Taxonomy of the birds of the world fotolulu, 2018-10-30 How do you come up with the idea to list all the birds in the world including the subspecies and to give all birds English names? There is a reason for it - my favorite saying, whose author is unknown: Everyone said that's not possible - then there was one who did not know that and just did it! I am an animal photographer and probably a little bit crazy. I've built a complete animal database for mammals and birds over the last decade. This facilitates my work in determining and archiving images and assigning keywords, especially among the many subspecies. With this book, I would like to give all birding friends and ornithologists a complete overview in English. For this I have given unique English names to all subspecies. The naming should not meet any scientific requirements. The names are based on translations from the Latin name, geographical distribution areas and the names of the discoverers. The entries consist of the scientific name, the English name, the distribution areas and the author. I wish you a lot of fun with this book, but especially while watching the fascinating birdlife. fotolulu

Nightjars Nigel Cleere, 2010-08-30 Field guide to nightjars and related bird species, including frogmouths, potoos, owlet-

nightjars and the oilbird. The nightjars and their allies are amongst the most difficult of all birds to identify. Being strictly nocturnal and cryptically patterned in shades of brown, it is often necessary to rely on size, shape, habitat and voice to safely identify a species. The nightjars are by far the largest family in the order and are spread throughout the world. Some species have developed spectacular tails and wing adornments, but the majority are fairly uniform in appearance. They inhabit both forests and deserts and are ground-nesting. Many species are migratory. The forest-dwelling frogmouths of Asia and Australasia and the potoos of Latin America, adopt a less aerial feeding strategy and nest on open branches or in tree crevices. The unique oilbird of South America nests colonially in caves, and the owl-nightjars almost exclusively inhabit Australasia. Featuring thoroughly researched text, both through museums and in the field, this book fully covers this popular group of birds. The illustrations depict feather-by-feather detail, allowing identification of all species of nightjars, and an accompanying CD aids identification through the spectacular voices of many species.

The Birds World Nicolae Sfetcu, 2021-10-25 Birds are among the most extensively studied of all animal groups. Hundreds of academic journals and thousands of scientists are devoted to bird research, while amateur enthusiasts (called birdwatchers or, more commonly, birders) probably number in the millions. Birds are categorised as a biological class, Aves. The earliest known species of this class is *Archaeopteryx lithographica*, from the Late Jurassic period. According to the most recent consensus, Aves and a sister group, the order Crocodilia, together form a group of unnamed rank, the Archosauria. Phylogenetically, Aves is usually defined as all descendants of the most recent common ancestor of modern birds (or of a specific modern bird species like *Passer domesticus*), and *Archaeopteryx*. Modern phylogenies place birds in the dinosaur clade Theropoda. Modern birds are divided into two superorders, the Paleognathae (mostly flightless birds like ostriches), and the wildly diverse Neognathae, containing all other birds.

Ma' Betisek Concepts of Living Things Wazir-Jahan Karim, 2020-08-20 The Ma' Betisek are a group of aborigines who live on the mangrove coastal area of Selangor in peninsular Malaysia. Dr Karim's study is mainly focused on the Ma' Betisek communities on Carey Island, off the west coast of Selangor and in particular three villages - Sungei Sialang, Sungei Mata and Sungei Bumbun. Few changes have taken place in the lives of the Betisek people on the island since 1975. On the

mainland, the Ma' Betisek are busy keeping pace with development and modern life. However, despite increasing deforestation and new urban influences on the island, the Carey Island communities continue to preserve their naturalistic ideas of how humans should live with plants and animals. Dr Karim's research focuses on this issue.

Tawny Frogmouth Gisela Kaplan, 2018-07-01 The tawny frogmouth is one of Australia's most intriguing and endearing birds. Written by award-winning author Gisela Kaplan, one of Australia's leading authorities on animal behaviour and native birds, this second edition of Tawny Frogmouth presents an easy-to-read account of these unique nocturnal birds, which can be found across almost the entire continent. Fully revised and updated throughout, this book combines 20 years of systematic observation with published research and information from regional surveys, and represents the most comprehensive single study ever conducted on tawny frogmouths. We learn that tawny frogmouths are very affectionate, have close bonds with lifelong partners, scream like prowling tomcats when distressed, fight with lightning speed and defend nest sites from reptilian predators by mobbing and spraying pungent faeces at them. Uncompromising male fights are contrasted with the touching gentleness of males as fathers. We also learn how resilient and unusual tawny frogmouths are in the way they cope with heat and cold and scarcity of water, sit out danger, and use a large variety of food items. This fascinating book has a wide appeal to bird lovers, amateur ornithologists and naturalists, as well as those with a scientific or professional interest in

native birds, their communication, emotions and skills.
