World Guide to Special Libraries Marlies Janson, Helmut Opitz, 2011-12-22 The World Guide to Special Libraries lists about 35,000 libraries world wide categorized by more than 800 key words - including libraries of departments, institutes, hospitals, schools, companies, administrative bodies, foundations, associations and religious communities. It provides complete details of the libraries and their holdings, and alphabetical indexes of subjects and institutions.

History of Universities Mordechai Feingold, 2006-05-11 Volume XXI/1 of History of Universities contains the customary mix of learned articles, book reviews, conference reports, and bibliographical information, which makes this publication such an indispensable tool for the historian of higher education. Its contributions range widely geographically, chronologically, and in subject-matter. The volume is, as always, a lively combination of original research and invaluable reference material.

Programming Languages with Applications to Biology and Security Chiara Bodei, Gianluigi Ferrari, Corrado Priami, 2015-10-07 This Festschrift volume is published in honor of Pierpaolo Degano on the occasion of his 65th birthday and is the outcome of a colloquium held in Pisa, Italy, in June 2015. Pierpaolo Degano has worked on a large variety of topics including formal program semantics, concurrency theory, systems biology and security. The volume contains 22 refereed papers and one extended abstract, including personal memoirs and regular research papers by close collaborators and friends and a laudatio illustrating his distinguished career and his main scientific contributions. The papers deal with the main research topics explored by Pierpaolo Degano and those still under his investigation.

Recurrent Mood Disorders Gian F. Placidi, Liliana Dell'Osso, Giuseppe Nistico, Hagop S. Akiskal, 2012-12-06 Current evidence indicates that over two-thirds of mood disorders pursue a recurrent or chronic course. Yet much of the progress recorded in the field of mood disorders and their treatment has been in research into the acute phase of the illness. Hence there is a need for a volume that specifically addresses the special clinical problems encountered in the recurrent forms of these disorders. The various chapters of this book embrace a wide range of topics, including etiology, course, and long-term

treatment, integrative reviews, results of recent investigations, and clinical reports. In this respect, the contributions reflect current concepts, research, and clinical practice. We have endeavored to build a bridge between neurobiology and psychology and have covered both the psychotherapeutic and the psychopharmacologic aspects of mood disorders.

Culture and Power Jonathan Davies, 2009 Traditionally grand ducal Tuscany and its cultural politics have been viewed through the lens of absolutism. Based on a wide range of newly found sources and building on recent revisionist scholarship, this study uses the universities of Pisa and Siena to expose the contradictions and the tensions which characterised the grand duchy. Setting the universities against the diplomatic, military, administrative, economic, ecclesiastical, and cultural development of the grand duchy, it shows how innovation mixed with tradition and local privileges were not only upheld but extended significantly.

The Application of Mathematics to the Sciences of Nature Claudio Pellegrini, Paola Cerrai, Paolo Freguglia, 2012-12-06
The historical and epistemological reflection on the applications of mathematical techniques to the Sciences of Nature - physics, biology, chemistry, and geology - today generates attention and interest because of the increasing use of mathematical models in all sciences and their high level of sophistication. The goal of the meeting and the papers collected in this proceedings volume is to give physicists, biologists, mathematicians, and historians of science the opportunity to share information on their work and reflect on the and mathematical models are used in the natural sciences today and in way mathematics the past. The program of the workshop combines the experience of those working on current scientific research in many different fields with the historical analysis of previous results. We hope that some novel interdisciplinary, philosophical, and epistemological considerations will follow from the two aspects of the workshop, the historical and the scientific. This proceedings includes papers presented at the meeting and some of the results of the discussions that took place during the workshop. We wish to express our gratitude to Sergio Monteiro for all his work, which has been essential for the successful publication of these proceedings. We also want to thank the editors of Kluwer Academic Plenum Publishers for their patience and constant help, and in particular Beth Kuhne and Roberta Klarreich. Our thanks to the following institutions: -Amministrazione Comunale di Arcidosso -Comunita Montana del Monte Amiata -Center for the History of Physics, UCLA -Centre F.

Universities and Entrepreneurship Paul Jones, Nikolaos Apostolopoulos, Alexandros Kakouris, Christopher Moon, Vanessa Ratten, Andreas Walmsley, 2021-02-15 The aim of this book is to discuss how universities are acting in an entrepreneurial way by responding to educational and social challenges. This will help to understand fruitful new areas of teaching, research, service and engagement that can occur in a university setting based on entrepreneurial thinking.

Computational Strategies for Spectroscopy Vincenzo Barone, 2011-11-22 Computational spectroscopy is a rapidly evolving field that is becoming a versatile and widespread tool for the assignment of experimental spectra and their interpretation as related to chemical physical effects. This book is devoted to the most significant methodological contributions in the field, and to the computation of IR, UV-VIS, NMR and EPR spectral parameters with reference to the underlying vibronic and environmental effects. Each section starts with a chapter written by an experimental spectroscopist dealing with present challenges in the different fields; comprehensive coverage of conventional and advanced spectroscopic techniques is provided by means of dedicated chapters written by experts. Computational chemists, analytical chemists and spectroscopists, physicists, materials scientists, and graduate students will benefit from this thorough resource.

Institutions of Higher Education Linda Sparks, 1990-01-24 This bibliography brings together in one comprehensive volume citations of books, dissertations, theses, and ERIC microfiche relating to the history of specific institutions of higher education worldwide. All types of postsecondary institutions--two years colleges, liberal arts colleges, seminaries, specialized institutions, and universities--are included. Entries include the following elements when available: author/editor, title, place of publication, publisher, publication date, and number of pages. Citations from 85 countries are included. Entries are by country, dependency, and territory. The United States has been further divided by state. Names of institutions are in English. References are in the language in which they were written. The majority of the citations should be available in a library somewhere in the United States. Obscure sources that may be difficult to obtain have been included because they are often

the only citation. All editions of a title as well as older works are included because of their potential value to a researcher. The book should be a part of all college, university, and large public library collections. College of Education faculty members specializing in higher or comparative education will find much of value here.

Demography: Analysis and Synthesis, Four Volume Set Graziella Caselli,Jacques Vallin,Guillaume Wunsch,2006-01-03 This four-volume collection of over 140 original chapters covers virtually everything of interest to demographers, sociologists, and others. Over 100 authors present population subjects in ways that provoke thinking and lead to the creation of new perspectives, not just facts and equations to be memorized. The articles follow a theory-methods-applications approach and so offer a kind of one-stop shop that is well suited for students and professors who need non-technical summaries, such as political scientists, public affairs specialists, and others. Unlike shorter handbooks, Demography: Analysis and Synthesis offers a long overdue, thorough treatment of the field. Choosing the analytical method that fits the data and the situation requires insights that the authors and editors of Demography: Analysis and Synthesis have explored and developed. This extended examination of demographic tools not only seeks to explain the analytical tools themselves, but also the relationships between general population dynamics and their natural, economic, social, political, and cultural environments. Limiting themselves to human populations only, the authors and editors cover subjects that range from the core building blocks of population change--fertility, mortality, and migration--to the consequences of demographic changes in the biological and health fields, population theories and doctrines, observation systems, and the teaching of demography. The international perspectives brought to these subjects is vital for those who want an unbiased, rounded overview of these complex, multifaceted subjects. Topics to be covered: * Population Dynamics and the Relationship Between Population Growth and Structure * The Determinants of Fertility * The Determinants of Mortality * The Determinants of Migration * Historical and Geographical Determinants of Population * The Effects of Population on Health, Economics, Culture, and the Environment * Population Policies * Data Collection Methods and Teaching about Population Studies * All chapters share a common format * Each chapter features several cross-references to other chapters * Tables, charts, and other non-text features are widespread * Each chapter contains at least 30 bibliographic citations
