Children, Young People and Online Harms Emily Setty, Faith Gordon, Emma Nottingham, 2024-02-23 This book presents research conducted with children and young people about online harms, with a UK focus, while aiming to stimulate comparative analyses of other countries too. While the chapters vary in how data-driven they are, each will explore conceptualisations of online harm, children and young people's experiences of online harms, and their perspectives on interventions to educate about and address online harms. While the UK government claimed in 2019 to be introducing 'tough new measures to make the UK the safest place to be online', it has been noted that there may be a limited capacity for formal legislation to address the complexities of contemporary digital life for children and young people; instead, tackling online harms has to be part of a broader agenda and must account for the diverse and socially contingent nature of children's and young people's experiences online, as evidenced by extensive research undertaken with children and young people. With the finalisation of legislation surrounding online harms in the UK imminent, the objective of this collection is to shape the implementation of policy in practice settings. To support practice development, the book offers vignette-style pieces that will describe examples of policy and practice models and how these models can support children's and young people's active participation in understanding online harms. As a result of this, the findings of this book will minimise the disparity between the practice, policy and research through speaking to the interface between these fields in the UK context.

Young People and Social Media: Contemporary Children's Digital Culture Steve Gennaro, Blair Miller, 2021-10-05 'Young People and Social Media: Contemporary Children's Digital Culture' explores the practices, relationships, consequences, benefits, and outcomes of children's experiences with, on, and through social media by bringing together a vast array of different ideas about childhood, youth, and young people's lives. These ideas are drawn from scholars working in a variety of disciplines, and rather than just describing the social construction of childhood or an understanding of children's lives, this collection seeks to encapsulate not only how young people exist on social media but also how their physical lives are impacted by their presence on social media. One of the aims of this volume in exploring youth interaction with social media is to unpack the structuring of digital technologies in terms of how young people access the technology to use it as a means of communication, a platform for identification, and a tool for participation in their larger social world. During longstanding and continued experience in the broad field of youth and digital culture, we have come to realize that not only is the subject matter increasing in importance at an immeasurable rate, but the amount of textbooks and/or edited collections has lagged behind considerably. There is a lack of sources that fully encapsulate the canon of texts for the discipline or the rich diversity and complexity of overlapping subject areas that create the fertile ground for studying young people's lives and culture. The editors hope that this text will occupy some of that void and act as a catalyst for future interdisciplinary collections. 'Young People and Social Media: Contemporary Children's Digital Culture' will appeal to undergraduate students studying Child and Youth Studies and—given the interdisciplinary nature of the collection— scholars, researchers and students at all levels working in anthropology, psychology, sociology, communication studies, cultural studies, media studies, education, and human rights, among others. Practitioners in these fields will also find this collection of particular interest.

Innovations for a Sustainable Well-Being: Empowering Today's Youth Dr. D. Ayub Khan Dawood, Dr. Kalyani Kenneth, Dr. Vyjayanthi Mala, Dr. Moon Moon Hussain ,Professor Tasya Aspiranti, Rania Lampou, Dr Hannah John PhD., 2025-02-12 Young people play a vital role in advancing sustainable development, climate action, and innovation. They are not just recipients of change but active stakeholders and catalysts in achieving the Sustainable Development Goals (SDGs). Despite their immense creativity, entrepreneurial mindset, and unique talents, youth-led innovations often lack sufficient resources and recognition. Unlocking their potential and harnessing their drive is essential to cultivating future sustainability leaders across different

fields. In a rapidly evolving world shaped by technological progress, shifting global trends, and changing socio-economic landscapes, youth empowerment has become a crucial foundation for building a resilient and prosperous future. The concept of sustainable wellbeing among today's youth has gained significant attention across various sectors. As we look toward the future, it is increasingly evident that fostering the potential and ambitions of young people is not merely an option; it is a necessity for progress and sustainability. Empowering youth is of paramount importance. They are not just passive inheritors of the world we create but the architects of tomorrow's reality. Their creativity, innovation, and fresh perspectives will influence societies, industries, and policies in the years ahead. However, true empowerment goes beyond education; it involves equipping them with the necessary tools, knowledge, skills, and opportunities to take control of their futures and contribute meaningfully to global progress. In fact, this concept extends beyond personal development to broader societal advancement. An empowered youth population fuels economic growth by introducing fresh ideas and entrepreneurial ventures that drive innovation. Additionally, an engaged and informed youth demographic plays a critical role in shaping social and political discourse, ensuring that their concerns and aspirations are reflected in decision-making processes. Nevertheless, the journey toward youth empowerment is complex and multifaceted. It requires addressing key challenges such as equitable access to education, meaningful employment opportunities, mental health support, and the creation of environments that nurture personal growth and confidence. Achieving this goal demands a collective effort from governments, educational institutions, community organizations, and the private sector to build an ecosystem that supports, guides, and uplifts young individuals. Throughout this conference proceeding, we will examine the key aspects of sustainable wellbeing and transformative strategies of youth empowerment. Through this dialogue, we aim to spark ideas, foster meaningful discussions, and emphasize the urgency of investing in today's youth to build a stronger, more resilient future.
