Investigating Social Problems A. Javier Trevino, 2014-07-24 "Given the complexity of the issues, the study of social problems requires, indeed demands, specialized focus by experts." -A. Javier Treviño Welcome to a new way of Investigating Social Problems. In this groundbreaking new text, general editor A. Javier Treviño, working with a panel of experts, thoroughly examines all aspects of social problems, providing a contemporary and authoritative introduction to the field. Each chapter is written by a specialist on that particular topic. This unique, contributed format ensures that the research and examples provided are the most current and relevant in the field. The chapters carefully follow a model framework to ensure consistency across the entire text and provide continuity for the reader. The text is framed around three major themes: intersectionality (the interplay of race, ethnicity, class, and gender), the global scope of many problems, and how researchers take an evidence-based approach to studying problems.

Brief sections on training, education, and policy will lay the foundation for assessing evidence-based approaches and outcomes in these diverse populations.

Suspended For Life C. Twiggy Billue, 2014-07-16 "SUSPENDED FOR LIFE" takes an empirical look via real experiences at how Zero Tolerance Policies contained in the schools "Code of Conduct" disregards the rights of the student, especially students with disabilities. These policies are failing students everywhere including my residence of Syracuse New York. Statistically these unfair and biased "Zero Tolerance Policies" have led to very high suspension rates affecting mainly, inner-city students but overwhelmingly target students with IEPs, 504 Accommodations, the "untested but suspected LD student" and the intellectually gifted student. Healthcare, Mental Health and Medical Privacy (HIPPA) now play large roles in school

especially in decisions to suspend a student however coupled with a school districts Code of Conduct they have become a crucial aspect for suspension. Once you understand the link between a referral to “In-School-Suspension (ISSwarehousing students) or a referral for Out-of-School Suspension (OSS—push out of students) you will realize that in most cases suspension can lead directly to the prison industrial complex for our young women and men. Stopping this from happening to your student may depend on how well you are prepared to advocate for your child. We must not allow suspension to push out our children because ostensibly it may be ensuring them a life sentence of unemployment, crime, or even death. We say it starts at home with the parents, so if we can better understand our student’s rights and the rights we have as parents we can better prepare ourselves to advocate for our student and to hold the school district accountable for the Education of Our Children!

Humane Health Care for Prisoners Kenneth L. Faiver, 2017-05-05 A useful research resource and handy reference, this book discusses the many important ethical and legal issues that arise in the delivery of health care to prisoners at correctional facilities. It references national standards of professional practice as well as the advice of recognized experts. The mission of corrections is the care and custody of prisoners with a view to public safety within a place dedicated to punishment, while the mission of the medical and mental health professionals in a corrections facility is to care for the health and well-being of the prisoners. Both have a duty to provide care, but their differing roles and objectives give rise to ethical role conflict and disagreement regarding appropriate care strategies. Humane Health Care for Prisoners considers important ethical and legal issues that arise in the delivery of health care to prisoners, covering topics such as privacy, confidentiality, informed consent, extended isolation and solitary confinement, use of mace, strip searches and body cavity searches, and medical experimentation on prisoners as human subjects. It also considers participation by health care professionals in capital punishment, coerced substance abuse treatment, how much health care to provide, organizational structure and

hierarchy, cooperation between correctional and health care staff, and the importance of recognizing mental illness as a chronic condition. This book is informative for professionals working in corrections facilities, such as physicians, psychiatrists, psychologists, nurses, wardens, jail administrators, sheriffs, and corrections officials, as well as legislators and decision makers, attorneys involved in correctional healthcare lawsuits, students of criminal justice, and those seeking to work in the field of correctional health care or in corrections. Additionally, students and professors of medical ethics will find this book helpful in illustrating real-life topics for research and discussion.
