Genghis Khan and Mongol Rule George Lane, 2009-01-01 Spawning an empire ranging from Persia to China, Genghis Khan united a nomadic warrior culture that had lived with their agrarian neighbors through controlled and limited extortion. This accessible book provides an introduction to the history and culture of the Steppe people from which Genghis Khan emerged, and chronicles the events that led to his being named the Great Khan. Also included are sixteen biographical sketches, a wealth of annotated primary documents, five maps, an annotated timeline, a glossary, an annotated bibliography and several illustrations.

The Mongol Empire Timothy May, 2016-11-07 Covering the rise and fall of the Mongol Empire, this essential reference presents the figures, places, and events that led this once-beleaguered region to rise up to become the largest contiguous empire in history. In the 13th century, Chinggis Khan rose to power, leading an empire of a million people and defeating surrounding regions with much larger populations. This compendium follows the achievements—and failures—of the Mongol Empire from the birth of Chinggis Khan in 1162 to the formation of the successor states that came from the dissolution of the world power in the 16th century: the Yuan Empire in East Asia; the Chaghatai Khanate in Central Asia; the Ilkhanate in the Middle East; and the Jochid or Kipchak Khanate in the Pontic-Caspian Steppes, known as the Golden Horde. Through some 180 entries, this two-volume set covers every aspect of Mongol civilization, organizing content into eight sections: government and politics, organization and administration, individuals, groups and organizations, key events, military, objects and artifacts, and key places. Each section is accompanied by an essay introducing the topic in the context of the Mongol Empire. The work also includes a chronology, a number of annotated primary documents, and a bibliography.

Disease and the Environment in the Medieval and Early Modern Worlds Lori Jones, 2022-06-07 This volume brings together environmental and human perspectives, engages with both historians and scientists, and, being mindful that environments and disease recognize no boundaries, includes studies that touch on Europe, the wider Mediterranean world,

Asia, Africa, and the Americas. *Disease and the Environment in the Medieval and Early Modern Worlds* explores the intertwined relationships between humans, the natural and manmade environments, and disease. Urgency gives us a sense that we need a longer view of human responses and interactions with the airs, waters, and places in which we live, and a greater understanding of the activities and attitudes that have led us to the present. Through a series of new research studies, two salient questions are explored: What are the deeper patterns in thinking about disease and the environment? What can we know about the environmental and ecological parameters of emergent human diseases over a longer period – aspects of disease that contemporary persons were not able to know or understand in the way that we do today? The broad chronological and geographical approach makes this volume perfect for students and scholars interested in the history of disease, environment, and landscape in the medieval and early modern worlds.

Writing Plague Alfred Thomas, 2022-04-22 *Writing Plague: Language and Violence from the Black Death to COVID-19* brings a holistic and comparative perspective to “plague writing” from the later Middle Ages to the twenty-first century. It argues that while the human “hardware” has changed enormously between the medieval past and the present (urbanization, technology, mass warfare, and advances in medical science), the human “software” (emotional and psychological reactions to the shock of pandemic) has remained remarkably similar across time. Through close readings of works by medieval writers like Guillaume de Machaut, Giovanni Boccaccio, and Geoffrey Chaucer in the fourteenth century, select plays by Shakespeare, and modern “plague” fiction and film, Alfred Thomas convincingly demonstrates psychological continuities between the Black Death and COVID-19. In showing how in times of plague human beings repress their fears and fantasies and displace them onto the threatening “other,” Thomas highlights the danger of scapegoating vulnerable minority groups such as Asian Americans and Jews in today’s America. This wide-ranging study will thus be of interest not only to medievalists but also to students of modernity as well as the general reader.

The Routledge Handbook of Muslim-Jewish Relations Josef Meri, 2016-06-23 *The Routledge Handbook of Muslim-Jewish Relations* invites readers to deepen their understanding of the historical, social, cultural, and political themes that impact modern-day perceptions of interfaith dialogue. The volume is designed to illuminate positive encounters between Muslims and Jews, as well as points of conflict, within a historical framework. Among other goals, the volume seeks to correct common misperceptions about the history of Muslim-Jewish relations by complicating familiar political narratives to include dynamics such as the cross-influence of literary and intellectual traditions. Reflecting unique and original collaborations between internationally-renowned contributors, the book is intended to spark further collaborative and constructive conversation and scholarship in the academy and beyond.

Political Conflict in Pakistan Mohammad Waseem, 2022-04-01 This book is a major reinterpretation of politics in Pakistan. Its focus is conflict among groups, communities, classes, ideologies and institutions, which has shaped the country's political dynamics. Mohammad Waseem critically examines the theory surrounding the millennium-long conflict between Hindus and Muslims as separate nations who practiced mingled faiths, and the Hindu, Muslim and Sikh renaissances that created a twentieth-century clash of communities and led to partition. Political Conflict in Pakistan addresses multiple clashes: between the high culture as a mission to transform society, and the low culture of the land and the people; between those committed to the establishment's institutional constitutional framework and those seeking to dismantle the colonial state; between the corrupt and those seeking to hold them to account; between the political class and the middle class; and between civil and military power. The author exposes how the ruling elite centralised power through the militarisation and judicialization of politics, rendering the federalist arrangement an empty shell and thus grossly alienating the provinces. He sets all this within the contexts of education and media as breeders of conflict, the difficulties of establishing an anti-terrorist regime, and the state's pragmatic attempts at conflict resolution by seeking to keep the outsiders inside. This is a wide-ranging account of a country of contestations.

Marco Polo Marco Tabilio, 2017-08-01 The son of a traveling merchant, Marco Polo spent his early years among the ports of Venice, Italy. As a young man, he headed eastward with his father and his uncle toward the lands of the Mongol emperor Kublai Khan. Their journey from Europe into Asia, marked by risks, setbacks, and discoveries, transformed every person involved. It also led to one of the world's most studied and most debated travelogues. Marco Tabilio, an emerging talent of Italian cartooning, creates a graphic novel in the form of a puzzle and finds the coming-of-age tale within the legend of Marco Polo.

Islam in Global History: Volume One Dr. Nazeer Ahmed, 2001-07-10 With the scope of a philosopher and the precision of a scientist, Dr. Ahmed takes us on a journey through the labyrinth of Islamic history offering unique insights into its own internal dialectic as well as its interactions with Western civilization. Merits of the Plague Ibn Hajar al-Asqalani, 2023-03-07 The preeminent meditation on plagues and pandemics from the Islamic world, now in English for the first time A Penguin Classic Six hundred years ago, the author of this landmark work of history and religious thought—an esteemed judge, poet, and scholar in Cairo—survived the bubonic plague, which took the lives of three of his children, not to mention tens of millions of others throughout the medieval world. Holding up an eerie mirror to our own time, he reflects on the origins of plagues—from those of the Prophet Muhammad’s era to the Black Death of his own—and what it means that such catastrophes could have been willed by God, while also chronicling the fear, isolation, scapegoating, economic tumult, political failures, and crises of faith that he lived through. But in considering the meaning of suffering and mass death, he also offers a message of radical hope. Weaving together accounts of evil jinn, religious stories, medical manuals, death-count registers, poetry, and the author’s personal anecdotes, *Merits of the Plague* is a profound reminder that with tragedy comes one of the noblest expressions of our humanity: the practice of compassion, patience, and care for those around us. For more than seventy-five years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 2,000 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

A History of Southeast Asia Anthony Reid, 2015-03-03 2016 PROSE Award Honorable Mention for Textbook in the Humanities *A History of Southeast Asia: Critical Crossroads* presents a comprehensive history of Southeast Asia from our earliest knowledge of its civilizations and religious patterns up to the present day. Incorporates environmental, social, economic, and gender issues to tell a multi-dimensional story of Southeast Asian history from earliest times to the present Argues that while the region remains a highly diverse mix of religions, ethnicities, and political systems, it demands more attention for how it manages such diversity while being receptive to new ideas and technologies Demonstrates how Southeast Asia can offer alternatives to state-centric models of history more broadly Part of The Blackwell History of the

World Series The goal of this ambitious series is to provide an accessible source of knowledge about the entire human past, for every curious person in every part of the world. It will comprise some two dozen volumes, of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time. The volumes are narrative in form, giving balanced attention to social and cultural history (in the broadest sense) as well as to institutional development and political change. Each provides a systematic account of a very large subject, but they are also both imaginative and interpretative. The Series is intended to be accessible to the widest possible readership, and the accessibility of its volumes is matched by the style of presentation and production.

Death and Disease in the Medieval and Early Modern World Lori Jones, Nükhet Varlık, 2022 This collection highlights and nuances some of the recent critical advances in scholarship on death and disease, across and beyond the pre-modern Mediterranean world, Christian, Islamic and Jewish healing traditions. Across and beyond the pre-modern Mediterranean world, Christian, Islamic and Jewish healing traditions shared inherited medical paradigms containing similar healthy living precepts and attitudes toward body, illness and mortality. Yet, as the chapters collected here demonstrate, customs of diagnosing, explaining and coping with disease and death often diverged with respect to knowledge and practice. Offering a variety of disciplinary approaches to a broad selection of material emerging from England to the Persian Gulf, the volume reaches across conventional disciplinary and historiographical boundaries. Plague diagnoses in pre-Black Death Arabic medical texts, rare, illustrated phlebotomy instructions for plague patients, and a Jewish plague tract utilising the Torah as medicine reflect critical re-examinations of primary sources long thought to have nothing new to offer. Novel re-interpretations of Giovanni Villani's *New Chronicle*, canonisation inquests and saints' lives offer fresh considerations of medieval constructions of epidemics, disabilities, and the interplay between secular and spiritual healing. Cross-disciplinary perspectives recast late medieval post-mortem diagnoses in Milan as a juridical - rather than strictly medical - practice, highlight the aural performativity of the Franciscan deathbed liturgy, explore the long evolution of lapidary treatments for paediatric and obstetric diseases and thrust us into the Ottoman polychromatic sensory world of disease and death. Finally, considerations of the contributions of modern science alongside historical primary sources generates important new ways to understand death and disease in the past. Overall, the contributions juxtapose and interlace similarities and differences in their local and historical contexts, while highlighting and nuancing some of the recent critical advances in scholarship on death and disease - two historiographical subfields long approached separately. e-examinations of primary sources long thought to have nothing new to offer. Marco Polo and His World Sharon Kinoshita, 2024-10-13 A lavishly illustrated tour of the famed adventurer's globetrotting travels, written by a celebrated translator of Polo's writings. At the age of seventeen, Marco Polo left his Venetian home on a continent-spanning adventure that lasted for nearly a quarter century. Imprisoned in Genoa five years later, he collaborated with Arthurian romance writer Rustichello of Pisa on a work they called *The Description of the World*. That book recounted "all the greatest marvels and great diversities of Greater Armenia, Persia, the Tartars, India, and many other provinces," a story that made Polo famous for all time. In *Marco Polo and His World*, Sharon Kinoshita brings these marvels to life, describing the myriad commodities, plants, people, and animals that Marco encountered and recorded. Copiously illustrated, this book offers a vibrant introduction to Marco Polo's astounding adventures.

The West and the Philippines (1521-1857): a parallel history Rhett G. Daza, Bernard Karganilla, 2025-03-11 A walk through Western history as seen from the perspective of the Philippines - its most distant colony. European history filtered through Spain brought religious transformation, world trade, the rise of capitalism, the industrial revolution and the challenges of a nation-state to the islands. Later, under the United States, a world war, would impact the Philippines and its future. The country would have its own unique response and contribution to all these challenges coming from the West. Understanding the historical dynamic provides a context to make sense of the Philippine present.
