Teoría de la literatura José Domínguez Caparrós, 2002-06-28 Este manual se organiza en dos grandes partes: una sistemática, que a su vez se divide en otras. En la primera se trata de la definición de la literatura y de las disciplinas que la tienen como objeto de estudio; y en la otra se hace una presentación de las cuestiones referidas a los géneros literarios. La segunda parte trata de la historia de la teoría del siglo XX, organizada en tres bloques: formalismos, estilística y teorías de la lengua literaria, corrientes que van más allá del texto.

Teoría de la literatura de ciencia ficción Fernando Ángel Moreno, 2015-04-01 Pocos géneros literarios han tenido tanta influencia en el diseño, la arquitectura, la moda, la ingeniería, el arte, la música, el cine o la literatura de nuestro tiempo como lo ha hecho la ciencia ficción. La historia de los dos últimos siglos difícilmente se comprende sin ella y su capacidad de reflexión y crítica y su habilidad para conjurar imágenes impactantes y marcar tendencias. Teniendo en cuenta que hace décadas que ha despertado el interés de los teóricos, investigadores y ensayistas de todo el mundo, parece un poco paradójica la escasez de estudios científicos en castellano que aborden la ciencia ficción en su conjunto desde la seriedad y el rigor académicos. ¿Qué es y qué no es ciencia ficción? ¿Cuáles son sus subgéneros y cuáles pueden interesar más a cada lector? ¿Se escribe buena ciencia ficción en castellano? ¿Quiénes son los escritores más importantes y a qué obras acudir primero? Fernando Ángel Moreno aborda aquí todas estas cuestiones, además de analizar los principales tropos y técnicas narrativas de la ciencia ficción, mostrar su evolución a lo largo de la historia, su relación y diferencias con otros géneros literarios cercanos y, en general, ofrecer un panorama amplio y explorado en detalle de la ciencia ficción literaria.

and geographic lines, it offers a comprehensive and critical account of the current state of knowledge and of international research. The Encyclopedia (1) offers an overview of the different types and branches of translation studies; (2) covers translation phenomena - including the entire range of interlingual, intralingual, and intersemiotic transfer and transformation - in their social, material, linguistic, intellectual, and cultural diversity from diachronic, synchronic, and systematic perspectives, (3) documents and elucidates the most important results of the study of translation to the present day, as well as the current debates, taking into account theoretical assumptions and methodological implications; (4) identifies, where possible, lacunae in existing research, listing priorities and desiderata for further research. The languages of publication are German, English, and French

Colonial Ideology and the classical 'Bildungsroman' José Santiago Fernández-Vázquez,2024-05-16 This book examines the ideological affinity that can be established between the classical 'Bildungsroman' and colonialist ideology on the basis of a literary analysis of 'Wilhelm Meisters Lehrjahre'—considered by most critics to be the origin of the genre—and 'Great Expectations'—one of the paradigmatic examples of the development of the Bildungsroman in English literature. This ideological affinity is understood as an example of what the Palestinian critic Edward Said has called a 'structure of attitude and reference': the convergence of different cultural manifestations that, although formally independent, contribute to a common purpose. The monograph also undertakes a study of the main characteristics of the classical 'Bildungsroman' from a formal and thematic point of view, and an analysis of the relationship between genre theories and Eurocentric discourses.

Rethinking Philosophy with Borges, Zambrano, Paz, and Plato Hugo Moreno,2022-02-16 In Rethinking Philosophy with Borges, Zambrano, Paz, and Plato, Hugo Moreno argues that in *Ficciones*, *Claros del bosque*, and *El mono gramático*, Jorge Luis Borges, María Zambrano, and Octavio Paz practice a literary way of philosophizing—a way of seeking and communicating knowledge of reality that takes up analogical procedures. They deploy analogy as an indispensable and irreplaceable heuristic tool and literary device to convey their insight and perplexities on the nature of existence. Borges' ironic approach involves reading and writing philosophy as fiction. Zambrano's poetic reason is a mode of writing and thinking based on an imaginative sort of recollection that is ultimately a visionary's poetizing technique. Paz's poetic thinking relies on analogy to correlate and harmonize an array of worldviews, ideas, and discourses. In the appendix, Moreno shows that Plato's *Republic* is a forerunner of this way of philosophizing in literature. Moreno suggests that in the *Republic*, Plato reconciles philosophy and poetry and creates a rational prose poetry that fuses argumentation and narration, dialectical and analogical reasoning, and abstract concepts and poetic images.

Short Story Theories ,2015-06-29 Short Story Theories: A Twenty-First-Century Perspective problematizes different aspects of the renewal and development of the short story. The aim of this collection is to explore the most recent theoretical

issues raised by the short story as a genre and to offer theoretical and practical perspectives on the form. Centering as it does on specific authors and on the wider implications of short story poetics, this collection presents a new series of essays that both reinterpret canonical writers of the genre and advance new critical insights on the most recent trends and contemporary authors. Theorizations about genre reflect on different aspects of the short story from a multiplicity of perspectives and take the form of historical and aesthetic considerations, gender-centered accounts, and examinations that attend to reader-response theory, cognitive patterns, sociolinguistics, discourse analysis, postcolonial studies, postmodern techniques, and contemporary uses of minimalist forms. Looking ahead, this collection traces the evolution of the short story from Chaucer through the Romantic writings of Poe to the postmodern developments and into the twenty-first century. This volume will prove of interest to scholars and graduate students working in the fields of the short story and of literature in general. In addition, the readability and analytical transparency of these essays make them accessible to a more general readership interested in fiction.

The Biography of "the Idea of Literature" Adrian Marino, 1996-12-12 A comprehensive examination of the meaning, history, and evolution of the basic notion of literature from antiquity to the seventeenth century.

Talk and Text Angela Downing Rothwell, A. Jesús Moya Guijarro, José Ignacio Albentosa Hernández, Joaquín Garrido, Eija Ventola, Tomás González, Raquel Hidalgo, 2000 This book reviews some current theories about the internal organization of written and oral discourse. The articles range from the theoretical to the highly practical, from the cognitive frameworks which make coherence in oral conversation to the structural and linguistic devices which create textuality in written language. Contextual issues such as ideology, topicality and topic management, thematicity and academic discourse are explored via a contemporary and authentic sample of written fragments and oral corpora. This accessible book will be useful to advanced undergraduate and postgraduate students and to teachers interested in Language and Linguistics.

Hypermedia Courseware: Structures of Communication and Intelligent Help Armando Oliveira, 2012-12-06 This book is based on the NATO Advanced Research Workshop on Structures of Communication and Intelligent Help for Hypermedia Courseware, which was held at Espinho, Portugal, April 19-24, 1990. The texts included here should not be regarded as untouched proceedings of this meeting, but as the result of the reflections which took place there and which led the authors to revise their texts in that light. The Espinho ARW was itself to some extent the continuation of the ARW on Designing Hypermedia/Hypertext for Learning, held in Germany in 1989 (D. H. Jonassen, H. Mandl (eds.): Designing Hypermedia for Learning. NATO ASI Series F, Vol. 67. Springer 1990). At that meeting an essential conclusion became

apparent: the importance and interest of hyper media products as potential pedagogical tools. It was then already predictable that the enormous evolution of hypermedia would lead to its association with multimedia technologies, namely for the production of courseware. Parallel to the improvement of the didactic potential and quality which results from this association, it nevertheless brought along a natural array of difficulties, some old, some new, in the conception and use of hypermedia products. Today there is agreement that one of the most promising technological advances for education is represented by the use of text, sound and images based on nonlinear techniques of information handling and searching of hypermedia architectures. The problem of hypermedia is fundamentally one of communication; this leads to an attempt at defining a language for hypermedia.
