web the master synchronous serial port mssp is an integrated serial communications module the mssp contains two sub modules spi serial peripheral interface i2c inter integrated circuit the inter integrated circuit commonly referred to as i2c is a synchronous two wire bidirectional serial communications bus

section 24 inter integrated circuit i2c microchip technology - May 01 2023

web jun 23 2016 key features of the i2c module include the following independent master and slave logic multi master support which prevents message losses in arbitration detects 7 bit and 10 bit device addresses with configurable address masking in slave mode detects general call addresses as defined in the i2c protocol automatic sclx clock *getting started with i²c using mssp on pic18 microchip technology* - Jun 02 2023

web the i2c bus is a multi master serial data communication bus microcontrollers communicate in a master slave environment where the master devices initiate the communication and the devices are selected through addressing i2c operates with one or more master devices and one or more slave devices
