The American Language Henry Louis Mencken,1921

The American Language H. L. Mencken,2021-05-21 The American Language is a multi-volume study of how the English language is spoken in the United States. The book is Menken's research of the differences between English and American language. Mencken wanted to defend Americanisms against a steady stream of English critics, who usually isolated Americanisms as borderline perversions of the mother tongue. The book discusses the beginnings of American variations from English, the spread of these variations, American names and slang. According to Mencken, American English was more colorful, vivid, and creative than its British counterpart. The book concludes with the observation in the norms of use of the proper names in America, including surnames, given names, geographical names, Menken's analysis on the American slang, and forecast on the further language development.

Transforming Innovations in Africa Jan-Bart Gewald,André Leliveld,Iva Peša,2012-11-21 Africa abounds with examples of material and immaterial innovations that were envisaged, developed and designed elsewhere yet came to be innovatively and sometimes unexpectedly transformed in Africa. The authors in this volume explore how external innovations (products, technologies, services, institutions and processes) have been appropriated in African societies in order to be acceptable and relevant to local conditions, expectations and demands. Written from different disciplinary perspectives, the chapters demonstrate the depth and richness of innovation in Africa with, in some cases, surprising outcomes. The case studies presented are on subjects as diverse as the wine industry, trading stores, land reforms, washing powder, M-Pesa, cassava, weddings, international borders, guest houses, urban water supply, car technology, shallow wells, and railways and

blacksmithing.

[Post-Colonial Realism](#) Hanna Samir Kassab,2025-08-22 In Post-Colonial Realism, Hanna Samir Kassab develops a theoretical framework to explain, understand, and predict international conflict, placing culture at the center of international political analysis. Kassab contends that nationalism, a belief system, forms an intervening variable that shapes the foreign

policy behavior of states. Studying food is central to understanding nationalist belief systems that shape international politics. By combining theories of nationalism with post-colonialist understandings of cultural revitalization, Kassab conceptualizes state motivation to understand how cultural symbols shape nationalist identities, to see the fault lines of civilization through food, and to appreciate the centrality of identity issues. Using ethnography to understand food ownership as part of nationalist conflict, Kassab examines neighboring states (Greece, North Macedonia, Turkey and Armenia) alongside India. In each country study chapter, he compares at least two nationalisms and views of cuisine ownership. He later maps out potential future flashpoints as the international system becomes increasingly competitive due to the changing structure of the international system: unipolarity to multipolarity. Post-Colonial Realism offers a more robust and flexible theory of international relations, concentrating not on abstractions but on individuals and their collective beliefs.
