Nutrition, Immunity and Viral Infections Julio Villena, Maria Guadalupe Vizoso Pinto, Haruki Kitazawa, Takeshi Shimosato, 2020-11-19 This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

New Frontiers for the Treatment of Keratoconus César Carriazo, María José Cosentino, 2021-04-01 This book updates the reader about the latest bio-mechanical concepts underlying keratoconus diagnosis and the various treatment alternatives: from conventional alternatives with a real cost/benefit description, to some innovative alternatives that have come to the fore in recent years. It discusses the latest software and technology utilized in keratoconus diagnosis as well as the more innovative surgical techniques used to treat keratoconus. New Frontiers for the Treatment of Keratoconus represents an essential book for ophthalmologists and specialists in cornea and refractive surgery who are looking to position themselves at the forefront of the diagnosis and treatment of keratoconus.

Jaque a la Reina Soledad Deza, Mariana Alvarez, Alejandra Iriarte, 2021-03-15 El aborto ocurre en el cuerpo de las mujeres. Un cuerpo que es disputado por actores estratégicos multifacéticos que despliegan acciones diversas para influir sobre él. Jaque a la reina delinea con una mirada de género el recorrido que transitan las mujeres que abortan en Tucumán y los costos que pagan para acceder a la salud. Pero a medida que avanza la investigación se advierte que esas mujeres pueden ser otras tantas, de otros lugares y de todas partes. El aborto como cuestión de salud pública, de derechos, de moral, de clase social, de cifras, de convicciones religiosas, de cárcel o de muerte, es un asunto que no consigue lugar en la Agenda Pública.

Prácticas de las bibliotecas universitarias argentinas Mercedes Patalano, 2008 Las prácticas de las bibliotecas universitarias argentinas del sector público y privado, involucradas en el proceso de comunicación académica, se estudian a partir de sus representaciones en los sitios web de bibliotecas, con el objeto de indagar acerca de las tensiones que se

desarrollan dentro de dicho proceso y que posibilitan determinar cómo se aborda la imagen de la biblioteca, cómo se representa la producción de conocimiento científico y cómo se establece el diálogo con los usuarios. El análisis de los elementos mencionados permite establecer un contraste entre el discurso del modelo de biblioteca universitaria (¿qué se quiere ser?) su materialización mediante las prácticas de acceso a la producción científica (¿qué se ofrece?) y la relación establecida entre la institución biblioteca y la comunidad universitaria (¿cómo se comunica?).

La formación en investigación en la universidad Gladys Rosa Calvo, 2021-11-23 ¿Cómo se forma un investigador? ¿Qué instancias se prevén en las carreras de grado para preparar en los quehaceres investigativos? ¿Qué características didácticas tiene la formación en investigación en la universidad? ¿Qué particularidad asume en las carreras de grado de las ciencias sociales y humanas? Estas y otras preguntas orientan el desarrollo de esta obra que abre a respuestas y a nuevos interrogantes para los docentes y estudiantes preocupados por la formación en la universidad, dado que investigación, docencia y extensión se constituyen en los pilares de nuestra institución. El rol de investigador se integra en las competencias a desarrollar en esa formación, y, a la vez, se constituye en un rasgo que distingue y caracteriza al profesional que desarrolla actividades académicas. La mayor parte de los planes de estudios universitarios explicitan la intención de formar profesionales capacitados para realizar investigaciones científicas, sin embargo, este interés no deriva necesariamente en el desarrollo de contenidos y estrategias tendientes al logro de esta finalidad. El presente trabajo, parte de un estudio didáctico general para, posteriormente, profundizar en las modalidades de relación teoría y práctica que adquieren las distintas instancias curriculares dedicadas a formar en investigación, especialmente aquellas que se encuentran en el ciclo de formación general. El estudio tiene su anclaje empírico en las nueve carreras de la Facultad de Filosofía y Letras de la Universidad de Buenos Aires. Preguntarnos en torno a la formación de los investigadores en la universidad resulta de interés ya que problematiza y busca aportar conocimiento sobre un tema de relevancia académica y social, ya que no solo implica a la institución productora de ese conocimiento sino también a la sociedad que aparece como destinataria de ese conocimiento producido.

Estudiar, cuidar y reclamar Karina Ramacciotti, 2023-12-19 La pandemia de COVID-19 dio a la enfermería una visibilidad pocas veces experimentada hasta entonces, dado que enfermeras y enfermeros fueron quienes oficiaron de primera línea de batalla frente al virus desconocido de escala global y vacunaron en la campaña sanitaria más importante de la historia. En este contexto tan excepcional, este libro analiza exhaustivamente el lugar central de la enfermería en el

cuidado profesional de la salud desde el punto de vista de sus propios protagonistas y explora el modo en que tanto la formación como el trabajo de enfermería se vieron afectadas. Los veinte artículos que componen Estudiar, cuidar y reclamar. La enfermería argentina durante la pandemia de COVID-19 consideran que para entender las relaciones de cuidado es necesario considerarlas como un vínculo que responde a relaciones de género, familiares, comunitarias, de políticas públicas, intervenciones de expertos y profesionales, redes migratorias y relaciones económicas. Las concebimos, a su vez, como un fenómeno multidimensional, dinámico y complejo, con componentes científico-tecnológicos orientados hacia la dimensión biológica de la persona cuidada, y componentes humanísticos orientados hacia la dimensión emocional, intelectual, social, cultural y espiritual. La investigación que impulsó estos artículos fue realizada en tiempo real por parte de un conjunto de investigadores e investigadoras de diferentes regiones del país lo que implica contar con una perspectiva federal del tema abordado.

Fragmentos de la Historia de la Salud en la Argentina Rural Adrián Carbonetti ,Adriana Álvarez,2018-03-19 En este libro procuramos abordar la historia de la salud y la enfermedad en los ámbitos rurales, haciéndolo extensivo a distintas provincias de Argentina, en algunos casos de la zona central como Buenos Aires, Santa Fe y Córdoba, y en otros en provincias del noroeste como Jujuy y Tucumán. Los estudios que se presentan también tienen otra particularidad: su mirada se centra en distintos momentos de la historia de Argentina, que van desde Mediados del siglo XIX hasta la primera mitad del siglo XX. Este recorrido diacrónico permite observar el impacto de las enfermedades y su atención en diversos momentos de la historia en diferentes provincias argentinas y las estrategias que se utilizaron para combatirlas. En ese sentido los capítulos que aquí se compilan tienen el valor del estudio de casos que permitirán abrir nuevas líneas de investigación que hasta este momento no han sido Explotadas por la historiografía argentina.

Del cáncer y sus demonios Ernesto Gil Deza,2019-02-22 ¿Qué es el cáncer? ¿Siempre se necesita una biopsia? ¿Porqué se comporta de esa manera? ¿Es posible imaginar en un futuro una humanidad libre de cáncer? ¿Tengo cáncer porque hice algo mal? ¿El tumor puede tener un origen psicológico? ¿Como sé si el tumor está diseminado? ¿Qué nuevos tratamientos existen? ¿ Siempre se usa quimioterapia? ¿El tumor puede volver a aparecer? ¿Se le puede decir a un paciente la verdad? ¿Le interesa a los pacientes conocer el pronóstico? ¿Es razonable participar en estudios de investigación? ¿Sirven los tratamientos alternativos? ¿El apoyo psicológico es útil? ¿Qué son los cuidados paliativos? ¿Como sobrevivir al cáncer? ¿Se puede volver a creer, a esperar, a confiar? En la tradición de los mejores libros de divulgación científica aplicados a la medicina, el doctor Gil Deza nos deja asombrados y emocionados con un recorrido fascinante por la relación entre los pacientes y el cáncer. Igual que Oliver Sacks o Henry Marsh, Gil Deza nos enseña que es posible escribir con elegancia y erudición sobre padecimientos, enfermos y recuperaciones, sin golpes bajos ni concesiones infantiles. No es este un libro de autoayuda ni explora terrenos sensacionalistas; es un libro con historias de pacientes y de médicos, de miedos y desafíos, de sanación y de

victorias, de luchas y de esperanza. Gil Deza cree, y nos enseña, que hay un modo de contar y describir el enfrentamiento con el cáncer donde se juega gran parte de los que nos define como seres humanos: la empatía y el amor como herramientas indispensables para aplicar los conocimientos científicos.

Emerging Global Population Health Risks: From Epidemiological Perspectives Russell Kabir ,Ali Davod Parsa,Ilias Mahmud, 2024-08-22 Public and global health professionals realize that despite significant advances in improving population health and preventing high mortality from communicable and non-communicable diseases and managing/treating both communicable and non-communicable diseases the global population health status remains fragile. This is partly due to the global life pattern in the 21st century making world as a global village. Individuals' movements in global society have been facilitated rapidly and the current advance in travel and trade across different geographical locations allow rapid spread of any newly identified infectious agents. Therefore, relatively the likelihood of an outbreak and pandemic increases if there is no suitably coordinated active global surveillance in place.

Fungal Nanobionics: Principles and Applications Ram Prasad,Vivek Kumar,Manoj Kumar,Shanquan Wang, 2018-07-27 Fungal nanobionics has great prospects for developing new products with industrial, agriculture, medicine and consumer applications in a wide range of sectors. The fields of chemical engineering, agri-food, biochemical, pharmaceuticals, diagnostics and medical device development all employ fungal products, with fungal nanomaterials currently used in a wide range of applications, ranging from drug development to food industry and agricultural sector. The fungal agents emerge as an environmentally friendly, clean, non-toxic agent for the biogenic metal nanoparticles and employs both intracellular and extracellular methods. The simplicity of scaling up and downstream processing and the presence of fungal mycelia affording an increased surface area provide key advantages. In addition, the larger spectrum of synthesized nanoparticle morphologies and the substantially faster biosynthesis rate in cell-free filtrate (due to the higher amount of proteins secreted in fungi) make this a particularly enticing route. Understanding the diversity of fungi in assorted ecosystems, as well as their interactions with other microorganisms, animals and plants, is essential to underpin real and innovative technological developments and the applications of metal nanoparticles in many disciplines including agriculture, catalysis, and biomedical biosensors. Importantly, biogenic fungal nanoparticles show significant synergistic characteristics when combined with antibiotics and fungicides to offer substantially greater resistance to microbial growth and applications in nanomedicine ranging from topical ointments and bandages for wound healing to coated stents.

Zymography Raouf A. Khalil, 2025-04-22 Volume 2 describes how to determine the activity of different isozymes, allozymes, and families of proteinases to advance the fields of enzymology and molecular evolution, and provides useful biomarkers for various biological processes, pathological conditions, and clinical disorders. The chapters in Volume 2 are organized in three parts. Part I introduces in situ zymography and localization of bright green-fluorescent gelatinase activity in tissue sections, in situ zymography in formalin-fixed paraffin-embedded and mineralized tissues, and in vivo zymography as an essential activity assay for studying the activity of matrix metalloproteinases (MMPs) in a cell-specific manner in the brain. Part II focuses on biological applications of zymography such as fundamentals of zymography and its applications to the study of biological samples, gelatin zymography to quantify MMP-2 and MMP-9 in complex biological specimens, and detection of proteolytic enzymes in polyacrylamide gels supplemented with diverse biological substrates. Part III focuses on potential clinical applications of zymography, with chapters describing assessment of MMP-2 and MMP-9 hydrolytic activity in preclinical and clinical tissue samples, the use of zymography to assess circulating MMP-2 and MMP-9 in plasma and serum and in pathological conditions, and the use of zymography for the detection of bacterial proteases. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Cutting-edge and thorough, *Zymography: Biological and Clinical Applications, Volume II* is a valuable resource for both experts in the field, as well as new scientists aspiring to learn and perform successful zymography techniques.!-- [if !supportLineBreakNewLine]--!--[endif]--

Enjoying the Tune of Phrase: An Emotional Symphony within **Facultad De Medicina Unt**
