**Classified** Henry Vinson, 2023-05-08 Don't be the best in the world at what you do; be the only one in the world who does what you do. --Jerry Garcia Government Contracting Classified is a book of issues and problems concerning government contracting. Henry was raised in a small town (population about eighty) in Northern Middle Tennessee three miles from the Kentucky border. That area is now known as Land Between the Lakes National Recreation Area. That town was Model, Tennessee. He retired after thirty-two years from the federal government as a federal contracting officer and division chief with an unlimited warrant. Then he ran the Center for Government Contracting at the Dallas County Community College Small Business Development Center (SBDC), where he taught seminars and counseled contractors about government contracting. After that for nine years, he owned his own business, where he wrote technical proposals for contractors. His last position was on the staff of the University of Texas at Arlington Cross Timbers Procurement Technical Assistance Center, and he retired after more than fourteen years. He conducted government contracting webinars/seminars and did one-on-one counseling with potential and current government contractors (small, medium-sized, and large contractors). He worked with federal, state, and local governments. Henry has conducted over seven hundred webinars/seminars, mostly in Texas, over the past twenty-five years. He counseled thousands of contractors and had thousands in his seminars. During his time as a Contracting Officer with an unlimited warrant and working for colleges and universities, he noticed several issues and problems kept coming up over and over. He has identified many of those issues and problems. He points them out in this book with commentary. Although this book is not all-inclusive, it does identify many issues and problems that should be of interest to newcomers and the seasoned government contractor as well. Henry not only points out important issues and problems but provides his personal comments (with seriousness and humor). I assure you before God that what I am writing you is no lie. --Galatians 1:20

Is Inequality in America Irreversible? Chuck Collins,2018-04-27 We are living in a time of extreme inequality: America's three richest people now own as much wealth as the bottom half of the population. Although most accept that this is grotesque, many politicians accept it as irreversible. In this book, leading US researcher and activist Chuck Collins succinctly diagnoses the drivers of rampant inequality, arguing that such disparities have their roots in 40 years of the powerful rigging the system in their favor. He proposes a far-reaching policy agenda, analyzes the barriers to progress, and shows how transformative local campaigns can become a national movement for change. This book is a powerful analysis of how the plutocracy sold us a toxic lie, and what we can do to reverse inequality.

**Born on Third Base** Chuck Collins,2016-09-23 "A call to action for America's wealthy and a warning shot across the bows of their yachts if they fail to act, Born on Third Base offers a clear and compelling case for why the privileged and powerful must act to reverse widening inequality of income, wealth, and political power in America."—Robert B. Reich, former US Secretary of Labor; author of Saving Capitalism An essential piece of reading for anyone concerned by the increasing wealth inequality-made worse by the global pandemic and political partisanship The growing wealth inequality continues to dominate headlines. The divide between the haves and have nots in America is increasingly political and tensions are rising. On one side, the wealthy wield power and advantage, keeping the system operating in their favor—all while retreating into enclaves that separate them further and further from the poor and working class. On the other side, those who find it increasingly difficult to keep up or get ahead are desperate and frustrated —waging a rhetorical war against the rich and letting anger and resentment keep us from seeing new potential solutions. But can we suspend both class wars long enough to consider a new way forward? Is it really good for anyone that most of society's wealth is pooling at the very top of the wealth ladder? Does anyone, including the one percent, really want to live in a society plagued by economic apartheid? It is time to think differently, says longtime inequality expert and activist Chuck Collins. Born into the one percent, Collins gave away his inheritance at 26 and spent the next three decades mobilizing against inequality. He uses his perspective from both sides of the divide to deliver a new narrative. Collins calls for a ceasefire and invites the wealthy to come back home, investing themselves and their wealth in struggling communities. And he asks the non-wealthy to build alliances with the one percent and others at the top of the wealth ladder. Stories told along the way explore the roots of advantage, show how taxpayers subsidize the wealthy, and reveal how charity, used incorrectly, can actually reinforce

extreme inequality. Readers meet pioneers who are crossing the divide to work together in new ways, including residents in the author's own Boston-area neighborhood who have launched some of the most interesting community transition efforts in the nation. In the end, Collins's national and local solutions not only challenge inequality but also respond to climate change and offer an unexpected, fresh take on one of our most intransigent problems.

**Regulating Content on Social Media** Corinne Tan, 2018-03-26 How are users influenced by social media platforms when they generate content, and does this influence affect users' compliance with copyright laws? These are pressing questions in today's internet age, and *Regulating Content on Social Media* answers them by analysing how the behaviours of social media users are regulated from a copyright perspective. Corinne Tan, an internet governance specialist, compares copyright laws on selected social media platforms, namely Facebook, Pinterest, YouTube, Twitter and Wikipedia, with other regulatory factors such as the terms of service and the technological features of each platform. This comparison enables her to explore how each platform affects the role copyright laws play in securing compliance from their users. Through a case study detailing the content generative activities undertaken by a hypothetical user named Jane Doe, as well as drawing from empirical studies, the book argues that - in spite of copyright's purported regulation of certain behaviours - users are 'nudged' by the social media platforms themselves to behave in ways that may be inconsistent with copyright laws. Praise for *Regulating Content on Social Media* 'This book makes an important contribution to the field of social media and copyright. It tackles the real issue of how social media is designed to encourage users to engage in generative practices, in a sense effectively "seducing" users into practices that involve misuse or infringement of copyright, whilst simultaneously normalising such practices.' Melissa de Zwart, Dean of Law, Adelaide Law School, Australia This timely and accessible book examines the regulation of content generative activities across five popular social media platforms - Facebook, Pinterest, YouTube, Twitter and Wikipedia. Its in-depth, critical and comparative analysis of the platforms' growing efforts to align terms of service and technological features with copyright law should be of great interest to anyone studying the interplay of law and new media.
