The Himalayan Face-Off Shishir Gupta,2014-04-15 ?Even if bilateral trade between India and China goes beyond \$100 billion in the coming years, China?s posture towards India is adversarial and will perhaps remain so in the future, with Beijing viewing New Delhi through the prism of the Dalai Lama and the Tibetan government-in-exile? A rising China, inflexible on boundary dispute resolution and with strong tentacles across South Asia and beyond, could encroach on India?s strategic space and lead to a potential crisis this decade.? In April 2013, Indian troops sighted an advance patrol of the Chinese People?s Liberation Army (PLA) 19 km deep within Indian territory, a considerable distance from the Line of Actual

Control, the de facto border claim line that was drawn up after the 1962 war between the two countries ? a war that still traumatizes the mind of India's political and military establishment. Protracted negotiations led to the withdrawal of Chinese troops, but the incursion laid bare the intent of the world's largest standing army. Despite recent advances in the bilateral relationship, highlighted by the nearly \$70 billion trade between the two countries, China continues to regard Indian interests as secondary, and India as a regional adversary. In this breakthrough work, seasoned journalist and author of the bestselling Indian Mujahideen Shishir Gupta details the various advances made by Beijing, particularly the PLA, in encircling India and stifling the latter's bid to break out as an aspiring superpower. Gupta discusses Indian political, diplomatic and military responses to China's assertion in the subcontinent and beyond, and the various course corrections India must undergo in its foreign and defence policies to counter China's might and influence on matters of India's national security. In describing how India must realize and counter China's clout over its friends and enemies if it is to achieve superpower status, Gupta sheds new light on Indo-China relations. The Himalayan Face-Off: Chinese Assertion and the Indian Riposte is an important reminder of the realigned geopolitics of the modern world, where the two most populous nations on the planet are essentially battling each other over their share of the global pie ? sometimes on the world's highest battlegrounds. Resurgence of Nuclear Power Nandakumar Janardhanan, Girijesh Pant, Ravi B. Grover, 2017-09-27 This book focuses on the issue of 'resurgence of nuclear power' and discusses the feasibility of nuclear in the energy mix of Asian economies. It discusses nuclear energy sector in detail in the context of India, a country where currently overseas supply of hydrocarbon fuels plays a major role in meeting the domestic energy needs. The book presents an in-depth analysis of nuclear energy policy as well as regional and global politics surrounding the nuclear industry, and the relevance of nuclear energy from the low-carbon energy perspective. To do so, it explores three different perspectives. To start with, the resurgence of nuclear power is discussed from a global energy perspective to understand whether and how it has been increasingly gaining policy attention among Asian economies. Secondly, it highlights the role of nuclear power in Asia and examines how the collaboration with the global nuclear sector is influencing that role. While the epicentre of nuclear power growth can be seen shifting to the Global East, there is a growing need for strengthening the industry, its legal and regulatory infrastructure and knowledge management. The third perspective focuses on the challenges and opportunities for the nuclear power industry and explores, to what extent the public perception is in favor of nuclear sector in the region. The perceived risks of nuclear power, public perception related to legal and regulatory issues, and concerns regarding land acquisition for nuclear facilities are also discussed. The book contains contributions from specialists in the global energy and nuclear sector, and examines some of the most sought-after topics related to the energy policy studies, especially in the Asian context.

Literature After Globalization Philip Leonard, 2013-02-14 Choice Outstanding Academic Title 2014 Literature after Globalization offers a detailed study of recent literary and theoretical responses to technology, globalization, and national identity. Focusing on texts of the 1990s and 2000s, particularly novels and other writing by Mark Danielewski, Hari Kunzru, Indra Sinha, and Neal Stephenson, it charts a departure from narratives of globalization which declare the collapse of national cultures, and it considers how national sovereignty has been reinvented and reasserted in the face of technology's transnational effects. Drawing upon recent theoretical responses to technology and culture (including work by Yochai Benkler, Manuel Castells, Gilles Deleuze, Jacques Derrida, N. Katherine Hayles, Paul Virilio, and McKenzie Wark) this book will explore how, in these novels, the notion of an inclusive globalization has been replaced by a sense of national globalism.

Liberal Education and Its Discontents Shashikala Srinivasan, 2018-08-06 What explains the peculiar trajectory of the university and liberal education in India? Can we understand the crisis in the university in terms of the idea of education underlying it? This book explores these vital questions and traces the intellectual history of the idea of education and the cluster of concepts associated with it. It probes into the cultural roots of liberal education and seeks to understand its scope, effects and limits when transplanted into the Indian context. With an extensive analysis of the philosophical writing on the idea of university and education in the West and colonial documents on education in India, the book reconstructs the ideas of Gandhi and Tagore on education and learning as a radical alternative to the inherited, European model. The author further reflects upon how we can successfully deepen liberal education in India as well as construct alternative models that will help us diversify higher learning for future generations. Lucid, extensive and of immediate interest, this book will be useful for scholars and researchers interested in the history and philosophy of education and culture, social epistemology, ethics, postcolonial studies, cultural studies and public policy.

Psychoanalysis and Ecology at the Edge of Chaos Joseph Dodds, 2012-03-12 This book argues that psychoanalysis has a

unique role to play in the climate change debate through its placing emphasis on the unconscious dimensions of our mental and social lives. Exploring contributions from Freudian, Kleinian, Object Relations, Self Psychology, Jungian, and Lacanian traditions, the book discusses how psychoanalysis can help to unmask the anxieties, deficits, conflicts, phantasies and defences crucial in understanding the human dimension of the ecological crisis. Yet despite being essential to studying environmentalism and its discontents, psychoanalysis still remains largely a 'psychology without ecology.' The philosophy of Deleuze and Guattari, combined with new developments in the sciences of complexity, help us to build upon the best of these perspectives, providing a framework able to integrate Guattari's 'three ecologies' of mind, nature and society. This book thus constitutes a timely attempt to contribute towards a critical dialogue between psychoanalysis and ecology. Further topics of discussion include: ecopsychology and the greening of psychotherapy our ambivalent relationship to nature and the non-human complexity theory in psychoanalysis and ecology defence mechanisms against eco-anxiety and eco-grief Deleuze|Guattari and the three ecologies becoming-animal in horror and eco-apocalypse in science fiction films nonlinear ecopsychanalysis. In our era of anxiety, denial, paranoia, apathy, guilt, hope, and despair in the face of climate change, this book offers a fresh and insightful psychoanalytic perspective on the ecological crisis. As such this book will be of great interest to all those in the fields of psychoanalysis, psychology, philosophy, and ecology, as well as all who are concerned with the global environmental challenges affecting our planet's future.

Spaces and Places in Western India Bina Sengar, Laurie Hovell McMillin, 2019-09-05 This book studies places and spaces in Western India both as geographical locations and as imagined constructs. It uncovers the rich history of the region from the perspective of places of pilgrimage, commerce, community, expression and indigeneity. The volume examines how spaces are intrinsically connected to the lived experiences of people. It explores how spaces in Western India have been constructed over time and how these are reflected in both historical and contemporary settings – in the art, architecture, political movements and in identity formation. The rich examples explored in this volume include sites of Bhakti and Sufi literature, Maharashtrian-Sikh identity, Mahanubhav pilgrimage, monetary practices of the Peshwas and the internet as an emancipatory space for the Dalit youth in Maharashtra. The chapters in this book establish and affirm the forever evolving cultural topography of Western India. Taking a multidimensional approach, this book widens the scope of academic discussions on the theme of space and place. It will be useful for scholars and researchers of history, cultural studies, geography, the humanities, city studies and sociology.

The Rise and Decline of the Post-Cold War International Order Hanns W. Maull, 2018-10-25 This book surveys the evolution of the international order in the quarter century since the end of the Cold War through the prism of developments in key regional and functional parts of the 'liberal international order 2.0' (LIO 2.0) and the roles played by two key ordering powers, the United States and the People's Republic of China. Among the partial orders analysed in the individual chapters are the regions of Europe, the Middle East and East Asia and the international regimes dealing with international trade, climate change, nuclear weapons, cyber space, and international public health emergencies, such as SARS and ZIKA. To assess developments in these various segments of the LIO 2.0, and to relate them to developments in the two other crucial levels of political order, order within nation-states, and at the global level, the volume develops a comprehensive, integrated framework of analysis that allows systematic comparison of developments across boundaries between segments and different levels of the international order. Using this framework, the book presents a holistic assessment of the trajectory of the international order over the last decades, the rise, decline, and demise of the LIO 2.0, and causes of the dangerous erosion of international order over the last decade.

Angesichts der gegenwärtigen gesellschaftlichen Umbrüche untersucht Ulrike Mothes den aktuellen indischen Dokumentarfilm hinsichtlich seiner filmästhetischen Form und betrachtet seine Positionierung zwischen lokalen und globalen Bezugnahmen, politischem Diskurs und kulturellem Ausdruck. Ihr besonderes Augenmerk liegt dabei auf der Beschreibung offener Erzählstrategien, welche die Annahme von Wahrheit als solcher hinterfragen und mehrere Deutungen eines Themas zulassen.
