Strength for the Battle Reverend Michael O. Balogun,2020-11-24 This book is a step to step guide on how to put on the whole and perfect armour of God. We put on the armour through the skillful use of the word. Every piece of the armour is put on through the declaration of the word of God in faith and by prayer. There are seven pieces of this armour and you will learn how to put it on skillfully. Be sober, vigilant and prepared before the battle starts against you.

**Armies of Ancient Italy, 753-218 BC** Gabriele Esposito,2021-01-18 A military history of ancient Italy, featuring details of the weapons, equipment, and tactics, as well as color photos showing how warriors looked. Before becoming the masters of the Mediterranean world, the Romans had first to conquer the Italian peninsula in a series of harsh conflicts against its other varied and warlike residents. The outcome was no foregone conclusion and it took the Romans half a millennium to secure the whole of Italy. In *Armies of Ancient Italy 753-218 BC*, Gabriele Esposito presents the armies that fought these wars, in which the Roman military spirit and their famous legions were forged. He not only follows the evolution of the Roman forces from the Regal Period to the outbreak of the Second Punic War but also the forces of their neighbors, rivals and enemies. The most notable of these, the Etruscans, Samnites and the Italian Greeks are given particular attention but others, such as the Celts and Ligures of the North and the warriors of Sicily and Sardinia, are also considered. Details of the

organization, weapons, equipment and tactics of each army are described, while dozens of beautiful color photos of reenactors show how these warriors looked in the field. "Once more, a beautifully illustrated book, this time starting with the story of Rome from the Regal Period to the Second Punic War. The author follows the highly successful format of his books covering the late period of the Roman Empire.—Most Highly Recommended." —Firetrench "An interesting look at all the people of the Italian era, but what really brings it to life are the countless full colour photographs of re-enactor groups in the correct armour and dress for the various tribes and regions they represent. Excellent production standards and a fascinating look at the history of early Rome." —The Armourer

Old English Runes Gaby Waxenberger, Kerstin Kazzazi, John Hines, 2023-04-03 This volume presents contributions to the conference Old English Runes Workshop, organised by the Eichstätt-München Research Unit of the Academy project Runic Writing in the Germanic Languages (RuneS) and held at the Catholic University of Eichstätt-Ingolstadt in March 2012. The conference brought together experts working in an area broadly referred to as Runology. Scholars working with runic objects come from several different fields of specialisation, and the aim was to provide more mutual insight into the various

methodologies and theoretical paradigms used in these different approaches to the study of runes or, in the present instance more specifically, runic inscriptions generally assigned to the English and/or the Frisian runic corpora. Success in that aim should automatically bring with it the reciprocal benefit of improving access to and understanding of the runic evidence, expanding and enhancing insights gained within such closely connected areas of study of the Early-Mediaeval past.

*History of Science and Technology* Mr. Rohit Manglik, 2023-07-23 Traces the chronological development of scientific discoveries and technological innovations, highlighting their influence on modern civilization.

The Oxford Handbook of Engineering and Technology in the Classical World John Peter Oleson, 2008-01-31 Nearly every aspect of daily life in the Mediterranean world and Europe during the florescence of the Greek and Roman cultures is relevant to the topics of engineering and technology. This volume highlights both the accomplishments of the ancient societies and the remaining research problems, and stimulates further progress in the history of ancient technology. The subject matter of the book is the technological framework of the Greek and Roman cultures from ca. 800 B.C. through ca. A.D. 500 in the circum-Mediterranean world and Northern Europe. Each chapter discusses a technology or family of technologies from an analytical rather than descriptive point of view, providing a critical summation of our present knowledge of the Greek and Roman accomplishments in the technology concerned and the evolution of their technical capabilities over the chronological period. Each presentation reviews the issues and recent contributions, and defines the capacities and accomplishments of the technology in the context of the society that used it, the available technological shelf, and the resources consumed. These studies introduce and synthesize the results of excavation or specialized studies. The chapters are organized in sections progressing from sources (written and representational) to primary (e.g., mining, metallurgy, agriculture) and secondary (e.g., woodworking, glass production, food preparation, textile production and leather-working) production, to technologies of social organization and interaction (e.g., roads, bridges, ships, harbors, warfare and fortification), and finally to studies of general social issues (e.g., writing, timekeeping, measurement, scientific instruments, attitudes toward technology and innovation) and the relevance of ethnographic methods to the study of classical technology. The unrivalled breadth and depth of this volume make it the definitive reference work for students and academics across the spectrum of classical studies.

Rome's Imperial Might Amelia Khatri, 2025-01-08 Rome's Imperial Might masterfully explores how a modest settlement along the Tiber River evolved into history's most formidable empire through the sophisticated integration of military prowess, governance, and engineering excellence. The book uniquely weaves together three fundamental pillars of Roman expansion: the development of the world's first professional standing army, the creation of advanced administrative systems, and the implementation of revolutionary engineering projects that facilitated imperial control. Through careful examination of archaeological evidence and contemporary Roman accounts, the narrative traces Rome's remarkable journey from kingdom

to republic to empire. The book reveals how the Romans standardized military training and tactics while simultaneously developing innovations in civil engineering, such as their legendary aqueduct systems and vast road networks. What sets this work apart is its comprehensive analysis of how military victories abroad directly catalyzed social and technological changes within Rome itself, demonstrating the empire's extraordinary adaptive capacity. The chronological progression moves from Rome's founding myths through to the height of imperial power, offering readers a clear understanding of how the Romans continuously absorbed and improved upon the technologies and practices of conquered peoples. The author skillfully balances scholarly depth with accessibility, making complex military strategies and engineering achievements comprehensible to both academics and general readers interested in ancient history. By connecting military expansion with technological innovation and social mobility, the book presents a multifaceted view of how Rome maintained its dominance across three continents for over a millennium.

**An Illustrated History of Health and Fitness, from Pre-History to our Post-Modern World** Roy J.

Shephard,2014-11-27 This book examines the health/fitness interaction in an historical context. Beginning in primitive hunter-gatherer communities, where survival required adequate physical activity, it goes on to consider changes in health and physical activity at subsequent stages in the evolution of "civilization." It focuses on the health impacts of a growing understanding of medicine and physiology, and the emergence of a middle-class with the time and money to choose between active and passive leisure pursuits. The book reflects on urbanization and industrialization in relation to the need for public health measures, and the ever-diminishing physical demands of the work-place. It then evaluates the attitudes of prelates, politicians, philosophers and teachers at each stage of the process. Finally, the book explores professional and governmental initiatives to increase public involvement in active leisure through various school, worksite, recreational and sports programmes.

Rethinking Celtic Art Duncan Garrow,2008-10-01 'Early Celtic art' - typified by the iconic shields, swords, torcs and chariot gear we can see in places such as the British Museum - has been studied in isolation from the rest of the evidence from the Iron Age. This book reintegrates the art with the archaeology, placing the finds in the context of our latest ideas about Iron Age and Romano-British society. The contributions move beyond the traditional concerns with artistic styles and continental links, to consider the material nature of objects, their social effects and their role in practices such as exchange and burial. The aesthetic impact of decorated metalwork, metal composition and manufacturing, dating and regional differences within Britain all receive coverage. The book gives us a new understanding of some of the most ornate and complex objects ever found in Britain, artefacts that condense and embody many histories.

The Oxford Handbook of Roman Britain Martin Millett,Louise Revell,Alison Moore,2016-08-04 This book provides a twenty-first century perspective on Roman Britain, combining current approaches with the wealth of archaeological material

from the province. This volume introduces the history of research into the province and the cultural changes at the beginning and end of the Roman period. The majority of the chapters are thematic, dealing with issues relating to the people of the province, their identities and ways of life. Further chapters consider the characteristics of the province they lived in, such as the economy, and settlement patterns. This Handbook reflects the new approaches being developed in Roman archaeology, and demonstrates why the study of Roman Britain has become one of the most dynamic areas of archaeology. The book will be useful for academics and students interested in Roman Britain.

The Excavations at Dura-Europos ,2004

*Cæsar; a History of the Art of War Among the Romans Down to the End of the Roman Empire ...* Theodore Ayrault Dodge,1920

**The Inner Lives of Ancient Houses** J. A. Baird,2014-08-28 Dura-Europos, on the Syrian Euphrates, is one of the best preserved and most extensively excavated sites of the Roman world. A Hellenistic foundation later held by the Parthians and then the Romans, Dura had a Roman military garrison installed within its city walls before it was taken by the Sasanians in the mid-third century. The Inner Lives of Ancient Houses is the first study to consider the houses of the site as a whole. The houses were excavated by a team from Yale and the French Academy of Inscriptions and Letters in the 1920s and 30s, and though a wealth of archaeological and textual material was recovered, most of that relating to housing was never published. Through a combination of archival information held at the Yale University Art Gallery and new fieldwork with the Mission Franco-Syrienne d'Europos-Doura, this study re-evaluates the houses of the site, integrating architecture, artefacts, and textual evidence, and examining ancient daily life and cultural interaction, as well as considering houses which were modified for use by the Roman military.
