Views from the Margins Kevin J. Callahan,Sarah Ann Curtis,2008-01-01 These essays explain French identity as a fluid process rather than a category into which French citizens (and immigrants) are expected to fit. They offer examples drawn from an imperial history of France that show the power of the periphery to shape diverse and dynamic modern French identities at its centre.

Building Yanhuitlan Alessia Frassani,2017-10-12 Through years of fieldwork in the state of Oaxaca, Mexico, art historian and archaeologist Alessia Frassani formulated a compelling question: How did Mesoamerican society maintain its distinctive cultural heritage despite colonization by the Spanish? In Building Yanhuitlan, she focuses on an imposing structure—a sixteenth-century Dominican monastery complex in the village of Yanhuitlan. For centuries, the buildings have served a central role in the village landscape and the lives of its people. Ostensibly, there is nothing indigenous about the complex or the artwork inside. So how does such a place fit within the Mixteca, where Frassani acknowledges a continuity of indigenous culture in the towns, plazas, markets, churches, and rural surroundings? To understand the monastery complex—and Mesoamerican cultural heritage in the wake of conquest—Frassani calls for a shifting definition of indigenous identity, one

that acknowledges the ways indigenous peoples actively took part in the development of post-conquest Mesoamerican culture. Frassani relates the history of Yanhuitlan by examining the rich store of art and architecture in the town's church and convent, bolstering her account with more than 100 color and black-and-white illustrations. She presents the first two centuries of the church complex's construction works, maintenance, and decorations as the product of cultural, political, and economic negotiation between Mixtec caciques, Spanish encomenderos, and Dominican friars. The author then ties the village's present-day religious celebrations to the colonial past, and traces the cult of specific images through these celebrations' history. Cultural artifacts, Frassani demonstrates, do not need pre-Hispanic origins to be considered genuinely Mesoamerican—the processes attached to their appropriation are more meaningful than their having any pre-Hispanic past. Based on original and unpublished documents and punctuated with stunning photography, *Building Yanhuitlan* combines archival and ethnographic work with visual analysis to make an innovative statement regarding artistic forms and to tell the story of a remarkable community.

Supramolecular Catalysis Piet W.N.M. van Leeuwen, Matthieu Raynal, 2021-12-31 Supramolecular Catalysis Provides a timely and detailed overview of the expanding field of supramolecular catalysis The subdiscipline of supramolecular catalysis has expanded in recent years, benefiting from the development of homogeneous catalysis and supramolecular chemistry. Supramolecular catalysis allows chemists to design custom-tailored metal and organic catalysts by devising non-covalent interactions between the various components of the reaction. Edited by two world-renowned researchers, *Supramolecular Catalysis: New Directions and Developments* summarizes the most significant developments in the dynamic, interdisciplinary field. Contributions from an international panel of more than forty experts address a broad range of topics covering both organic and metal catalysts, including emergent catalysis by self-replicating molecules, switchable catalysis using allosteric effects, supramolecular helical catalysts, and transition metal catalysis in confined spaces. This authoritative and up-to-date volume: Covers ligand-ligand interactions, assembled multi-component catalysts, ligand-substrate interactions, and supramolecular organocatalysis and non-classical interactions Presents recent work on supramolecular catalysis in water, supramolecular allosteric catalysis, and catalysis promoted by discrete cages, capsules, and other confined environments Highlights current research trends and discusses the future of supramolecular catalysis Includes full references and numerous figures, tables, and color illustrations *Supramolecular Catalysis: New Directions and Developments* is essential reading for catalytic chemists, complex chemists, biochemists, polymer chemists, spectroscopists, and chemists working with organometallics.

The London Stage 1890-1959 J. P. Wearing,2014-10-30 Theatre in London has celebrated a rich and influential history, and in 1976 the first volume of J. P. Wearing's reference series provided researchers with an indispensable resource of these productions. In the decades since the original calendars were produced, several research aids have become available, notably various reference works and the digitization of important newspapers and relevant periodicals. Spanning 1890 through the 1950s, all seven volumes of The London Stage series have been revised, corrected, and expanded. In addition, approximately 20 percent of the material—in particular, information about adaptations and translations, plot sources, and comment information—is new. Although each volume contains indexes specific to that decade, The London Stage 1890-1959: Accumulated Indexes combines all of the indexes into one comprehensive resource for more efficient research. For example, those wishing to locate all the references to a particular actor, play, or theatre whose history spanned more than one decade will find all of the entries listed in this set. This set includes four key indexes: general, genre, theatre, and title. The general index consists of numerous subject entries on such topics as acting, audiences, censorship, costumes, managers, performers, prompters, staging, and ticket prices. With approximately 40,000 people listed, this is the largest single source of theatrical personnel on the London stage during this period. The genre index comprises all entries for production types, including comedies, dramas, farces, and tragedies, as well as ballets, operas, adaptations, foreign works, pantomimes, and translations. The theatre index features every building to stage a production, from the Adelphi to Wyndham's. The title index cites 14,000 productions, identifying every work produced on stage from Domestic Economy in January 1890 to When in Rome in December 1959. As a supplement to the individual volumes, The London Stage 1890-1959: Accumulated Indexes will be of value to scholars, theatrical personnel, librarians, writers, journalists, and historians.
