The entries, written by more than 150 distinguished scholars, describe the origins and meanings of each term, the history and context of its usage, its translations into other languages, and its use in notable texts. This Earthly Life Matters Arnold A. van Ruler, 2023-06-06 Arnold A. van Ruler was one of the most original Dutch Reformed theologians of the twentieth century. Through the term re-creation (Dutch: *herscheping*) he offers a radical affirmation of God's sustained loyalty to that which is material, bodily, and earthly. God's work of salvation and of consummation is necessary but then for the sake of creation. The path that he followed was diametrically opposed to that of Karl Barth and is also distinct from that of Jurgen Moltmann (who was influenced by Van Ruler). As an early exponent of Christian ecotheology, Van Ruler's oeuvre provides exceptionally rich resources for contemporary debates. This volume offers an English translation of selected essays by Van Ruler on the themes of God, creation, providence, humanity, sin, this earthly life, and animal protection. It includes some famous essays, for example, on God and chaos, the sunny side of sin, joy as the fundamental Christian attitude to life, and this earthly life. The selection is based on volume 3 of the Dutch scholarly edition of Van Ruler's Collected Works (published in 11 volumes). Few of Van Ruler's texts are available in English, so this volume provides a welcome addition.

Matters of Spirit F. Scott Scribner, 2015-10-13 This book offers a radically new interpretation of the entire philosophy of J. G. Fichte by showing the impact of nineteenth-century psychological techniques and technologies on the formation of his theory of the imagination—the very centerpiece of his philosophical system. By situating Fichte's philosophy within the context of nineteenth-century German science and culture, the book establishes a new genealogy, one that shows the extent to which German idealism's transcendental account of the social remains dependent upon the scientific origins of psychoanalysis in the material techniques of Mesmerism. The book makes it clear that the rational, transcendental account of spirit, imagination, and the social has its source in the psychological phenomena of affective rapport. Specifically, the

imagination undergoes a double displacement in which it is ultimately subject to external influence, the influence of a material technique, or, in short, a technology.

Rhetoric at the Non-Substantialistic Turn Therese Boos Dykeman,2018-05-04 Rhetoric at the Non-Substantialistic Turn: The East-West Coin presents a unique theory of rhetoric that encompasses both Eastern and Western approaches. Based on the Field-Being philosophy founded by Lik Kuen Tong, this theory gives an account of the ontological foundations of both kinds of rhetoric. Beginning with an exposition of the nature of Field-Being rhetoric as Eastern and Western, this book presents chapters on Eastern and Western rhetoric over history as power, ethics, art, creativity, politics, and communication. It acknowledges the thinking of many philosophers and rhetoricians who have contributed to East-West comparative studies in both fields and argues that both understandings of rhetoric are necessary for global communication.

Dictionary of Scholastic Philosophy Bernard Wuellner,2024-09-04 The scholastic philosopher is interested in definition for a different reason than the lexicographer and linguist. The philosopher is trying to learn things. He defines, after investigating reality, in an attempt to describe reality clearly and to sum up some aspect of his understanding of reality. Hence, we find our scholastic philosophers adopting as a main feature of their method this insistence on defining, on precise and detailed explanation of their definitions, and on proving that their definitions do correctly express what a nature or activity is. A dictionary of the language of scholastic philosophy fitted to the needs of beginners and of undergraduate students of the subject is not available in English. About the Author Bernard Wuellner S.J. was chairman of the University of Detroit philosophy department from 1938 to 1943, when he came to Loyola University to teach, write and edit various publications. He was on the Loyola faculty from 1943 until 1952, and from 1959 until 1962. He has also held philosophy teaching positions at Carroll University in Cleveland and Xavier University in Cincinnati. Father Wuellner wrote six books dealing with philosophy and theology. Wuellner died in 1997.

The Understanding of Nature Marjorie Grene, 2012-12-06 No student or colleague of Marjorie Grene will miss her incisive presence in these papers on the study and nature of living nature, and we believe the new reader will quickly join the stimulating discussion and critique which Professor Grene steadily provokes. For years she has worked with equally sure knowledge in the classical domain of philosophy and in modern epistemological inquiry, equally philosopher of science and metaphysician. Moreover, she has the deeply sensible notion that she should be a critically intelligent learner as much as an imaginatively original thinker, and as a result she has brought insightful expository readings of other philosophers and scientists to her own work. We were most fortunate that Marjorie Grene was willing to spend a full semester of a recent leave here in Boston, and we have on other occasions sought her participation in our colloquia and elsewhere. Now we have the pleasure of including among the Boston Studies in the Philosophy of Science this generous selection from Grene's philosophical inquiries into the understanding of the natural world, and of the men and women in it. Definition in Greek Philosophy David Charles,2010-08-19 Socrates' greatest philosophical contribution was to have initiated the search for definitions. In *Definition in Greek Philosophy* his views on definition are examined, together with those of his successors, including Plato, Aristotle, the Stoics, Galen, the Sceptics and Plotinus. Although definition was a major pre-occupation for many Greek philosophers, it has rarely been treated as a separate topic in its own right in recent years. This volume, which contains fourteen new essays by leading scholars, aims to reawaken interest in a number of central and relatively unexplored issues concerning definition. These issues are briefly set out in the Introduction, which also seeks to point out scholarly and philosophical questions which merit further study.
