Music, Social Media and Global Mobility Ole J. Mjos, 2013-07-03 This book is about the relationship between media, communication and globalization, explored through the unique empirical study of electronic music practitioners' use of the global social media: MySpace, Facebook, YouTube and Twitter. To understand the significance of the emerging nexus between social media and music in a global context, the book explores various aspects of production, distribution and consumption among electronic music practitioners as they engage with global social media, as well as a historical, political and economic exposition of the rise of this global social media environment. Drawing on interview-based research with electronic music artists, DJs, producers and managers, together with the historical portrayal of the emergence of global social media this pioneering study aims to capture a development taking place in music culture within the wider transformations of the media and communications landscape; from analogue to digital, from national to global, and from a largely passive to more active media use. In doing so, it explores the emergence of a media and communications ecology with increased mobility, velocity and uncertainty. The numerous competing, and rapidly growing and fading social media exemplify the vitality and volatility of the transforming global media, communication and cultural landscape. This study

suggests that the music practitioner's relationship with MySpace, Facebook, YouTube and Twitter and the key characteristics of these global social media, alter aspects of our practical and theoretical understandings of the process of media globalization. The book deploys an interdisciplinary approach to media globalization that takes into account and articulates this relationship, and reflects the enduring power equations and wider continuities and changes within the global media and communications sphere.

The Routledge Companion to Music Cognition Richard Ashley, Renee Timmers, 2017-06-26 WINNER OF THE SOCIETY OF MUSIC THEORY'S 2019 CITATION OF SPECIAL MERIT FOR MULTI-AUTHORED VOLUMES The Routledge Companion to Music Cognition addresses fundamental questions about the nature of music from a psychological perspective. Music cognition is presented as the field that investigates the psychological, physiological, and physical processes that allow music to take place, seeking to explain how and why music has such powerful and mysterious effects on us. This volume provides a comprehensive overview of research in music cognition, balancing accessibility with depth and sophistication. A diverse range of global scholars—music theorists, musicologists, pedagogues, neuroscientists, and psychologists—address the implications of music in everyday life while broadening the range of topics in music cognition research, deliberately seeking connections with the kinds of music and musical experiences that are meaningful to the population at large but are often overlooked in the study of music cognition. Such topics include: Music's impact on physical and emotional health Music cognition in various genres Music cognition in diverse populations, including people with amusia and hearing impairment The relationship of music to learning and accomplishment in academics, sport, and recreation The broader sociological and anthropological uses of music Consisting of over forty essays, the volume is organized by five primary themes. The first section, *Music from the Air to the Brain*, provides a neuroscientific and theoretical basis for the book. The next three sections are based on musical actions: *Hearing and Listening to Music*, *Making and Using Music*, and *Developing Musicality*. The closing section, *Musical Meanings*, returns to fundamental questions related to music's meaning and significance, seen from historical and contemporary perspectives. The Routledge Companion to Music Cognition seeks to encourage readers to understand connections between the laboratory and the everyday in their musical lives.

Musical Vulnerability Elizabeth H. MacGregor, 2024-12-24 Since the early twenty-first century, music education across the world has been shaped by neoliberal discourse extolling the benefits of music upon academic achievement, health and wellbeing, and social development. However, such benefits are far from universal; on the contrary, music-making often reveals our shortcomings and dependencies. This highlights an urgent need for music education to be reframed by an understanding of 'musical vulnerability': our inherent and situational openness to being affected by the semantic and somatic properties of music-making. Drawing on existing vulnerability studies, this book evaluates how musicmaking can foster both positive receptivity and negative susceptibility, depending on its delineation of self-identity, social identity, and space, and its embodiment through aural receptivity, mimetic participation, and affective transmission. Through phenomenological, ethnographic research with teachers and pupils, it exposes how values espoused in the music classroom require the personal and interpersonal negotiation of conflicting musical expectations, identities, and abilities. It makes recommendations for music education policymakers, teachers, and researchers in diverse global contexts, suggesting the importance of developing 'pedagogies of vulnerability' in order to foster caring classroom music-making praxes that acknowledge music's capacity

both to heal and to harm.

The New Handbook of Research on Music Teaching and Learning Richard Colwell, Carol Richardson, 2002-04-18
Featuring chapters by the world's foremost scholars in music education and cognition, this handbook is a convenient collection of current research on music teaching and learning. This comprehensive work includes sections on arts advocacy, music and medicine, teacher education, and studio instruction, among other subjects, making it an essential reference for music education programs. The original Handbook of Research on Music Teaching and Learning, published in 1992 with the sponsorship of the Music Educators National Conference (MENC), was hailed as a welcome addition to the literature on music education because it serves to provide definition and unity to a broad and complex field (Choice). This new companion volume, again with the sponsorship of MENC, explores the significant changes in music and arts education that have taken place in the last decade. Notably, several chapters now incorporate insights from other fields to shed light on multi-cultural music education, gender issues in music education, and non-musical outcomes of music education. Other chapters offer practical information on maintaining musicians' health, training music teachers, and evaluating music education programs. Philosophical issues, such as musical cognition, the philosophy of research theory, curriculum, and educating musically, are also explored in relationship to policy issues. In addition to surveying the literature, each chapter considers the significance of the research and provides suggestions for future study. Covering a broad range of topics and addressing the issues of music education at all age levels, from early childhood to motivation and self-regulation, this handbook is an invaluable resource for music teachers, researchers, and scholars.

Religion, Personality, and Social Behavior Vassilis Saroglou, 2013-07-24 Psychological interest in religion, in terms of both theory and empirical research, has been constant since the beginning of psychology. However, since the beginning of the 21st Century, partially due to important social and political events and developments, interest in religion within personality and social psychology has increased. This volume reviews the accumulated research and theory on the major aspects of personality and social psychology as applied to religion. It provides a high quality integrative, systematic, and rigorous review of that work, with a focus on topics that are both central in personality and social psychology and have allowed for the accumulation of solid and replicated and not impressionist knowledge on religion. The contributors are renowned researchers in the field who offer an international perspective that is both illuminating, yet neutral, with respect to religion. The volume's primary audience are academics, researchers, and advanced students in social psychology, but it will also interest those in sociology, political sciences, and anthropology.

Sociology for Music Teachers Hildegard Froehlich, Gareth Smith, 2017-04-21 *Sociology for Music Teachers: Practical Applications*, Second Edition, outlines the basic concepts relevant to understanding music teaching and learning from a sociological perspective. It demonstrates the relationship of music to education, schooling and society, and examines the consequences for making instructional choices in teaching methods and repertoire selection. The authors look at major theories, and concepts relevant to music education, texts in the sociology of music, and thoughts of selected ethnomusicologists and sociologists. The new edition takes a more global approach than was the case in the first edition and includes the application of sociological theory to contexts beyond the classroom. The Second Edition: Presents major theories in ethnomusicology, both traditional and contemporary. Takes a global approach by presenting a variety of teaching practices beyond those found in the United States. Emphasizes music education in a traditional classroom setting, but also applies specific constructs to studio teaching situations in conservatories (with private lessons) and community music. Provides recommendations for teaching practices by addressing popular music in school music curricula, suggests inclusionary projects that explore musical styles and repertoire of the past and present, and connects school to community music practices of varying kinds. Contains an increased number of suggestions for projects and discussions among the students using the book.

Adolescents on Music Elizabeth Cassidy Parker, 2020-02-03 Many can attest to the importance of the self-growth that occurs for young people through the arts and their accompanying communities of support, understanding, and caring. Yet

even professionals who work daily with adolescents, and parents or guardians who raise adolescents, sometimes have difficulty collectively articulating why musicking experiences are important for young people. In *Adolescents on Music*, author Elizabeth Cassidy Parker proves that this challenge stems from failing to ask adolescents to share their ideas richly and fully. Accordingly, Parker argues for deeper efforts to connect adolescent perspectives with established theories and philosophies in the social sciences and humanities. Organized into three sections--Who I Am; My Social Self; and Toward a Future Vision--Parker seeks new and diverse perspectives from the young people sharing their voices and experiences in each chapter. Chapters begin with a description from adolescents, in their own words, of the music they make, the meanings they ascribe to their music-making, and contributions to their development. The voices highlighted in these chapters come from adolescent solo musicians, autonomous and vernacular players, composers, school and community music-makers, and listeners between the ages of 12-20. By familiarizing readers with the multiplicity of adolescent music-making experiences and perspectives; discussing relevant theories within and outside of music and music education that support adolescent musical and personal growth; promoting adolescent health and well-being and greater understanding of young people; and providing a common language toward advocacy for adolescent music-making, *Adolescents on Music* serves as an invaluable resource for individual and group music teachers and practitioners, parents of adolescents, music mentors, and music education students.

The Oxford Handbook of Social Media and Music Learning Janice L. Waldron, Stephanie Horsley, Kari K. Veblen, 2020-09-23 The rapid pace of technological change over the last decade, particularly the rise of social media, has deeply affected the ways in which we interact as individuals, in groups, and among institutions to the point that it is difficult to grasp what it would be like to lose access to this everyday aspect of modern life. *The Oxford Handbook of Social Media and Music Learning* investigates the ways in which social media is now firmly engrained in all aspects of music education, providing fascinating insights into the ways in which social media, musical participation, and musical learning are increasingly entwined. In five sections of newly commissioned chapters, a refreshing mix of junior and senior scholars tackle questions concerning the potential for formal and informal musical learning in a networked society. Beginning with an overview of community identity and the new musical self through social media, scholars explore intersections between digital, musical, and social constructs including the vernacular of born-digital performance, musical identity and projection, and the expanding definition of musical empowerment. The fifth section brings this handbook to full practical fruition, featuring firsthand accounts of digital musicians, students, and teachers in the field. *The Oxford Handbook of Social Media*

and Music Learning opens up an international discussion of what it means to be a musical community member in an age of technologically mediated relationships that break down the limits of geographical, cultural, political, and economic place.

Visions of the Village Christopher Campo-Bowen, 2025-04 Visions of the Village offers a nuanced account of the cultural history, political salience, and social resonances of Czech village operas, especially those by composers Bedřich Smetana, Antonín Dvořák, and Leoš Janáček. By examining music-critical writings, institutional and government records, letters, and other archival sources, Christopher Campo-Bowen examines how musical representations of the idealized village acquired and provided meaning for Czech audiences, serving as the basis for understandings of a wide range of sociocultural and political issues, including gender, class, nationalism, imperialism, ethnicity, and race. This book explores how operas like Smetana's *The Bartered Bride*, Dvořák's *The Devil and Kate*, and Janáček's *Jenůfa* served as focal points for the articulation of an essentialist sense of Czech identity. In addition to composers and their operas, Campo-Bowen investigates the output of critics, administrators, and other urban intellectuals like Otakar Hostinský, František Adolf Šubert, and Zdeněk Nejedlý to understand the impact of village operas on public discourse. Through this in-depth analysis, this book uncovers how music functions at the nexus of the desire for politically resonant ethnoracial identities and the representation of ruralness, from the nineteenth century to the present.

Transforming Research Methods in the Social Sciences Angelo Flynn, Sherianne Kramer, 2019-03-01 Social science researchers in the global South, and in South Africa particularly, utilise research methods in innovative ways in order to respond to contexts characterised by diversity, racial and political tensions, socioeconomic disparities and gender inequalities. These methods often remain undocumented – a gap that this book starts to address. Written by experts from various methodological fields, *Transforming Research Methods in the Social Sciences* is a comprehensive collation of original essays and cutting-edge research that demonstrates the variety of novel techniques and research methods available to researchers responding to these context-bound issues. It is particularly relevant for study and research in the fields of applied psychology, sociology, ethnography, biography and anthropology. In addition to their unique combination of conceptual and application issues, the chapters also include discussions on ethical considerations relevant to the method in similar global South contexts. *Transforming Research Methods in the Social Sciences* has much to offer to researchers, professionals and others involved in social science research both locally and internationally.

A New Philosophy of Songwriting Andy Ward, Briony Luttrell, 2024-07-30 Songs, pervasive sonic ephemeral acts that combine words and music, live in a contemporary world of commercialization as commodity. Flowing through our everyday lives as a given and oft-underacknowledged artifact to accompany our shopping, car trips, date nights, and gym days. Yet songs have a history as long as humanity and language. They hold a place, up until recently in our evolution, as an oral history library of the human species. Why then is there limited scholarship about how songs tell stories, and the ways in which those stories come together with sounds? And why is there a disconnect between songwriting as industrial practice and academic thought? *A New Philosophy of Songwriting* argues that all songwriting choices are storytelling choices and asks the question: how can we think about Song as one of the most memorable, potent, multimodal, and portable storytelling devices ever devised? In doing so, Andy Ward and Briony Luttrell make the case for rethinking the analysis of songs and practice of songwriting with an emphasis on listening. This is a book for songwriters, scholars, and song lovers alike. Ultimately, the authors challenge contemporary thinking on music and song itself and argue for a new theorisation of song as a multimodal storytelling sonic act.
