Spiritual Care for Allied Health Practice Lindsay B. Carey, Bernice A. Mathisen, 2018-06-21 This textbook explains the importance of Allied Health Professionals providing spiritual care and gives applied information on how this can be done. The first book of its kind, it is essential reading for AHPs and students in order to understand how to give holistic and patient centred care.

Higher Education and the Future of Graduate Employability Ruth Bridgstock, Neil Tippet, 2019 This book challenges the dominant 'employability skills' discourse by exploring socially connected and networked perspectives to learning and teaching in higher education. Both learning and career development happen naturally and optimally in ecologies, informal communities and partnerships. In the digital age, they are also highly networked. This book presents ten empirical case studies of educational practice that investigate the development of learner capabilities, teaching approaches, and institutional strategies in higher education, to foster lifelong graduate employability through social connectedness.

An Introduction to Community and Primary Health Care Diana Guzys, Eileen Petrie, 2013-10-30 Community nursing is the fastest growing area of nursing practice in Australia. This book offers an engaging introduction to the theory, skills and application of community and primary health care. Based on the 'Social Model of Health', *An Introduction to Community and Primary Health Care* explores how social and environmental factors impact healthcare in Australian communities. It discusses the principles of health and mental health promotion, the importance of cultural competence and the practice of community needs assessment. The book is divided into three parts - theory, skills and health professionals in practice. This latter section is unique to this book and encourages students to consider how various nursing roles address issues of social justice, equality and access. Readable and highly practical, *An Introduction to Community and Primary Health Care* equips students with the theory, skills and understanding they will need as community and primary healthcare professionals working across Australia.

An Introduction to Community and Primary Health Care in Australia Diana Guzys, Eileen Petrie, 2013-10-30 Offers an engaging introduction to the theory, skills and application of community and primary health care.

New Methods in Social Justice Research for the Twenty-First Century Alphia Possamai-Inesedy, Gabrielle Gwyther, 2013-09-13 This book provides a source of innovative theories and data for researchers grappling with social justice methodology and research methods in an environment constrained by funding agendas. This book foregrounds and promotes creativity and imagination within a critical frame of reference to challenge the status quo. It invites people into creative spaces for thinking about and researching 'the social'. With/in these spaces both the processes of social justice research (methodology) and the presentation of the research (re-presentation) are seen as being intertwined. This book explores methodologies which include, but are not limited to: writing as inquiry; performance ethnography; emotional geographies; arts-based inquiry; autoethnography; evocative inquiry; reader's theatre. This may include poetry, monologues, art, music, dance, and other creative mediums. Many of these methods are not new per se. What is new is the blurring of traditional research boundaries, for example between the social sciences and the arts, and the initial movement of these methods from the margins to the mainstream in the search for more successful ways to effect social justice outcomes. This book was published as a special issue of the International Journal of Social Research Methodology.

Public Health Pranee Liamputtong, 2019-05-16 Provides students with an overview of Australian and international public health issues and contexts.

Paramedic Principles and Practice ANZ - E-Book Hugh Grantham, 2015-04-29 Paramedic Principles and Practice ANZ: A clinical reasoning approach explores the principles of clinical practice for paramedics working in Australia and New Zealand today. The text is an invaluable resource for both students and paramedics working in the emergency environment where critical decisions must be made quickly and confidently. Organised into three sections - Paramedic Principles, Paramedic Practice and Essential Knowledge — this resource promotes an understanding of basic physiology, clinical decision making and application to practice. It emphasises the importance of professional attitudes and behaviours, clinical competence, teamwork and communication skills, equipping the reader with the skills required to become an effective paramedic. - ● First paramedic-specific text for Australia and New Zealand - ● Evidence-based clinical decision-making model - ● A wealth of detailed case studies that help bridge the gap from principles to practice - ● More than 40 essential pathologies covering common paramedic call-outs - ● Focus on the wellbeing of the patient and the paramedic - ●

Appendices comprising a professional role guide and medications commonly encountered in the paramedic setting

Psychiatric & Mental Health Nursing - E-Book Ruth Elder,Debra Nizette,Katie Evans,2011-06-02 The new edition of Psychiatric and Mental Health Nursing focuses on practice in mental health and psychiatric care integrating theory and the realities of practice. Mental wellness is featured as a concept, and the consideration of a range of psychosocial factors helps students contextualise mental illness and psychiatric disorders. The holistic approach helps the student and the beginning practitioner understand the complex causation of mental illness, its diagnosis, effective interventions and treatments, and the client's experience of mental illness.

Complementary Medicine in Australia and New Zealand Hans Baer,2015-07-17 In the late nineteenth century on the eve of the formation of Australia as a nation-state in 1902, the Australian medical system could be best described as a pluralistic one in the sense that while regular medicine constituted the predominant medical system, it was not clearly the dominant one in that regular physicians faced competition from a wide array of alternative practitioners. As regular medicine increasingly assumed the guise of being scientific, it evolved into biomedicine and developed a link with corporate and state interests in the early twentieth century in Australia, as in other capitalist developed societies. Relying upon state support, Australian biomedicine has achieved dominance over alternative medical system, such as homeopathy, herbal medicine, osteopathy, chiropractic, and naturopathy. Various social forces, particularly the development of the holistic health movement, have served to challenge biomedical dominance in Australia, like elsewhere. What started out as a popular health movement in the early 1970s has evolved into the professionalized entity that is generally referred to as 'complementary medicine' in Australia (as opposed to 'complementary and alternative medicine' in the US and UK). Complementary medicine in Australia encompasses many medical systems and therapies. Since the 1980s certain heterodox medical systems, particularly chiropractic, osteopathy, acupuncture and Chinese medicine, naturopathy, Western herbalism, and homeopathy, have achieved considerable recognition from the Australian state, either at the federal level or at the state and territorial levels. Indeed, the Australian state appears to have gone further than any other Anglophone country in terms of providing public funding for complementary medicine education. Conversely, it has committed a limited amount of funding for complementary medicine research compared to the United States.

Psychology Suzie Morony,2006

Pharmacology in Nursing Bonita Broyles,Gayle McKenzie,Sussan Pleunik,Rachel Page,Barry Reiss,Mary Evans,2019-10-24 Pharmacology in Nursing, Australian and New Zealand 3rd Edition focuses on the use of drugs as medications within the healthcare environment in Australia and New Zealand. This text is a resource for nurses and health professionals in their understanding of drugs and their actions, especially with regard to the responsibilities of nurses in relation to medication administration and patient management. The text introduces medications and medication therapies,

and the principles and methods of medication administration, with an emphasis on the implications for nursing care. Specific medication therapy considerations for vulnerable groups are presented to highlight the special concerns for these groups. A review of dosage calculations is also included. The text takes a body systems approach, focusing on the pharmacology of the medications that act on the various body systems and their disorders.

Forensic Approaches to Death, Disaster and Abuse Marc Oxenham, 2008 During the last 100 years infant mortality rates have improved dramatically, yet even in a developed country such as Australia the physical health of infants varies greatly, despite advances in science and technology. It has now become clear that emotional and physical development is affected by many different variables. Not only must physical development and health support be adequate, but the presence of factors such as good-enough parenting, and the absence of others such as substance abuse and domestic violence, are now becoming better understood. So how best to work with families where infants are at risk? This is the substance of this book: to understand how to achieve improved outcomes for infants growing up in situations of risk, mainly in the area of the parents' mental health, but also in other related psychosocial circumstances that may impair parental functioning. These include migration, substance abuse, and infant hospitalisation. Throughout this book, the authors examine the effects of adverse life circumstances on infant and family and, in most cases, also describe assessments and interventions. Several chapters have been written by people personally affected by mental illness, or mental illness of a family member. This provides in-depth and often poignant understanding of the perspective of those living with the effects of such illnesses, and helps to expand our knowledge and skills to work with at-risk families.

Research Handbook on Transnational Corporations Alice de Jonge, Roman Tomasic, 2017-01-27 Transnational corporations (TNCs) have moved to the forefront of regulatory governance both within states and in the international arena. The Research Handbook on Transnational Corporations provides expert background commentary and up-to-date insights into regulatory frameworks impacting on TNCs at global, industry and national levels. Written by global experts in their field, this unique collection of essays provides in-depth understanding of how the forces of globalisation affect the world's largest corporations, and how those corporations, in turn, shape globalisation.

Handbook of Research on Healthcare Administration and Management Wickramasinghe, Nilmini, 2016-08-23 Effective healthcare delivery is a vital concern for citizens and communities across the globe. The numerous facets of this industry require constant re-evaluation and optimization of management techniques. The Handbook of Research on Healthcare Administration and Management is a pivotal reference source for the latest scholarly material on emerging strategies and methods for delivering optimal healthcare opportunities and solutions. Highlighting issues relating to decision making, process optimization, and technological applications, this book is ideally designed for policy makers, administrators, students, professionals, and researchers interested in achieving superior healthcare solutions.

Community Nursing Practice Winsome St John,2020-08-04 Community practice is a stimulating and diverse field of nursing. Community nurses often work without direct support from other health professionals and need, not only excellent clinical skills, but also skills in communication, research and health promotion. Community Nursing Practice offers a thorough introduction to the role of the community nurse. Based on principles of primary health care, it outlines the theory, knowledge and skills required to make a difference to the health and wellbeing of individuals, families, groups, and even whole communities. The contributors make a point of articulating knowledge that is often taken for granted among experienced practitioners. Community Nursing Practice is based on the premise that community nursing is a specialist field of nursing practice in its own right, and nurses require a specific body of knowledge to work effectively in a community setting - no matter what their clinical focus or location. Contributors outline the foundations of community practice, including principles of disease prevention and wellness promotion, as well as a social model of health. Together with the skills required for work with different population groups, the contribution of research is explored. Professional skills including program management, advocacy, teamwork, home visiting and self management are also covered. With contributions from leading nurse educators and researchers, Community Nursing Practice is richly illustrated with case studies and examples from a variety of practice settings. It is an essential student text and valuable professional reference.
