

Muerte Y Vida De Las Grandes Ciudades

Lucia Patrizio Gunning, Paola Rizzi

Muerte y vida de las grandes ciudades Jane Jacobs, 2020-11-27 Cincuenta años después de su publicación, *Muerte y vida de las grandes ciudades* es, según el New York Times, probablemente el libro más influyente en la historia de la planificación urbana. Jane Jacobs, columnista y crítica de arquitectura de principios de los años sesenta, afirmaba que la diversidad y la vitalidad de las ciudades estaban siendo destruidas por algunos arquitectos y urbanistas muy influyentes. Popular no sólo entre profesionales, el libro es una fuerte crítica de las políticas de renovación urbanística de los años cincuenta, que destruían comunidades y creaban espacios urbanos aislados y antinaturales. Jacobs defiende la abolición de los reglamentos de ordenación territorial y el restablecimiento de mercados libres de tierra, lo que daría como resultado barrios densos y de uso mixto. Frecuentemente cita el Greenwich Village neoyorkino como ejemplo de una comunidad urbana dinámica. Riguroso, lúcido y deliciosamente epigramático, *Muerte y vida* es un programa para la gestión humanista de las ciudades. Sensato, documentado, ameno e indispensable.

Experiencias Onnovadoras de Planificación Regional Y Urbana ,

Planificación estratégica de ciudades José Miguel Fernández Güell, 2019-02-15 Este libro persigue dos fines principales; por un lado, actualizar y ampliar un campo de conocimiento, el de la planificación estratégica, que crece paulatinamente y que atrae la atención de las nuevas generaciones de urbanistas; por otro lado, mantener vivo el debate sobre la crisis y validez de la planificación urbana contemporánea, para lo que se utiliza siempre un tono optimista sobre las posibilidades de la buena gobernabilidad para superar los desafíos del futuro. Esta nueva edición constituye una revisión profunda de la primera edición de este libro (1997). El resultado ha sido una transformación rigurosa y crítica de la estructura y los contenidos iniciales.

Invisible Reconstruction Lucia Patrizio Gunning, Paola Rizzi, 2022-12-06 What does it really mean to reconstruct a city after a natural, biological or man-made disaster? Is the repair and reinstatement of buildings and infrastructure sufficient without the mending of social fabric? The authors of this volume believe that the true measure of success should be societal. After all, a city without people is no city at all. *Invisible Reconstruction* takes the view that effective disaster mitigation and recovery require interdisciplinary tactics. Historian Lucia Patrizio Gunning and urbanist Paola Rizzi expand beyond the confines of individual disciplines or disaster studies to bring together academics and practitioners from a wide variety of

disciplines, comparing strategies and outcomes in different scenarios and cultures from South America, Europe and Asia. From cultural heritage and public space to education and participation, contributors reflect on the interconnection of people, culture and environment and on constructive approaches to strengthening the intangible ties to increase resilience and reduce vulnerability. By bringing practical examples of how communities and individuals have reacted to or prepared for disaster, the publication proposes a shift in public policy to ensure that essential physical reinforcement and rebuilding are matched by attention to societal needs. Invisible Reconstruction is essential reading for policymakers, academics and practitioners working to reduce the impact of natural, biological and man-made disaster or to improve post-disaster recovery.

Contemporary Perspectives on Jane Jacobs Dirk Schubert, 2016-05-13 Jane Jacobs's famous book *The Death and Life of Great American Cities* (1961) has challenged the discipline of urban planning and led to a paradigm shift. Controversial in the 1960s, most of her ideas became generally accepted within a decade or so after publication, not only in North America but worldwide, as the articles in this volume demonstrate. Based on cross-disciplinary and transnational approaches, this book offers new insights into her complex and often contrarian way of thinking as well as analyses of her impact on urban planning theory and the consequences for planning practice. Now, more than 50 years after the initial publication, in a period of rapid globalisation and deregulated approaches in planning, new challenges arise. The contributions in this book argue that it is not possible simply to follow Jane Jacobs's ideas to the letter, but instead it is necessary to contextualize them, to look for relevant lessons for cities and planners, and critically to re-evaluate why and how some of her ideas might be updated. Bringing together an international team of scholars and writers, this volume develops conclusions based on new research as to how her work can be re-interpreted under different circumstances and utilized in the current debate about the proclaimed 'millennium of the city', the 21st century.

Housing the Future Graham Cairns, Rachel Isaac-Menard, 2015-12-31 *Housing The Future: Alternative Approaches for Tomorrow* offers three perspectives on the problems of housing today with an eye on tomorrow. It brings together world-leading practising architects with academics from seven countries and teams of international students. World leaders in the field of residential design such as UN Habitat Award winner Avi Friedman present built projects whose design criteria and aims they lay out in text. Academics from the UK, the USA, Spain, Germany and elsewhere follow these project descriptions with extended essays from a more theoretical perspective but remain focused on the realities of practice. Finally, ideas on current housing problems from the next generation of designers are brought together in student projects from Europe and North America. With an introduction by Dr Graham Cairns, this book highlights the practice of residential design internationally at a time when affordable housing provision is seen as a critical issue by designers, planners and policy makers alike.

Urbicide Fernando Carrión Mena,Paulina Cepeda Pico,2023-03-23 This book uses the reflection of academics specialized in the urban area of Latin America, Europe and the United States, to initiate a comparative debate of the different dynamics in which Urbicidio expresses itself. The field or focal point of analysis that this publication approaches is the city, but under a new critical perspective of inverse methodology to that has been traditional used. It is about understanding the structural causes of self-destruction to finally thinking better and then going from pessimism to optimism. It is a deep look at the city from an unconventional entrance, because it is about knowing and analyzing what the city loses by the action deployed by own urbanites, both in the field of its production and in the field of its consumption. This suppose that the city does not have an ascending linear sequential evolution in its development but neither in each of its parts in the improvement process, showing the face that commonly not seen but others live. The category used for this purpose is that of Urbicidio or the death of the city, which contributes theoretically and methodologically to the knowledge of the city, as well as to the design of urban policies that neutralize it. In addition, it is worth mentioning that the book has an inclusive view of the authors. For this reason, gender parity, territorial representation and the presence of age groups have been sought.

La ciudad interrumida Julià Guillamon,2019-05-22 Una obra precursora que mostró las primeras sombras del modelo Barcelona. Una crónica de veinticinco años de Barcelona, entre la contracultura y los Juegos Olímpicos, a partir de la arquitectura, el diseño, el periodismo, el arte, el cómic, la fotografía, el cine, las costumbres urbanas y, sobre todo, la literatura. Novelas y cuentos nos guían por la Barcelona de los años setenta, decrepita pero querida. Asistimos a su transformación en una ciudad planificada por los poderes públicos y los capitales internacionales. Con la llegada del turismo de masas, se ha convertido en una referencia en el mundo global, pero muchos habitantes le han dado la espalda. Publicado en catalán en 2001, es al mismo tiempo un testimonio personal, un libro de crítica literaria y un documento de historia de la cultura. Una obra que puso en evidencia la distancia entre la ciudad y sus creadores. Ahora incorpora un nuevo ensayo que pasa revista a los últimos quince años de ficciones urbanas.

Administración pública del Ecuador ¿Dónde estamos? ¿Tenemos una agenda? Efrén Guerrero,2023-03-23 El propósito de este texto es hacer una visión exploratoria del alcance, características y usos de la Gestión Pública, aplicado a casos concretos, y su implementación en la administración pública ecuatoriana. Como se verá en las páginas de este documento, se propone esta área como una ciencia de la acción, en la que los elementos jurídicos, políticos y económicos se combinan, con el fin de asegurar el mejor ejercicio de los derechos fundamentales y la concreción de los objetivos de Estado. En este sentido, y la mayoría de autores coinciden con que el proceso de reforma del Estado tan necesaria en nuestra orbita nacional o regional, es una acción nacida de una necesidad de largo plazo, con fuertes vasos comunicantes entre la acción de la administración con actores políticos dotados de legitimidad electoral. Los textos que se encontrarán en las siguientes páginas tienen varios elementos en común: los Estados no se gobiernan como un acto puramente técnico-racional, sino que ejercen el

arte de gobernar (statecraft) con actos conscientes e inconscientes, para gestionar las tensiones de los diferentes involucrados es una política pública.

Handbook on Shrinking Cities Pallagst, Karina, Bontje, Marco, Cunningham Sabot, Emmanuèle, Fleschurz, René, 2022-10-18 Compelling and engaging, this Handbook on Shrinking Cities addresses the fundamentals of shrinkage, exploring its causal factors, the ways in which planning strategies and policies are steered, and innovative solutions for revitalising shrinking cities. Chapters cover topics of governance, 'greening' and 'right-sizing', and regrowth, laying the relevant groundwork for the Handbook's proposals for dealing with shrinkage in the age of COVID-19 and beyond.

Equality and the City Enrique Peñalosa Londoño, 2024-04-16 In Equality and the City, Enrique Peñalosa Londoño draws on his experience as mayor of Bogotá, Colombia, as well as his many years of international work as a lecturer and consultant, to share his perspective on the issues facing developing cities, especially sustainable transportation and equal access to public space. As mayor of Bogotá, Peñalosa Londoño initiated development of the TransMilenio Rapid Bus Transit system, among the largest and most comprehensive public transit systems in the Global South, which carries 2.5 million passengers a day along dedicated bus lanes, bike paths, and a rapid metro line. The system emphasizes accessibility for the entire population. Peñalosa Londoño's efforts to create public space were similarly ambitious: over the course of his two terms, more than a thousand public parks were created or improved. Underlying these policies was a conviction of how cities should be—a compelling humanistic philosophy of sustainable urbanism. For Peñalosa Londoño, city design is not just engineering; it defines human happiness, dignity, and equality. "An advanced city is not one where the poor own a car," Peñalosa writes, "but one where the rich use public transport." Equality and the City provides practical criteria for conceiving and constructing different and better cities, describes the obstacles that are confronted when doing so, and identifies ways to overcome them.

Urbanismo Regenerativo Landlab, Paisaje Transversal, 2024-01-23 We are living in a critical moment, a reality marked by environmental and socio-economic limits that requires innovative and realistic forms of action and planning. This is what regenerative urbanism proposes, a new approach based on utopian pragmatism that seeks to restore balance to the urban territory by designing systems that allow it to adapt and transform. It is a methodology that defines models that do not consume available resources, but rather generate new ones that ensure compatibility between economic and social prosperity and nature. Santander, Hábitat Futuro (Santander, Future Habitat) is the city model created from this methodology, a proposal for the transformation of this city for the year 2055. It is an open model based on innovation and citizen participation that prepares and adapts the territory for the different scenarios to come. Santander, Habitat Futuro is a guide that directs the commitment of the different social, economic and political agents towards a common goal: to achieve a circular, sustainable, resilient, vertebrate, prosperous, vital and inclusive city. A model that, due to its innovative nature, can

serve as an example to other intermediate cities around the world.

Progress(es), Theories and Practices Mário Ming Kong, Maria Rosário Monteiro, Maria João Pereira Neto, 2017-10-03
The texts presented in Proportion Harmonies and Identities (PHI) - Progress(es) - Theories and Practices were compiled with the intent to establish a platform for the presentation, interaction and dissemination of research. It aims also to foster the awareness of and discussion on the topics of Harmony and Proportion with a focus on different progress visions and readings relevant to Architecture, Arts and Humanities, Design, Engineering, Social and Natural Sciences, Technology and their importance and benefits for the community at large. Considering that the idea of progress is a major matrix for development, its theoretical and practical foundations have become the working tools of scientists, philosophers, and artists, who seek strategies and policies to accelerate the development process in different contexts.

Urban Resilience: Methodologies, Tools and Evaluation Octavio Francisco González Castillo, Valentina Antoniucci, Enrique Mendieta Márquez, Margarita Juárez Nájera, Alberto Cedeño Valdiviezo, Mariana Osorno Castro, 2023-01-10 This book presents a select set of papers from an international and multidisciplinary approach, outlining the vanguard in the field of methodology, tools, and evaluation of the movement towards urban resilience. Reflecting on and redesigning the guidelines that orient the planning and management of urban development has become, today, an issue of global scope and priority that demands the committed and determined participation of society. Faced with the formidable challenge of guiding our cities towards sustainability, it is necessary to develop new approaches, paradigms, models, methodologies, and tools that make it possible to assess and raise the resilience profile of urban socio-ecosystems. The experiences that are developed in this book offer a wide and diverse set of concepts, theories, methodologies, instruments, and casuistry, impregnated by resilience notion, to inspire, influence, and guide thinking and practice for architects, urban planners, government officials, businessmen, civil and research organizations. In this book, the reader will be able to review either theoretical-methodology to organize notions on urban resilience, or application cases in a variety of areas and subsystems of a city but, being all of them inevitably and intricately linked through a complex matrix of structures and interactions that determine future, well-being, and resilience of urban socio-ecosystems in the global anthropo-environment.

Destination Competitiveness, the Environment and Sustainability Andres Artal-Tur, Metin Kozak, 2015-12-09 Destination competitiveness and sustainability are important issues for many stakeholders within the tourism industry. In recent years, destinations have faced some challenges with respect to maintaining sustainability; they must be cleaner, greener and safer in order to safeguard the life quality of holidaymakers and local residents. Providing an invaluable review of the latests research on the topic, global case studies provide a perspective of the worldwide challenges and solutions arising in the management of tourism destinations. The analysis presents an interdisciplinary approach, including contributions of economists, geographers, managers and marketing professionals.

Made-to-Measure Future(s) for Democracy? Julen Zabalo,Igor Filibi,Leire Escajedo San-Epifanio,2022-11-25 This open access volume analyses the development of democracy at different levels of governance (from local to global). The Basque search for an institutional and democratic model that adapts to its social needs and solves its problems offers an interesting perspective for analyzing the way in which democracy is seeking new forms of materialization from the local to the global. The volume is divided into four parts. The chapters in Part I analyze the tensions between the neoliberal vision of democracy and the voices contesting it, with projections at different levels of government. The chapters in Part II focus on the emerging framework and scales of Western democracy. The chapters in Part III present new forms of citizen participation, paying special - though not exclusive - attention to new practical strategies for Basque society. The volume concludes with a block of chapters on the relevance of reviewing the methodological and epistemological frameworks from which knowledge about democracy and mechanisms of citizen participation is generated (Part IV). By delving deeper into the idea and practice of democratic governance, this volume will be of interest to researchers and students from all disciplines of politics, international relations, sociology and law.

Construir y habitar Richard Sennett,2019-03-13 Cómo deberían ser las ciudades del futuro? ¿Cómo ha evolucionado su planificación a lo largo de la historia? ¿Cómo afecta a nuestra vida el entorno urbano en el que vivimos? ¿Qué valores urbanísticos se deberían potenciar? ¿Qué lastres se deberían desterrar? Repensar la ciudad es el objetivo último de este libro, que hace un recorrido por su evolución partiendo de los dos ámbitos en los que trabaja el autor, el de la sociología y el del urbanismo, y tomando como base tanto reflexiones de arquitectos y urbanistas como de filósofos. Construir y habitar recorre la historia de las ciudades desde el ágora griega hasta las urbes del siglo XXI como Shanghái. Repasa las propuestas de los grandes innovadores de la planificación urbana en el siglo XIX -Hausmann y Cerdà-, la creación de la ciudad del siglo XX en Europa y Estados Unidos de la mano de arquitectos como Le Corbusier y su evolución en el XXI en países emergentes como China, India, Brasil, México o algunos africanos. Y aborda ejemplos concretos, que van del diseño de Central Park en Nueva York a la sede de Google, el Googleplex, pasando por las bibliotecas de Medellín, el desarrollo urbanístico de Delhi... Este libro cierra la trilogía del Homo faber de Richard Sennett, cuyas dos entregas anteriores, El artesano y Juntos, también están publicadas en esta colección. Son tres obras independientes, pero que, leídas en conjunto, proporcionan una de las reflexiones más lúcidas y estimulantes sobre la sociedad contemporánea.

Sustainable Development and Renovation in Architecture, Urbanism and Engineering Pilar Mercader-Moyano,2017-03-17 This book provides an overview of the environmental problems that arise from construction activity, focusing on refurbishment as an alternative to the current crisis in the construction sector, as well as on measures designed to minimize the effects on the environment. Furthermore, it offers professionals insights into alternative eco-efficient solutions using new materials to minimize environmental impacts and offers solutions that they can incorporate into their

own designs and buildings. It also demonstrates best practices in the cooperation between various universities in Andalusia in Spain and Latin America and many public and private companies and organizations. This book serves as a valuable reference resource for professionals and researchers and provides an overview on the status of investigations to find solutions to improve sustainable development in terms of materials, systems, facilities, neighborhoods, buildings, and awareness of the society involved.

A Manifesto for the Just City Roberto Rocco, Caroline Newton, Luz Maria Vergara d'Alençon, Anja van der Watt, 2021-03-29 This book addresses the need to re-imagine and re-conceptualise the Just City in light of recent systemic shocks: climate change, the pandemic, a generalised erosion of democratic standards and more. It contains texts by a number of guests and 43 manifestos written by students from 25 universities from all over the world. A “Manifesto for the Just City” comes in the wake of the realisation that socio-spatial justice is a crucial dimension for sustainability transitions. Growing inequality and the erosion of the public sphere undermine the social and political structures required to fight climate change, pandemics and other systemic shocks. With this book, we have sought to encourage students to formulate their own visions for the Just City and for a just transition. This book is result of an Urban Thinkers Campus organised between 9 and 30 November 2020. The Urban Thinkers Campus (UTC) model is an initiative of UN-Habitat’s World Urban Campaign, conceived in 2014 as an open space for critical exchange between stakeholders and partners. It aims to promote debate and action on sustainable and inclusive urbanization upholding the principles and guidelines contained in the New Urban Agenda, launched at Habitat-III in 2016 in Quito, Ecuador.
