A Byzantine Book on Dream Interpretation Maria V. Mavroudi, 2021-10-25 This volume discusses the so-called Oneirocriticon of Achmet, the most important Byzantine work on dream interpretation which was written in Greek in the 10th century and has greatly influenced subsequent dreambooks in Byzantine Greek, Medieval Latin, and modern European languages. By comparing the Oneirocriticon with the 2nd-century A.D. dreambook of Artemidoros (translated into Arabic in the 9th century) and five medieval Arabic dreambooks, this study demonstrates that the Oneirocriticon is a Christian Greek adaption of Islamic Arabic material and that the similarities between it and Artemidoros are due to the influence of Artemidoros on the Arabic sources of the Byzantine work. The Oneirocriticon's textual tradition, its language, the identities of its author and patron, and its position among other Byzantine translations from Arabic into Greek are also investigated.

Living with Djinn Barbara Drieskens, 2008 The djinn is an invisible spirit with a will of its own that may lurk at the bottom of your teacup or seep through your pores to possess you. Djinn have long been an explanation for illness and

misfortune or an excuse for unconventional behavior. Barbara Drieskens investigates possession, manifestations, and concepts of person and space. She also explores the importance of storytelling in Egyptian society and recounts first-hand experiences of djinns in this unique ethnographic study. Barbara Drieskens is a researcher at the Institut Français du Proche-Orient in Beirut, Lebanon.

O Ser e os Sonhos Patrick Paul, 2025-02-03 Se a psicologia pode ser definida como uma ciência das imagens refletidas no espelho do psiquismo, a psicontologia supõe a compreensão de que somos ao mesmo tempo o espelho, a imagem e o ser nele refletido. Apoia-se na necessidade de articular os três princípios que tradicionalmente fundamentam a realidade humana: o corpo (a vida biológica), a alma (o princípio animador consciente e inconsciente) e o espírito (a inteligência agente que produz as formas inteligíveis refletidas na consciência cognitiva). Os sonhos e sua correta interpretação revelam a tessitura do ser que, escondido na separação, se manifesta na união.

Dictionnaire des symboles musulmans Malek Chebel, 2013-11-25 Les relations entre l'Islam et l'Occident constituent l'un des enjeux cruciaux de notre époque. Or, l'univers musulman demeure pour beaucoup un domaine inconnu et étranger. Riche de 1600 entrées, d'une bibliographie considérable et d'une multitude de renvois et citations - notamment de sourates du Coran -, ce dictionnaire est l'outil indispensable à tous ceux qui désirent comprendre l'imaginaire profond de centaines de millions de croyants. La symbolique à proprement parler nombres, couleurs, bestiaire, grandes figures coraniques... - s'y mêle aux questions rituelles, historiques et théologiques. La grande tradition mystique (soufisme) y côtoie une foule de termes qui sont évoqués quotidiennement dans la presse mais dont le sens réel est souvent méconnu : ayatollah, fatwa, chi'isme, voile, chari'a... Véritable encyclopédie pédagogique de l'Islam, cette somme de l'anthropologue Malek Chebel nous livre l'une des clés du temps présent.

Les contes des mille et un mythes - Volume II Nas E. Boutamina, 2017-02-07 A la fin du VIIIe siècle, l'esprit de certains hommes fut catalysés : les savants (scientifiques). Ils furent comme guidés par la Providence. La création des Sciences et des techniques comme outils de découverte des secrets de la Création avait un noble objectif à leurs yeux. Dompter les lois de la nature afin de les mettre au service de la Civilisation humaine. Ainsi, par cette conviction, un mode de vie, une société va se caractériser comme une certitude conforme à la logique que l'intellect découvre. En conséquence, par les Sciences ainsi créées, l'intelligence et la raison établissent que l'origine du monde est la résultante d'un Être Supérieur. Le début du IXe siècle est une phase décisive de l'évolution de la Civilisation humaine qui marqua à jamais la genèse des Sciences et des techniques et qui anéantit définitivement la mythologie, la superstition, la légende, la magie et le culte des héros. Des savants universels inventèrent et développèrent à un haut niveau les disciplines scientifiques et les méthodes,

c'est à dire l'observation et l'expérimentation, afin de parvenir aux découvertes qui modifièrent profondément les mentalités et les sociétés humaines. Ainsi, l'Univers et la matière apparaissent ô combien subtiles et complexes ! Désormais, l'Homme est entré dans une nouvelle ère, celle de l'époque moderne. La mentalité et la culture des sociétés chrétiennes acceptèrent très péniblement que l'Univers est une réalité régit par des lois. Une dizaine de siècles furent nécessaires à l'assimilation des Sciences et des techniques que leur léguèrent les savants musulmans. Ces derniers ont-ils été gratifiés de ces legs par l'Occident chrétien ? Hélas, les échanges pour la postérité furent pour les uns l'acquisition d'un héritage culturel scientifique, un développement social et une hégémonie sans cesse grandissante ; pour les autres, une succession de tyrans, des Gardiens de la Tradition obscurantistes et rétrogrades, un abrutissement de masse, la suppression des hautes valeurs humaines et la dilution dramatique de la foi qui engendrèrent leur ruine !

Le collier de la colombe Raja Alem, 2012-10-17 Une femme est retrouvée nue, assassinée, le visage défoncé, dans un passage de La Mecque. Cette affaire émeut profondément les habitants de ce quartier et vient réveiller de lourds secrets de famille, d'amours interdites, mais aussi de malversations financières, au sein d'une ville dont l'architecture et le patrimoine religieux excitent la convoitise des sociétés immobilières. L'inspecteur Nasser est chargé de l'enquête, ce qui rompt pour un temps sa routine et sa solitude. Afin d'identifier la victime, il plonge dans les existences tourmentées de deux femmes portées disparues, Aicha et Azza. Institutrice répudiée par son mari, Aicha entretenait en effet une correspondance amoureuse avec un médecin allemand, dont l'inspecteur se délecte. En même temps, il parcourt le journal intime de Youssef, jeune historien amoureux de l'architecture de La Mecque tout autant que d'Azza, jeune femme déterminée à ne laisser aucun sentiment l'asservir. Mais Nasser va croiser des fantômes plus inquiétants. La corruption règne dans cette ville tiraillée entre ses traditions ancestrales et l'élan brutal vers la modernité. La Mecque semble se confier au lecteur, en révélant les enjeux complexes dont elle fait l'objet. Et très vite, on comprend que c'est le coeur sacré de cette ville, la Kaaba, qu'il faut sauver.

Le Royaume de la Liberté NAJJAR HASSEN, 2023-02-19 Un roman intellectuel avec des dimensions et des signes symboliques, dont le héros principal « Salem Ayach » a vécu une expérience existentielle unique en son genre dans le but d'explorer sa véritable nature, libérant par la même occasion sa part illusoire ou artificielle. Salem Ayach vivait en tant que facteur au village maudit de « Béni Hajar », soudain, un vieil homme, d'un âge avancé lui a rendu visite dans son sommeil, en lui apportant une lettre qui a totalement chamboulé sa vie... Il a alors déposé sa démission et s'est exilé dans la région de Béni Yakdan, à côté de la mer... C'est là où il a fait connaissance avec Cheikh Rachid, qui lui a offert l'hospitalité dans sa modeste grotte au flanc de la montagne. Dans un court laps de temps, le lien entre Salem et Cheikh Rachid s'est renforcé, permettant alors au héros de découvrir la lecture et de faire connaissance notamment avec les romans « Le Vieil Homme et la Mer » et « Le Monde de Sophie »... Cheikh Rachid a eu un impact important sur la vie de Salem, malgré son départ soudain,

ce qu'il lui a permis de suivre la bonne voie de l'exploration du Soi...Salem a dû faire face à des aventures aussi extraordinaires qu'attrayantes...

Le Coran Malek Chebel, 2009-06-03 Comment comprendre aujourd'hui un texte arabe du VIIe siècle, qui reste aussi vivant que majeur pour plus d'un milliard et demi d'être humains ? Comment respecter l'esprit du livre sacré des musulmans tout en le rendant accessible aux lecteurs du XXIe siècle, musulmans et non musulmans ? C'est le défi qu'a relevé Malek Chebel. Après des années de labeur, il propose ici une nouvelle traduction du Coran. Précise et respectueuse du texte sacré des musulmans, la présente traduction est de plus fondée sur une connaissance intime de la langue arabe autant que sur une expertise scientifique du monde musulman. Spécialiste incontesté de l'islam depuis un quart de siècle, Malek Chebel, auteur par ailleurs de vingt-sept ouvrages sur la religion du Prophète, a en effet, dans sa jeunesse, appris une grande partie du Coran par cœur, avant d'entreprendre des études de philosophie et d'anthropologie. Conforme à la tradition du point de vue de l'ordre des sourates, du respect absolu du texte et de la restitution du contexte de la Révélation, cette nouvelle traduction du Coran est exempte de tout jugement moral. Elle permet enfin à tous, érudits ou non, de lire le Coran dans son intégralité et dans une langue accessible, c'est-à-dire claire, concise et contemporaine. Pour ne pas alourdir le texte, l'auteur a ajouté des notes techniques au terme de chaque chapitre afin que le lecteur puisse approfondir par lui-même la compréhension des versets. Enfin, sur tous les points majeurs, le lecteur peut encore se référer au Dictionnaire encyclopédique du Coran, dont la lecture est destinée à éclaircir la totalité des concepts du Saint Coran. Bien qu'autonomes dans leur conception, ces deux ouvrages ont été élaborés de façon très complémentaire. Cette nouvelle traduction du Coran constitue un livre événement.

L'univers symbolique des arts islamiques Patrick Ringgenberg, 2009-11-01 Oeuvre de synthèse et de prospection, ce livre tente de renouveler la question du sens et de l'interprétation des arts islamiques. La diversité des arts de l'Islam, de l'Espagne à l'Inde du Nord est irréductible à une analyse uniforme et invariable, mais témoigne de visions et d'inventions analogues et convergentes. Un parcours qui va de la calligraphie à la poésie mystique persane, la musique, les représentations de l'homme et de la nature, l'architecture des villes, les mosquées, les palais, les tombeaux...
