collaborated with Charles Dickens; a number of pieces that reflect the popularity of *The Woman in White* (1860), which rocketed Collins to superstardom; and, forming the heart of the anthology, twenty ballads, patriotic songs, and traditional tunes that would have been well known to Collins’s English (and American) readers. Among the twenty-two composers represented are: Francesco Berger (a regular at Dickens’s Sunday-evening card games); the prolific Walter Burnot, whose business card read “Songs Written While You Wait”; Charles Dibdin, and John Davy, as well as four women: Frances Arkwright, Clara Angela Macirone, Virtue Millard, and the mysterious American called “The Veiled Lady.” In all, the songbook provides an informative and entertaining romp through the everyday music of “Wilkie’s World.”

*Intensified Sediment Disasters in Japan* Ryoichi Fukagawa, 2023-11-29 The 2011 Kii Peninsula disaster was postwar Japan’s largest sediment and flood disaster. This book analyzes the disaster and the emergency response and subsequent disaster-prevention efforts. It also provides an international comparison and recommendations for mitigation and recovery efforts. Although the scale and intensity of the disaster were expected to occur just once every 100 years, global warming has seen the intensification of such disasters around the globe. This book therefore presents an invaluable in-depth reference for readers on how to prepare for such a disaster, identify risk factors, and react accordingly. Contributors draw on the results of field surveys conducted by the Japanese Geotechnical Society at the time of the disaster and subsequent developments. First, they explain the factors that contributed to the disaster, including the meteorological, topographical, and geological conditions at the time of the disaster. They then describe the mechanisms of slope failure and damage caused by the slope failures across Nara, Wakayama, and Mie prefectures. Finally, they describe the post-disaster response, including the recovery and reconstruction and disaster-prevention and mitigation efforts in the affected area. Readers will therefore understand the importance of the contributing factors and be able to improve disaster mitigation strategies and response plans that will save lives and prevent damage to local infrastructure and economies. This book is an invaluable resource for researchers, geologists, practicing engineers, and government officials who are involved in disaster prevention and response. Upper undergraduate and graduate students will also benefit from the book’s in-depth approach.
