[The Power of Christian Contentment](#) Andrew M. Davis,2019-03-19 It may surprise modern Christians that our current problems with discontentedness are anything but new. In 1643, Puritan pastor Jeremiah Burroughs wrote a work titled The Rare Jewel of Christian Contentment that has as much resonance in our day as it did in his. Now pastor and author Andrew M. Davis helps contemporary Christians rediscover the remarkable truths found in this largely forgotten work. With powerful new illustrations and a keen sense of all that makes modern Christians restless, Davis challenges readers to confront the sources of discontent in their lives and embrace Paul's teaching on contentment in all circumstances. He gives special

attention to maintaining contentment through poverty and prosperity, as well as in our marriages, and offers tips on teaching children how to be content in an age of smartphones and social media.

The Power of Inaction Cornelia Woll,2014-04-17 Bank bailouts in the aftermath of the collapse of Lehman Brothers and the onset of the Great Recession brought into sharp relief the power that the global financial sector holds over national politics, and provoked widespread public outrage. In *The Power of Inaction*, Cornelia Woll details the varying relationships between financial institutions and national governments by comparing national bank rescue schemes in the United States and Europe. Woll starts with a broad overview of bank bailouts in more than twenty countries. Using extensive interviews conducted with bankers, lawmakers, and other key players, she then examines three pairs of countries where similar outcomes might be expected: the United States and United Kingdom, France and Germany, Ireland and Denmark. She finds, however, substantial variation within these pairs. In some cases the financial sector is intimately involved in the design of bailout packages; elsewhere it chooses to remain at arm's length. Such differences are often ascribed to one of two conditions: either the state is strong and can impose terms, or the state is weak and corrupted by industry lobbying. Woll presents a third option, where the inaction of the financial sector critically shapes the design of bailout packages in favor of the industry. She demonstrates that financial institutions were most powerful in those settings where they could avoid a joint response and force national policymakers to deal with banks on a piecemeal basis. The power to remain collectively inactive, she argues, has had important consequences for bailout arrangements and ultimately affected how the public and private sectors have shared the cost burden of these massive policy decisions.
