*Syracuse, the Fairest Greek City* Maxwell Lincoln Anderson, Museo archeologico regionale "Paolo Orsi", 1989 Cicero said of ancient Syracuse in Sicily that it was the largest and the loveliest of all cities. Over four thousand objects from excavations, displayed at the Museo Archeologico Regionale Paolo Orsi, bear ample testimony to the city's status as perhaps the most powerful and cultured city in the Greek world. Still, many more exquisite objects remain in storerooms. This collection brings to light some of these stored ancient treasures, which together comprise an artistic portrait of Greek Syracuse. The catalog includes eight scholarly essays that place the artifacts against the background of the social, political, economic, and religious framework of the polis.

**The So-called Nonsense Inscriptions on Ancient Greek Vases** Sara Chiarini, 2018-08-07 As the first extensive survey of the ancient Greek painters' practice of writing nonsense on vases, *The So-called Nonsense Inscriptions on Ancient Greek Vases* by Sara Chiarini provides a systematic overview of the linguistic features of the phenomenon and discusses its forms and contexts of reception. While the origins of the practice lie in the impaired literacy of the painters involved in it, the extent of the phenomenon suggests that, at some point, it became a true fashion within Attic vase painting. This raises the question of the forms of interaction with this epigraphic material. An open approach is adopted: "reading" attempts, riddles and puns inspired by nonsense inscriptions could happen in a variety of circumstances, including the symposium but not limited to it.

**The Early Black-Figured Pottery of Attika in Context (c. 630-570 BCE)** Alexandra Alexandridou, 2010-12-17 Based

on the archaeological context of the vessels, this book offers an overview of the production and distribution of early Attic black-figured pottery until the end of the first quarter of the sixth century B.C., aiming at an afresh approach to early Archaic Attika.

**The Oxford History of the Archaic Greek World** Paul Cartledge, Paul Christesen, 2025-05-16 The ancient Greek world consisted of approximately 1,000 autonomous polities scattered across the Mediterranean basin and was remarkable for both its diversity and its uniformity. As Greeks dispersed throughout the Mediterranean, the different environmental and human ecosystems they encountered created important differences among widely scattered settlements: each Greek community developed its own unique set of socio-political institutions and social practices. Nonetheless, despite their dispersal and diversity, Greek communities were bound together by a network of commercial, cultural, diplomatic, and military ties and shared important commonalities, most notably language and religion. The Oxford History of the Archaic Greek World, a collaborative effort by more than forty eminent scholars, offers twenty-two detailed and comprehensive studies of key sites from across the Greek world in the period between c. 750 and c. 480 BCE. During that period, Greeks confronted a series of demographic, political, social, and economic challenges and generated an array of responses that transformed the ways in which they lived, worked, and interacted. Much of what is now seen as distinctive about Greek culture--such as democracy, stone temples, and nude athletics--first developed during the Archaic period. The series is organized alphabetically by polis. Volume VI contains detailed and up-to-date studies of Rhodes, Sicyon, Syracuse, Thebes, and Western Sicily. Together with the other volumes in the series, The Oxford History of the Archaic Greek World offers a new and unique resource for the study of ancient Greece that will transform how we understand a crucial era in antiquity.

*A Cultural History of the Sea in Antiquity* Marie-Claire Beaulieu, 2023-02-09 The sea is omnipresent in the ancient cultures of the Mediterranean basin. It is an inexhaustible source of food, but also a well-traveled roadway and a means to communicate, trade with, or wage war against one's neighbors. Perhaps because these practical meanings of the sea were so deeply embedded in daily life, the sea also had a profound religious and symbolic significance for ancient people, from the worship of sea-deities by anxious mariners to the creation of intricate literary devices based on 'the wine-dark sea' and concepts such as insularity. People even imagined that, at the edge of the world, where the ocean meets the sky, was the entrance to the Underworld as well as to Olympus, the realm of the gods. In between these distant mythical shores and the well-known contours of the Mediterranean was a space where all utopias and dystopias could be projected—a space to discover and rediscover endlessly. This volume addresses the constant interplay between the real and the imaginary significance of the sea in ancient thought, from philosophy and science to shipbuilding, trade routes, military technology, poetry, mythmaking, and iconography. The volume spans a period of almost two millennia and an area that covers Spain to India and China, and West Africa to the British Isles, demonstrating the global interconnection of cultures and trade, conceived in its broadest possible sense, in the ancient world.

*Pots & Plays* Oliver Taplin, 2007-10-15 This interdisciplinary study opens up a fascinating interaction between art and theater. It shows how the mythological vase-paintings of fourth-century B.C. Greeks, especially those settled in southern Italy, are more meaningful for those who had seen the myths enacted in the popular new medium of tragedy. Of some 300 relevant vases, 109 are reproduced and accompanied by a picture-by-picture discussion. This book supplies a rich and unprecedented resource from a neglected treasury of painting.

**Technology, Crafting and Artisanal Networks in the Greek and Roman World** Diego Elia,Eleni Hasaki,Marco Serino,2024-12-02 This volume aims to merge theoretical models with methodological approaches on ceramic technology and artisanal networks in the Classical world. This convergence of analytical frameworks allowed scholars to explore some traditional archaeological topics that usually have a very low-level of visibility, such as the skillful gestures of the craftspeople involved, the organization of the ceramic production, the dynamics of apprenticeship and knowledge transfer as well as intra and inter-regional artisanal mobility, in the Graeco-Roman 'communities of practice'. The papers promote interdisciplinary dialogues among various fields of study, such as archaeology, archaeometry, anthropology, ethnoarchaeology, experimental archaeology, and digital humanities - such as Social Network Analysis, computational imaging, and big data analysis.

**Digital and Traditional Epigraphy in Context** Silvia Orlandi,Raffaella Santucci,Francesco Mambrini,Pietro Maria Liuzzo,2017-07-01 This volume collects the proceedings of the final conference of the European project EAGLE (Europeana

network of Ancient Greek and Latin Epigraphy), held at the Sapienza University of Rome on January 28-30th 2016.

Approaching the Ancient Artifact Amalia Avramidou, Denise Demetriou, 2014-08-25 This volume consists of forty contributions written by an internationally renowned selection of scholars. The authors adopt an interdisciplinary methodology, examining both literary and archaeological sources, and a comparative perspective that transgresses national, chronological, and cultural boundaries, in order to investigate the nature of the links between text and image. This multifaceted approach to the study of ancient artifacts enables the authors to treat art and artistic production as activities that do not merely mirror social or cultural relationships but rather, and more significantly, as activities that create social and cultural relationships. The essays in this book are motivated by their authors' belief that there is no simple direct link between art and myths, art and text, or art and ritual, and that art should not be delegated to the role of a by-product of a literate culture. Instead, the contextual and symbolic analyses of artifacts and representations offered in this volume elucidate how art actively shaped myth, how it changed texts, how it transformed ritual, and how it altered the course of local, regional, and Mediterranean histories.
