How the World Changed Social Media Daniel Miller, Elisabetta Costa, Nell Haynes, Tom McDonald, Razvan Nicolescu, Jolynna Sinanan, Juliano Spyer, Shriram Venkatraman, Xinyuan Wang, 2016-02-29 How the World Changed Social Media is the first book in Why We Post, a book series that investigates the findings of anthropologists who each spent 15 months living in communities across the world. This book offers a comparative analysis summarising the results of the research and explores the impact of social media on politics and gender, education and commerce. What is the result of the increased emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How did memes become the moral police of the internet? Supported by an introduction to the project's academic framework and theoretical terms that help to account for the findings, the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences

Deepening the Understanding of Social Media's Impact in Southeast Asia Ross Tapsell,2020-03-27 Southeast Asia's Internet users are far more diverse than usually reported. They range from the urban youth with laptops and highspeed Wi-Fi, to the older generation semi-rural and rural users with affordable mobile phones for Facebook and WhatsApp. Southeast Asians generally trust social media platforms more than in Western societies. This trust in social media reflects a lack of trust in local mainstream media and official sources of information. What campaign information (and disinformation) is being spread and which ones are most successful are essential for understanding how voters in Southeast Asia use and trust social media. Social media platforms and Southeast Asia's "app industry" need clearer and enforced regulation on their use of data and the extent to which they can sell data to advertisers. These advertisers include, but are not limited to, politicians and political parties. Since the future of social media usage will likely lie in closed groups, the role of big data analyses that have dominated research on social media over the past ten years, is likely to regress. Instead, ethnographic scholars who can access these groups and engage with their particular interests and identities are more likely to be useful in understanding the digital sphere in the future.
