The Education System in Mexico David Scott,C.M. Posner,Chris Martin,Elsa Guzman,2018-03-15 Over the last three decades, a significant amount of research has sought to relate educational institutions, policies, practices and reforms to social structures and agencies. A number of models have been developed that have become the basis for attempting to understand the complex relation between education and society. At the same time, national and international bodies tasked with improving educational performances seem to be writing in a void, in that there is no rigorous theory guiding their work, and their documents exhibit few references to groups, institutions and forces that can impede or promote their programmes and projects. As a result, the recommendations these bodies provide to their clients display little to no comprehension of how and under what conditions the recommendations can be put into effect. The Education System in Mexico directly addresses this problem. By combining abstract insights with the practicalities of educational reforms, policies, practices and their social antecedents, it offers a long overdue reflection of the history, effects and significance of the Mexican educational system, as well as presenting a more cogent understanding of the relationship between educational institutions and social forces in Mexico and around the world.

Mexico 2025 , As Mexico navigates a pivotal period of geopolitical realignment and economic opportunity, The Business Year: Mexico 2025, spanning over 150 pages, delivers essential insights into the forces reshaping one of Latin America's largest economies. This annual edition offers exclusive access to the country's top decision-makers through in-depth interviews, sector-by-sector analysis, and original data-driven reporting. Amid rising nearshoring momentum, trade reconfigurations, and the global push for sustainability, Mexico 2025 explores how government policy, private-sector innovation, and international collaboration are converging to define Mexico's future. From manufacturing and logistics to energy transition, digital transformation, and regulatory reform, this publication captures the full spectrum of Mexico's evolving business landscape.

Cities and Citizenship at the U.S.-Mexico Border K. Staudt,J. Fragoso,César M. Fuentes,2010-09-27 The volume is a cutting-edge, interdisciplinary approach to analyzing an enormously significant region in ways that clarify the kind of

everyday life and work that is generated in a major urban global manufacturing site amid insecurity, inequality, and a virtually absent state.

World Yearbook of Education 2000 David Coulby,Robert Cowen,Crispin Jones,2013-01-17 With contributions from international authors, this text demonstrates that education systems, and what it is to be educated, are in transition and that societies and economies are changing dramatically. The contributors explore expanding university systems, financial responsibilities and curricula.

Perspectives and Trends in Education and Technology Anabela Mesquita,António Abreu,João Vidal Carvalho,2021-11-17 This book presents high-quality, peer-reviewed papers from the International Conference in Information Technology & Education (ICITED 2021), to be held at the ESPM - Higher School of Advertising and Marketing, Sao Paulo, Brazil, between the 15th and the 17th of July 2021. The book covers a specific field of knowledge. This intends to cover not only two fields of knowledge - Education and Technology - but also the interaction among them and the impact/result in the job market and organizations. It covers the research and pedagogic component of Education and Information Technologies but also the connection with society, addressing the three pillars of higher education. The book addresses impact of pandemic on education and use of technology in education. Finally, it also encourages companies to present their professional cases which is discussed. These can constitute real examples of how companies are overcoming their challenges with the uncertainty of the market.

The Changing Face of Higher Education Dennis Ahlburg,2018-07-04 Over the last decade, a heated debate has raged in the US and the UK over whether the humanities are in crisis, and, if there is one, what form this crisis takes and what the response should be. Questioning how there can be such disagreement over a fundamental point, The Changing Face of Higher Education explores this debate, asking whether the humanities are in crisis after all by objectively evaluating the evidence at hand, and opening the debate up to a global scale by applying the questions to twelve countries from different continents. Each carefully chosen contributor considers the debate from the perspective of a different country. The chapters present data on funding, student enrolment in the humanities, whether the share of total enrolment in this area is falling, and answer the following questions: What does each country mean by the 'humanities'? Is there a 'crisis' in the humanities in this country? What are the causes for the crisis? What are the implications for the humanities disciplines? Uniquely offering an objective evaluation of whether this crisis exists, the book will appeal to international humanities and higher education

communities and policy-makers, including postgraduate students and academics.

Global Perspectives on Home Education in the 21st Century English, Rebecca, 2020-11-13 Home education is the fastest growing educational movement in the world, yet the research remains limited on why and how it has become so popular. As more and more families seek to homeschool, it is imperative that further studies are undertaken to understand how students' lives are impacted, as well as the challenges and opportunities that arise from this method of schooling. *Global Perspectives on Home Education in the 21st Century* is an edited collection that focuses on the major factors behind the global rise of the home education movement and explores many of the current issues faced in relation to homeschooling. The book examines key themes that include parents' and children's experiences of home education, how and why families choose to home educate, and what happens to home educated children once they are finished. Including topics such as unschooling, self-directed learning, willed learning, and holistic education, this book is primarily intended for home educators, school administrators, policymakers, researchers, academicians, and students.

Mexico's Middle Class in the Neoliberal Era Dennis Gilbert, 2022-07-12 Mexico's modern middle class emerged in the decades after World War II, a period of spectacular economic growth and social change. Though little studied, the middle class now accounts for one in five Mexican households. This path-breaking book explores the changing fortunes and political transformation of the middle class, especially during the last two decades, as Mexico has adopted new, market-oriented economic policies and has abandoned one-party rule. Blending the personal narratives of middle-class Mexicans with analyses of national surveys of households and voters, Dennis Gilbert traces the development of the middle class since the 1940s. He describes how middle-class Mexicans were affected by the economic upheavals of the 1980s and 1990s and examines their shifting relations with the ruling Partido Revolucionario Institucional (PRI). Long faithful to the PRI, the middle class gradually grew disenchanted. Gilbert examines middle-class reactions to the 1968 Tlatelolco massacre, the 1982 debt crisis, the government's feeble response to the 1985 Mexico City earthquake, and its brazen manipulation of the vote count in the 1988 presidential election. Drawing on detailed interviews with Mexican families, he describes the effects of the 1994-95 peso crisis on middle-class households and their economic and political responses to it. His analysis of exit poll data from the 2000 elections shows that the lopsided middle-class vote in favor of opposition candidate Vicente Fox played a critical role in the election that drove the PRI from power after seven decades. The book closes with an epilogue on the middle class and the July 2006 presidential elections.

Education and Immigration Grace Kao, Elizabeth Vaquera, Kimberly Goyette, 2013-04-03 Education is a crucially important social institution, closely correlated with wealth, occupational prestige, psychological well-being, and health outcomes. Moreover, for children of immigrants – who account for almost one in four school-aged children in the U.S. – it is the primary means through which they become incorporated into American society. This insightful new book explores the educational outcomes of post-1965 immigrants and their children. Tracing the historical context and key contemporary scholarship on immigration, the authors examine issues such as structural versus cultural theories of education stratification, the overlap of immigrant status with race and ethnicity, and the role of language in educational outcomes. Throughout, the authors pay attention to the great diversity among immigrants: some arrive with PhDs to work as research professors, while others arrive with a primary school education and no English skills to work as migrant laborers. As immigrants come from an ever-increasing array of races, ethnicities, and national origins, immigrant assimilation is more complex than ever before, and education is central to their adaptation to American society. Shedding light on often misunderstood topics, this book will be invaluable for advanced undergraduate and beginning graduate-level courses in sociology of education, immigration, and race and ethnicity.

Systemic Knowledge-Based Assessment of Higher Education Programs Espinosa, Edgar Oliver Cardoso, 2016-05-31 The true success of a nation can be measured by its ability to create, disseminate, and utilize knowledge through education. A quality education instills in students the capability to add value to the economy through his or her skills, to participate in society, and to improve the overall wellness of his or her community. Systemic Knowledge-Based Assessment of Higher Education Programs offers theoretical and pedagogical research concerning the management of educational systems on both the national and international scale. Exploring the most effective ways to utilize intellectual capital, this publication implores educators to ensure that their students hone the skills necessary to interact in the globalized economy, using all of the information available to them. This book is a versatile asset for educators, administrators, government agencies, and students of education.

Education, Curriculum and Nation-Building Daniel Tröhler, 2023-04-07 Contributing to interdisciplinary discussions on nationalism, the book explores how educational systems and practices contribute to the phenomena of nationalism and nation-building. Using nine comparative case studies from four continents, the book elaborates a theoretical understanding

of nationalism from the perspectives of comparative education research. It integrates the theme of nation, nation-building and nationalism and its involvement with issues of education. It explores the theoretical scope of concepts such as national identities, national literacies, or doing nation. The book revives the idea that nation should be the starting point of comparative research and contributes to the theoretically reflective integration of nationalism research into education research. This timely book will be highly relevant for researchers, academics, and postgraduate students in the fields of comparative education, international education, education policy, and curriculum studies.
