Death and Tenses Neil Kenny,2015-12-17 In what tense should we refer to the dead? The question has long been asked, from Cicero to Julian Barnes. Answering it is partly a matter of grammar and stylistic convention. But the hesitation, annoyance, and even distress that can be caused by the wrong tense suggests that more may be at stake—our very relation to the dead. This book, the first to test that hypothesis, investigates how tenses were used in sixteenth and early seventeenth-century France (especially in French but also in Latin) to refer to dead friends, lovers, family members, enemies, colleagues, writers, officials, kings and queens of recent times, and also to those who had died long before, whether Christ, the saints, or the ancient Greeks and Romans who posthumously filled the minds of Renaissance humanists. Did tenses refer to the dead in ways that contributed to granting them differing degrees of presence (and absence)? Did tenses communicate dimensions of posthumous presence (and absence) that partly eluded more concept-based affirmations? The investigation ranges from funerary and devotional writing to Eucharistic theology, from poetry to humanist paratexts, from Rabelais's prose fiction to Montaigne's Essais. Primarily a work of literary and cultural history, it also draws on early modern grammatical thought and on modern linguistics (with its concept of aspect and its questioning of tense), while arguing that neither can fully explain the phenomena studied. The book briefly compares early modern usage with tendencies in modern French and English in the West, asking whether changes in belief about posthumous survival have been accompanied by changes in tense-use.

Semantics and Pragmatics: Drawing a Line Ilse Depraetere,Raphael Salkie,2017-03-16 This book explores new territory at the interface between semantics and pragmatics, reassessing a number of linguistic phenomena in the light of recent advances in pragmatic theory. It presents stimulating insights by experts in linguistics and philosophy, including Kent Bach, Philippe de Brabanter, Max Kölbel and François Recanati. The authors begin by reassessing the definition of four theoretical concepts: saturation, free pragmatic enrichment, completion and expansion. They go on to confront (sub)disciplines that have addressed similar issues but that have not necessarily been in close contact, and then turn to questions related to reported speech, modality, indirect requests and prosody. Chapters investigate lexical pragmatics and (cognitive) lexical semantics and other interactions involving experimental pragmatics, construction grammar, clinical linguistics, and the distinction between mental and linguistic content. The authors bridge the gap between different disciplines, subdisciplines and methodologies, supporting cross-fertilization of ideas and indicating the empirical studies that are needed to test current theoretical concepts and push the theory further. Readers will find overviews of the ways in which concepts are defined, empirical data with which they are illustrated and explorations of the theoretical frameworks in which concepts are couched. This exciting exchange of ideas has its origins in the editors' workshop series on the theme 'The semantics/pragmatics interface: linguistic, logical and philosophical perspectives', held at the University of Lille 3 in 2012-13. Scholars of linguistics, logic and philosophy and those interested in the research benefits of crossing disciplines will find this work both accessible and thought-provoking, especially those with an interest in pragmatic theory or semantics.

Oddíly 3 a 4 tematizují korpus jako výstup, což představuje především srovnání s korpusy rodilých mluvčích a následnou identifikaci „chyb" či problémových oblastí, ale také ukazují, co studenti mohou vědět a skutečně ví v různých úrovních pokročilosti, a pokouší se zodpovědět na otázku, co nám tyto informace říkají o samotném procesu učení.

The Septuagint's Translation of the Hebrew Verbal System in Chronicles Roger Good,2009-12-07 This book is the first detailed investigation of the translation of the Hebrew verbs of Chronicles into Greek, especially from the perspective of two diachronic developments: that of the Hebrew verbal system and that of the trend toward a more literal translation of the Bible. The translation provides a view of the Hebrew verbal system in the Hellenistic period (approx. 150 BCE) as part of the

continuum in the development of the Hebrew verbal system from classical biblical Hebrew to Mishnaic Hebrew. The translation also testifies to the trend in the process of the translation of the Bible from the freer (but still literal) translation of the Pentateuch and Samuel/Kings to the slavishly literal translation of Aquila.

Historical Linguistics 2019 Bethwyn Evans,Maria Kristina Gallego,Luisa Miceli,2024-11-15 This volume comprises a selection of papers that were presented at the 24th International Conference on Historical Linguistics (ICHL24), which took place at the Australian National University (ANU) in Canberra from 1-5 July, 2019. The volume's aim is to reflect the breadth of research presented at the conference, with each chapter representative of a workshop or themed session. A number of chapters present research that explores mechanisms and processes of change within specific domains of language, while others explore interactions of change across linguistic domains. Two chapters represent a common theme at the conference and consider the role of historical linguistics in explaining non-linguistic histories of language diversification.
