Crossing Borders Ali Noorani, 2022-03-28 Advance praise from public figures José Andrés, Al Franken, Jonathan Blitzer of The New Yorker, and Russell Moore of Christianity Today. Find the moving stories of American immigrants and their journeys in Ali Noorani's chronicle. In an era when immigration on a global scale defines the fears and aspirations of Americans, *Crossing Borders* presents the complexities of migration through the stories of families fleeing violence and poverty, the government and nongovernmental organizations helping or hindering their progress, and the American communities receiving them. Ali Noorani, who has spent years building bridges between immigrants and their often conservative communities, takes readers on a journey to Honduras, Ciudad Juarez in Mexico, and Texas, meeting migrants and the organizations and people that help them on both sides of the border. He reports from the inside on why families make the heart-wrenching decision to leave home. Going beyond the polemical, partisan debate, Noorani offers sensitive insights and real solutions. *Crossing Borders* will appeal to a broad audience of concerned citizens across the political spectrum, faith communities, policymakers, and immigrants themselves.

Advanced Integrated Approaches to Environmental Economics and Policy: Emerging Research and Opportunities Patti, Sebastiano, Trizzino, Giampiero, 2019-10-11 Sustainable development remains a significant issue in a globalized world requiring new economic standards and practices for the betterment of the environment as well as the world economy. However, sustainable economics must manage environmental solutions to issues on multiple levels and within various disciplines. There is a need for studies that seek to understand how environmental economics and governance within small and large sectors affect the capability and wellbeing of the global economy. *Advanced Integrated Approaches to Environmental Economics and Policy: Emerging Research and Opportunities* is an essential publication that focuses on the strategic role of environmental issues within the global economy. While highlighting topics such as complementary currency, reusable waste, and urban planning, this book is ideally designed for policymakers, environmental lawyers, economists, sociologists, politicians, academicians, researchers, and students seeking current research on increasing an organization's sustainable performance at both public and private levels.

Handbook of Human and Planetary Health Walter Leal Filho, 2022-09-06 This book contains a set of papers which explore the subject matter of human and planetary health at various angles The year 2015 was a special year in the field of human

and planetary health. In that year, the report, produced by the Rockefeller Foundation and the journal The Lancet, called “Safeguarding human health in the Anthropocene epoch: report of The Rockefeller Foundation-Lancet Commission on planetary health” was launched. Also in 2015, the World Health Organization and the Secretariat of the Convention on Biological Diversity published the report “Connecting global priorities: biodiversity and human health: a state of knowledge review” with over 100 contributors, meant to guide future joint actions. Both documents comprehensively address the need for a better understanding of the connections between human health and ecosystems and the risks associated with damages to the integrity of the planet. The period in which humanity finds itself right now, the Anthropocene, is a risk one since mankind is putting the planet under considerable pressure. These elements have led to the emergence of a new field of research, namely planetary health. Planetary health seeks to address a very concrete and urgent contemporary problem, namely the need to understand, quantify, and act in order to reverse the effects of human population growth and the acceleration of socioeconomic activities on the environment and, inter alia, the disturbances in the Earth's natural ecosystems and how these, in turn, impact human health and well-being. Anthropogenic disturbances in natural ecosystems are characterized by changes in climate, land use, changes in the nitrogen and phosphorus cycle, chemical pollution of soil, water and air, reduction in the availability of drinking water, loss of biodiversity, destruction of the ozone layer, and ocean acidification, among others. In all these areas, there is a perceived need to document and promote examples of initiatives and good practice, which may change current trends. This book addresses this need. It documents experiences, case studies, and projects which explore the connections between human and planetary health and illustrates examples which show the consequences of ecosystemic disturbances to the health and well-being of humanity, with the emergence of new diseases, worsening of infectious diseases and increase in chronic non-communicable diseases related to the deterioration of the current food system, hyper-urbanization, microbial resistance, climate-led migration and zoonoses, among others. Planetary health is a new effort to deal with the question of sustainability and human life on the planet under an increasingly integrative, transdisciplinary, and global perspective, since the problems of this planetary crisis cross geopolitical borders and academic boundaries and affect humanity as a whole. This book provides a contribution to this emerging field. Thanks to its design and the contributions by experts from various areas, it provides a welcome contribution to the literature on planetary health, and it inspires further works in this field.

Cesare Zavattini's Neo-realism and the Afterlife of an Idea David Brancalone, 2021-07-15 How many Zavattinis are there? During a life spanning most of the twentieth century, the screenwriter who wrote *Sciuscià*, *Bicycle Thieves*, *Miracle in Milan*, and *Umberto D.* was also a pioneering magazine publisher in 1930s Milan, a public intellectual, a theorist, a tireless campaigner for change within the film industry, a man of letters, a painter and a poet. This intellectual biography is built on the premise that in order to understand Zavattini's idea of cinema and his legacy of ethical and political cinema (including guerrilla cinema), we must also tease out the multi-faceted strands of his interventions and their interplay over time. The book is for general readers, students and film historians, and anyone with an interest in cinema and its fate.

Anthropology is a comprehensive inter- and intradisciplinary survey of the field of feminist anthropology. It has at its core a focus on raising consciousness and communicating information about gender inequities, suffering, and precarity, as well as furthering a praxis informed by intersectionality, decolonial intent, and compassion. Divided into three clear parts and comprising 34 chapters by an international team of contributors, the Handbook addresses topics in the following key areas: resisting violence communicating creatively labor migration and displacement health and disease reproduction intersectionality decolonial work. The collection assesses the field at an interesting moment in time—one defined by social justice and populist movements gone global; once and future pandemics; extreme environmental disasters; and neoliberalism interrupted. How do gender, sex, and sexuality intersect with these phenomena? In answer, contributors to this volume put a heterogeneous anthropological approach in place; they advance interdisciplinary conversations, as well as renew a commitment to intradisciplinary dialogue.
