A Chronology of Librarianship, 1960-2000 Jeffrey M. Wilhite, 2009-07-01 A Chronology of Librarianship, 1960-2000 continues the work of Josephine Smith in her original Chronology of Librarianship (Scarecrow, 1968). It updates and completes her work up to 2000, paying special attention to the progress made on technological and international fronts that have significantly altered the role and function of the librarian, especially the rise of the internet in the 1990s. The ramifications of this new level of global connectedness and of the new role of the librarian are of primary concern for author Jeffrey M. Wilhite. This book covers all areas of library literature that inform the history of librarianship and ranges over multiple continents. Its broad scope lends itself to wide use by scholars and students of library history and library literature. The chronology is presented in a dictionary format and separated into decades. It is complemented by a comprehensive bibliography and name index.

Textual Transformations in Children's Literature Benjamin Lefebvre, 2013-01-04 This book offers new critical approaches for the study of adaptations, abridgments, translations, parodies, and mash-ups that occur internationally in contemporary children's culture. It follows recent shifts in adaptation studies that call for a move beyond fidelity criticism, a paradigm that measures the success of an adaptation by the level of fidelity to the original text, toward a methodology that considers the adaptation to be always already in conversation with the adapted text. This book visits children's literature and culture in order to consider the generic, pedagogical, and ideological underpinnings that drive both the process and the product. Focusing on novels as well as folktales, films, graphic novels, and anime, the authors consider the challenges inherent in transforming the work of authors such as William Shakespeare, Charles Perrault, L.M. Montgomery, Laura Ingalls Wilder, and A.A. Milne into new forms that are palatable for later audiences particularly when—for perceived ideological or political reasons—the textual transformation is not only unavoidable but entirely necessary. Contributors consider the challenges

inherent in transforming stories and characters from one type of text to another, across genres, languages, and time, offering a range of new models that will inform future scholarship.

Concrete Economics Stephen S. Cohen, J. Bradford DeLong, 2016-02-09 “an excellent new book” — Paul Krugman, The New York Times History, not ideology, holds the key to growth. Brilliantly written and argued, *Concrete Economics* shows how government has repeatedly reshaped the American economy ever since Alexander Hamilton’s first, foundational redesign. This book does not rehash the sturdy and long-accepted arguments that to thrive, entrepreneurial economies need a broad range of freedoms. Instead, Steve Cohen and Brad DeLong remedy our national amnesia about how our economy has actually grown and the role government has played in redesigning and reinvigorating it throughout our history. The government not only sets the ground rules for entrepreneurial activity but directs the surges of energy that mark a vibrant economy. This is as true for present-day Silicon Valley as it was for New England manufacturing at the dawn of the nineteenth century. The authors’ argument is not one based on abstract ideas, arcane discoveries, or complex correlations. Instead it is based on the facts—facts that were once well known but that have been obscured in a fog of ideology—of how the US economy benefited from a pragmatic government approach to succeed so brilliantly. Understanding how our economy has grown in the past provides a blueprint for how we might again redesign and reinvigorate it today, for such a redesign is sorely needed.

Success Stories After 50 Mike Ciman, 2024-05-28 Success can be achieved at any stage of life To prove it, we bring you 30 inspiring stories of people who have achieved their dreams or found great success, after the age of 50. In a world that often glorifies youth as synonymous with innovation and dynamism, these stories challenge that notion, demonstrating that age can be a valuable ally in the entrepreneurial journey. Among the examples you will find are figures like Harland Sanders, who founded KFC at the age of 62 and turned the brand into one of the world's most recognized fast-food chains. You will also meet Vera Wang, who became a renowned fashion designer and founded her wedding dress brand at the age of 50, and Charles Flint, who at the age of 61 founded the company that would become IBM, a technology giant. Their stories are testimony to the fact that experience, combined with an indomitable will to create and innovate, can lead to extraordinary achievements. This book will serve as a powerful reminder that it is never too late to pursue your dreams and leave your mark on the world.

Roctogenarians Mo Rocca, Jonathan Greenberg, 2024-06-11 From beloved CBS Sunday Morning correspondent Mo Rocca, author of New York Times bestseller Mobituaries, comes an inspiring collection of stories that celebrates the triumphs of people who made their biggest marks late in life. Eighty has been the new sixty for about twenty years now. In fact, there have always been late-in-life achievers, those who declined to go into decline just because they were eligible for social security. Journalist, humorist, and history buff Mo Rocca and coauthor Jonathan Greenberg introduce us to the people past and present who peaked when they could have been puttering—breaking out as writers, selling out concert halls, attempting to set land-speed records—and in the case of one ninety-year tortoise, becoming a first-time father. (Take that, Al Pacino!) In the vein of Mobituaries, Roctogenarians is a collection of entertaining and unexpected profiles of these unretired titans—some long gone (a cancer-stricken Henri Matisse, who began work on his celebrated cut-outs when he could no longer paint), some very much still living (Mel Brooks, yukking it up at close to one hundred). The amazing cast of characters

also includes Mary Church Terrell, who at eighty-six helped lead sit-ins at segregated Washington, DC, lunch counters in the 1950s, and Carol Channing, who married the love of her life at eighty-two. Then there's Peter Mark Roget, who began working on his thesaurus in his twenties and completed it at seventy-three (because sometimes finding the right word takes time.) With passion and wonder Rocca and Greenberg recount the stories of yesterday's and today's strongest finishers. Because with all due respect to the Golden Girls, some people will never be content sitting out on the lanai. (PS Actress Estelle Getty was sixty-two when she got her big break. And yes, she's in the book.)

How Did Long John Silver Lose his Leg Dennis Butts, Peter Hunt, 2013-11-28 'How did Long John Silver Lose His Leg?' is a diverting tour through some of the bestloved classics of children's literature, addressing many of the unanswered questions that inspire intense speculation when the books are laid down. Could Bobbie's train really have stopped in time ('The Railway Children')? Did Beatrix Potter have the 'flu in 1909, and did this lead to a certain darkness in her work ('The Tale of Mr Tod')? Would the 'rugby football' played by Tom Brown be recognised by sportsmen today ('Tom Brown's Schooldays')? The authors speculate entertainingly and informatively on the anomalies and unexplained phenomena found in children's literature and, having established the cultural importance of children's books in the modern age, also consider the more serious issues raised by the genre. Why are we so defensive of the idyllic worlds presented in children's books? Why have some of our best-loved authors been outed as neglectful parents to their own children? Should we everseparate the book from its creator and appreciate the works of writers convicted of crimes against children? A treat for any enthusiast of children's literature, two of the most distinguished writers on the subject provide rich detail, witty explication, and serious food for thought.
