Learn Punjabi: Sentence Structure Made Easy, 2017-01-04 *Learn Punjabi: Sentence Structure Made Easy* is the essential guide to learning Punjabi for beginners. This book is a step by step course designed specifically for learners who are from an English speaking background. The main emphasis throughout the book is word order. It is vital for an English speaking person who wants to learn Punjabi to focus not only on pronunciation and vocabulary but also on learning how to order those new words into a sentence. The explanation of grammar is simple and easy to understand. Each lesson builds on the previous lesson in a logical order and provides practical exercises so that the student can immediately apply what is being taught.

Basque and Romance Ane Berro, Fernández Beatriz, Jon Ortiz de Urbina, 2019-05-07 This is a collection of articles describing and analyzing several of the most important morphosyntactic features for which the formal comparison between Basque and its surrounding Romance languages is relevant, such as word order, inflection, case, argument structure and causatives. In the context of a language virtually all of whose speakers are bilingual in either Spanish or French, the theoretically informed in-depth description offered in this volume focuses on the fine grain of linguistic structures from languages typologically quite apart but coexisting and probably interacting in the minds of speakers. It therefore aims at shedding some light on the types of interactions between different systems and on the systems themselves.

The Routledge Companion to Linguistics in India Hemalatha Nagarajan, 2022-10-20 This companion offers a unique introductory study of linguistics in India. Well supplemented with sample problems and linguistic puzzles to bolster analytical skills and logical reasoning, it promotes a unique inquiry-based approach to learning linguistics. The volume looks at all the major subdisciplines of linguistics, including phonetics, phonology, morphology, semantics, syntax, and the interdisciplinary domains of psycholinguistics and neurolinguistics. It provides a wealth of data not only from many Indian languages belonging to the primary language families present in the country – Indo-Aryan, Dravidian, Austro-Asiatic, and Tibeto-Burman – but also from the endangered languages of the Tai-Kadai family of Assam and the Greater Andamanese family. The author gives a holistic view of the linguistic landscape of India and fills a significant gap in the study of the lesser-known languages of South Asia. This volume will be an excellent resource for students and researchers of Indian languages, cultural studies, South Asian studies, and all branches of linguistics.

English Phonology and Pronunciation Teaching Pamela Rogerson-Revell, 2011-03-03 This book aims to provide a clear description of key aspects of English phonology in order to help teachers diagnose and prioritize problem areas in pronunciation. It also aims to develop an awareness of current issues and relevant research in the field to inform teachers' decisions, not only about what to teach, but how to teach pronunciation, particularly in EIL contexts. Specifically, it aims to enable readers to: * Understand key terms and concepts in phonology and phonetics * Become aware of current issues and debates in research and apply these to pronunciation teaching, particularly in EIL contexts * Conduct phonological analysis of learner language, including phonemic transcription * Diagnose and assess learner's pronunciation difficulties and needs * Plan a structured pronunciation syllabus The book assumes no prior knowledge and is a key resource for both newcomers and experienced practitioners in the fields of English Language Teaching as well as students of applied linguistics.

Computers and Translation H. L. Somers, 2003-01-01 Designed for translators and other professional linguists, this work attempts to clarify, explain and exemplify the impact that computers have had and are having on their profession. The book concerns machine translation, computer-aided translation and the future of translation and the computer.

Management of Communication Needs in People with Learning Disability Sam Abudarham, Angela Hurd, 2002-04-29 This practically oriented book has been predominantly targeted at undergraduate speech and language therapy students, speech and language therapists who have recently started work in this field and other professionals working with people with learning disabilities. All the authors have had practical experience and/or conducted research in this field. The presentation of the chapters follows a 'need to know' order, starting with an exploration of a range of 'Service Delivery' issues, continuing with theoretical and practical issues related to 'Appraisal and Assessment of Communication Needs' and quickly moving on to management issues starting with 'Management Models' which is followed by a chapter on 'Early Intervention', work on 'Pre-symbolic and Pre-linguistic' development, and transition from 'Word to Phrase'. For those requiring to extend their knowledge in more specialised areas, a number of chapters deal with subjects such as the use of 'Augmentative and Alternative Communication', and working with 'Parents and Members of Related Professions'. The last two chapters address topics which have more recently attracted attention, these being the management of the communication needs of service users with 'Challenging Behaviour' and those with 'Dual Diagnosis' (learning disability and mental illness combined). Most chapters include case studies to illustrate a number of practice issues. Whereas the main focus is on children with learning disability, where appropriate discussion relevant to adults with learning disability is included.
