House of Cards and Philosophy J. Edward Hackett,2015-12-14 Is Democracy overrated? Does power corrupt? Or do corrupt people seek power? Do corporate puppet masters pull politicians' strings? Why does Frank talk to the camera? Can politics deliver on the promise of justice? House of Cards depicts our worst fears about politics today. Love him or loathe him, Frank Underwood has charted an inimitable course through Washington politics. He and his cohorts depict the darkest dealings within the gleaming halls of our most revered political institutions. These 24 original essays examine key philosophical issues behind the critically-acclaimed series—questions of truth, justice, equality, opportunity, and privilege. The amoral machinations of Underwood, the ultimate anti-hero, serve as an ideal backdrop for a discussion of the political theories of philosophers as diverse as Plato, Aristotle, Nietzsche, Machiavelli, Hobbes, and Marx. From political and corporate ethics, race relations, and ruthless pragmatism to mass media collusion and sexual politics, these essays tackle a range of issues important not only to the series but to our understanding of society today.

Politics and Politicians in Contemporary US Television Betty Kaklamanidou,Margaret Tally,2016-10-04 Bringing together

well-established scholars of media, political science, sociology, and film to investigate the representation of Washington politics on U.S. television from the mid-2000s to the present, this volume offers stimulating perspectives on the status of representations of contemporary US politics, the role of government and the machinations and intrigue often associated with politicians and governmental institutions. The authors help to locate these representations both in the context of the history of earlier television shows that portrayed the political culture of Washington as well as within the current political culture transpiring both inside and outside of The Beltway. With close attention to issues of gender, race and class and offering studies from contemporary quality television, including popular programmes such as *The West Wing*, *Veep*, *House of Cards*, *The Americans*, *The Good Wife* and *Scandal*, the authors examine the ways in which televisual representations reveal changing attitudes towards Washington culture, shedding light on the role of the media in framing the public's changing perception of politics and politicians. Exploring the new era in which television finds itself, with new production practices and the possible emergence of a new 'political genre' emerging, *Politics and Politicians in Contemporary U.S. Television* also considers the 'humanizing' of political characters on television, asking what that representation of politicians as human beings says about the national political culture. A fascinating study that sits at the intersection of politics and television, this book will appeal to scholars of popular culture, sociology, cultural and media studies.

Above Head Height James Brown, 2017-02-09 'The Fever Pitch of five-a-side' TONY PARSONS A must-have for anyone who has ever played and enjoyed amateur football. James Brown has been playing football since growing up in the backstreets of Leeds. The sudden death of one his long-standing team mates made James ponder the unique bond between men who meet each other once a week for years, but don't know any personal details beyond pitch prowess. Five-a-Side football is where you play the beautiful game for love, not money. You play it for life and you play it everywhere. Your kit is damp and your legs are a leopard's back of bruises. Shirts are often tight around the belly, with your hero's name plastered across your shoulder blades. The showers are too cold in winter and too hot in summer. Your used sports bag stays unpacked in the hall, and your water bottles are under the kitchen sink. The post-match warm down takes place in the pub. As does the match analysis. By contrast the warm up is non-existent. Your performance is patchy and maybe not what it used to be. But we all still think we played great. Five-a-Side is sporting Karaoke - a time and place to live out our dreams. This is a book for all of us - school mates, work colleagues, total strangers - bonded by the desire to blast one into the net from two feet away.

Autopsy of Human History Frank Wang, 2024-04-30 Travel with me to find the beginning of the world; observe with me to seek patterns of history; rejoice with me for the Bible is key. This book discusses the entire world history in cycles and numbers, in comparative reasoning, and reveals the universal changes of key civilizations.

Shakespeare and Game of Thrones Jeffrey R. Wilson, 2020-11-29 It is widely acknowledged that the hit franchise *Game of Thrones* is based on the Wars of the Roses, a bloody fifteenth-century civil war between feuding English families. In this

book, Jeffrey R. Wilson shows how that connection was mediated by Shakespeare, and how a knowledge of the Shakespearean context enriches our understanding of the literary elements of *Game of Thrones*. On the one hand, Shakespeare influenced *Game of Thrones* indirectly because his history plays significantly shaped the way the Wars of the Roses are now remembered, including the modern histories and historical fictions George R.R. Martin drew upon. On the other, *Game of Thrones* also responds to Shakespeare's first tetralogy directly by adapting several of its literary strategies (such as shifting perspectives, mixed genres, and metatheater) and tropes (including the stigmatized protagonist and the prince who was promised). Presenting new interviews with the *Game of Thrones* cast, and comparing contextual circumstances of composition—such as collaborative authorship and political currents—this book also lodges a series of provocations about writing and acting for the stage in the Elizabethan age and for the screen in the twenty-first century. An essential read for fans of the franchise, as well as students and academics looking at Shakespeare and Renaissance literature in the context of modern media.

Unexceptional Politics Emily Apter, 2018-02-06 A new vision of politics “below the radar” One way to grasp the nature of politics is to understand the key terms in which it is discussed. *Unexceptional Politics* develops a political vocabulary drawn from a wide range of media (political fiction, art, film, and TV), highlighting the scams, imbroglios, information trafficking, brinkmanship, and parliamentary procedures that obstruct and block progressive politics. The book reviews and renews modes of thinking about micropolitics that counter notions of the “state of exception” embedded in theories of the “political” from Thomas Hobbes to Carl Schmitt. Emily Apter develops a critical model of politics behind the scenes, a politics that operates outside the norms of classical political theory. She focuses on micropolitics, defined as small events, happening in series, that often pass unnoticed yet disturb and interfere with the institutional structures of capitalist parliamentary systems, even as they secure their reproduction and longevity. Apter's experimental glossary is arranged under headings that look at the apparently incidental, immaterial, and increasingly virtual practices of politicking: “obstruction,” “obstinacy,” “psychopolitics,” “managed life,” “serial politics.” Such terms frame an argument for taking stock of the realization that we really do not know what politics is, where it begins and ends, or how its micro-events should be described.

Justice on Demand Tanya Horeck, 2019-11-11 Explores the proliferation of true crime audiovisual texts across multiple media platforms. *Justice on Demand: True Crime in the Digital Streaming Era* offers a theoretical rumination on the question asked in countless blogs and opinion pieces of the last decade: Why are we so obsessed with true crime? Author Tanya Horeck takes this question further: Why is true crime thought to be such a good vehicle for the new modes of viewer/listener engagement favored by online streaming and consumption in the twenty-first century? Examining a range of audiovisual true crime texts, from podcasts such as *Serial* and *My Favorite Murder* to long-form crime documentaries such as *The Jinx* and *Making a Murderer*, Horeck considers the extent to which the true crime genre has come to epitomize participatory media

culture where the listener/viewer acts as a desktop detective or internet sleuth. While Facebook and Twitter have re-invigorated the notion of the armchair detective, Horeck questions the rhetoric of interactivity surrounding true crime formats and points to the precarity of justice in the social media era. In a cultural moment in which user-generated videos of real-life violence surface with an alarming frequency, *Justice on Demand* addresses what is at stake in the cultural investment in true crime as packaged mainstream entertainment. Paying close attention to the gendered and racialized dimensions of true crime media, Horeck examines objects that are not commonly considered true crime, including the subgenre of closed-circuit television (CCTV) elevator assault videos and the popularity of trailers for true crime documentaries on YouTube. By analyzing a range of intriguing case studies, Horeck explores how the audience is affectively imagined, addressed, and commodified by contemporary true crime in an on demand mediascape. As a fresh investigation of how contemporary variations of true crime raise significant ethical questions regarding what it means to watch, listen, and witness in a digital era of accessibility, immediacy, and instantaneity, *Justice on Demand* will be of interest to film, media, and digital studies scholars.

The Blessings of Disaster Michel Bruneau, 2022-11-08 Are we doomed? As individuals, certainly, eventually, inevitably. But as a species? As a civilization? Leading catastrophe engineer Michel Bruneau thinks perhaps not. *The Blessings of Disaster* draws on knowledge from multiple disciplines to illustrate how our civilization's future successes and failures in dealing with societal threats—be they pandemics, climate change, overpopulation, monetary collapse, and nuclear holocaust—can be predicted by observing how we currently cope with and react to natural and technological disasters. Maybe most importantly, this entertaining and often counter-intuitive book shows how we can think in better ways about disasters, to strengthen and extend our existence as both individuals and as a species. When it comes to rare extreme events, such as earthquakes, hurricanes, floods, tornados, volcanic eruptions, technological accidents, terrorist attacks, pandemics, and even existential threats, it is in our nature to set ourselves up for disasters because the gamble may be worth it. But only maybe. *The Blessing of Disaster* is the very real story of the relationship between humans and disasters – and it's not a simple one. Bringing together his decades-long career spanning the globe as an earthquake and disaster engineer, detailed catastrophe case studies from extreme events like Japan's Kobe earthquake and category 5 hurricanes in the American South, along with thoughtful and practical solutions, Bruneau provides a thorough examination of the structural challenges that face today's (and tomorrow's) world. How we cope with today's threats is indicative of what the future holds. Contrary to popular forecasts, it is not all gloom and doom – but some of it definitely is.

Reimagining Adult Education as World Building Aliki Nicolaidis, Ahreum Lim, Neal Herr, Trisha Barefield, 2024-03-18 *Reimagining Adult Education as World Building* offers a new way of thinking about adult education by re-envisioning how adult education works. It explores how the process of world building, or the invention of a new world or a set of concepts,

can be translated into actual and feasible action when turning towards complex, real-life problems. Cultivating contexts where adult educators can become change agents, who recognize that the individual and community are intricately entangled, demands that educators grow new capacities, make new tools, develop thicker networks, and cultivate intentional links amongst each other to foster ecologies of transformation. This book shows how educators can create an ecology or environment for transformative thinking where students can learn to collaborate and use world building tools to create new responses to current issues. It begins by explaining the philosophical underpinnings of world building and the tools that translate pragmatic imagination into scaffolds for individual and collective capacity building. It also illustrates how the worldbuilding protocol makes a difference in adult learning and how this pedagogical tool introduces the ecological approach to adult education. Each chapter explores a practical case study, showing how learners have applied worldbuilding tools to complex challenges. Showing how to apply the world building protocol in a classroom setting, this edited collection will be valuable to Adult Education scholars, researchers, practitioners, and learning facilitators.

Imagining Collective Futures Constance de Saint-Laurent, Sandra Obradović, Kevin R. Carriere, 2018-05-08 It is a commonly held assumption among cultural, social, and political psychologists that imagining the future of societies we live in has the potential to change how we think and act in the world. However little research has been devoted to whether this effect exists in collective imaginations, of social groups, communities and nations, for instance. This book explores the part that imagination and creativity play in the construction of collective futures, and the diversity of outlets in which these are presented, from fiction and cultural symbols to science and technology. The authors discuss this effect in social phenomena such as in intergroup conflict and social change, and focus on several cases studies to illustrate how the imagination of collective futures can guide social and political action. This book brings together theoretical and empirical contributions from cultural, social, and political psychology to offer insight into our constant (re)imagination of the societies in which we live.

The Internet and New Social Formation in China Weiyu Zhang, 2016-03-22 There are billions of internet users in China, and this number is continually growing. This book looks at the various purposes of this internet use, and provides a study about how the entertainment-consuming users form into publics through the mediation of technologies in the era of network society. It questions how individuals, mediated by new information and communication technologies, come together to form new social categories. The book goes on to investigate how public(s) is formed in the era of network society, with particular focus on how fans become publics in a society that follows the logic of network. Using online surveys and in-depth interviews, this book provides a rich description of the process of constructing a new social formation in contemporary China.
