Tartessos and the Phoenicians in Iberia Sebastián Celestino,Carolina López-Ruiz,2016-08-18 This is the first book in English about the earliest historical civilization in the western Mediterranean, known as Tartessos. Endowed with extraordinary wealth in metals and strategically positioned between the Atlantic and Mediterranean trading routes at the time of Greek and Phoenician colonial expansion, Tartessos flourished in the eight-seventh centuries BCE. Tartessos became a literate, sophisticated, urban culture in southwestern Iberia (today's Spain and Portugal), enriched by commercial contacts with the Aegean and the Levant since at least the ninth century. In its material culture (architecture, grave goods, sanctuaries, plastic arts), we see how native elements combined with imported orientalizing innovations introduced by the Phoenicians. Historians of the rank of Herodotos and Livy, geographers such as Strabo and Pliny, Greek and Punic periploi and perhaps even Phoenician and Hebrew texts, testify to the power, wealth, and prominence of this westernmost Mediterranean civilization. Archaeologists, in turn, have demonstrated the existence of a fascinating complex society with both strong local roots and international flare. Yet for still-mysterious reasons, Tartessos did not attain a Classical period like its peer emerging cultures did at the same time (Etruscans, Romans, Greeks). This book combines the expertise of its two authors in archaeology, philology, and cultural history to present a comprehensive, coherent, theoretically up-to-date, and informative overview of the discovery, sources, and debates surrounding this puzzling culture of ancient Iberia and its complex hybrid identity vis-à-vis the western Phoenicians. This book will be of great interest to students of the classics, archaeology and ancient history, Phoenician-Punic studies, colonization and cultural contact.

CIUDADES ROMANAS DE LA PROVINCIA BAETICA Javier Bermenjo Meléndez,Luis Javier Sánchez Hernando,Manuel de Paz Sánchez,Juan M. Ruiz Acevedo,Sergio España-Chamorro,José Carlos Saquete Chamizo,Julián González Fernández,Alicia Ruiz-Gutiérrez,Elena Moreno Pulido,Clara Toscano-Pérez,Alberto Bermejo Meléndez,Álvaro Corrales Álvarez ,Manuel Moreno Alcaide,Francisco Marfil Vázquez,Nuria de la O Vidal Teruel,Luz Neira,José Antonio Garriguet-Mata,Ana Ruiz Osuna,Lucía Fernández Sutilo,Alberto León-Muñoz,Raimundo F. Ortiz Urbano,2024-09-04 El proyecto Ciudades Romanas de la Bética, CORPVS VRBIVM BAETICARVM (II-III), ha tenido como objetivo fundamental la recopilación de la información arqueológica más reciente y actualizada referida las ciudades de los conventus Cordubensis y Gaditanus, así como el establecimiento de

los límites de los mismos; al igual que sucedería con la primera fase del proyecto para las demarcaciones del hispalense y astigitano. Con la intención de mantener el espíritu ya iniciado, así como el desarrollo metodológico, se cuenta en esta obra con síntesis temáticas elaboradas por diferentes especialistas, de manera conjunta éstas se acompañan de una entrada para cada una de las ciudades de los dos conventus; dichas entradas o schedae contienen una información jerarquizada y ordenada según grandes líneas temáticas como urbanismo, arquitectura, mundo funerario, escultura, epigrafía, diagnóstico, etc. con toda la bibliografía de referencia o específica de cada una de las entidades urbanas. Para acceder al contenido total de esta información se ha implementado en el entorno web del proyecto (<http://cvb.vrbanitas.es/>), una herramienta de acceso y consulta en abierto, con motores de búsqueda y una cartografía georeferenciada actualizada con los límites y posiciones de yacimientos. Con la realización de esta monografía se ve culminado un importante y ambicioso proyecto relativo al conocimiento de las ciudades de la Provincia Baetica.

Tarteso Clara Toscano-Pérez,Javier Bermejo Meléndez,Juan M. Campos Carrasco,2024-12-12 This monograph, stemming from the 2022 International Congress on Protohistoric Urbanism, explores the origins of urbanism, focusing on the Tartessian world in southwest Iberia. Featuring 13 chapters by 20 experts, it examines urbanism as a Mediterranean-born adaptation tied to humanity's shift toward a global economic strategy.

Salt in Prehistoric Europe Anthony Harding,2013-11-01 Salt was a commodity of great importance in the ancient past, just as it is today. Its roles in promoting human health and in making food more palatable are well-known; in peasant societies it also plays a very important role in the preservation of foodstuffs and in a range of industries. Uncovering the evidence for the ancient production and use of salt has been a concern for historians over many years, but interest in the archaeology of salt has been a particular focus of research in recent times. This book charts the history of research on archaeological salt and traces the story of its production in Europe from earliest times down to the Iron Age. It presents the results of recent research, which has shown how much new evidence is now available from the different countries of Europe. The book considers new approaches to the archaeology of salt, including a GIS analysis of the oft-cited association between Bronze Age hoards and salt sources, and investigates the possibility of a new narrative of salt production in prehistoric Europe based on the role of salt in society, including issues of gender and the control of sources. The book is intended for both academics and the general reader interested in the prehistory of a fundamental but often under-appreciated commodity in the ancient past. It includes the results of the author's own research as well as an up-to-date survey of current work.

Prehistoric Iberia Antonio Arnaiz-Villena, 2012-12-06 The symposium Prehistoric Iberia: genetics, anthropology and linguistics was held in the Circulo de Bellas Artes, Madrid on 16th -17th November 1998. The idea was bringing together specialists who could address not clearly resolved historic and prehistoric issues regarding ancient Iberian and Mediterranean populations, following a multidisciplinary approach. This was necessary in the light of the new bulk of genetic, archeological and linguistic data obtained with the new DNA technology and the recent discoveries in the other fields. Genes may now be easily studied in populations, particularly HLA genes and markers of the mitochondrial DNA and the Y chromosome. Basques, Iberians, North Africans, Berbers (Imazighen) and Mediterraneans have presently been widely studied. The genetic emerging picture is that Mediterraneans are closely related from West (Basque, Iberians, Berbers) to East (Jews, Lebanese, Cretans); however, Greeks are outliers in all the analyses done by using HLA genes. Anthropologists and archeologists showed how there was no people substitution during the revolutionary Mesolithic-Neolithic transition; in addition, cultural relationships were found between Iberia and predynastic Egypt (El Badari culture). Basque language translation into Spanish has been the key for relating most Mediterranean extinct languages. The Usko-Mediterranean languages were once spoken in a wide African and European area, which also included parts of Asia. This was the old language that was slowly substituted by Eurasian languages starting approximately after the Bronze Age (or 2,000 years BC).

El río Guadiana en época post-orientalizante, español ; castillan F. Javier Jiménez Ávila, 2008 Presentamos el resultado del encuentro científico que tuvo lugar en Mérida con el título SIDEREUM ANA I. El río Guadiana en época Post-Orientalizante, el primero de una serie de reuniones que tratarán diversos aspectos de la Protohistoria del Suroeste y del Valle del Guadiana en particular. El libro se ordena siguiendo el fluir natural del río, del NE al SO, empezando por los yacimientos más relevantes de su curso alto (Alarcos, La Bienvenida y el Cerro de las Cabezas), con estudios suscritos por los equipos que vienen trabajando en ellos desde hace años, antecididos de una visión general del horizonte Ibérico Antiguo en la zona oretana de Ciudad Real. Lo mismo sucede para el cauce medio, con sitios como Medellín o Badajoz, a los que también se incorpora un estudio global de este territorio y una síntesis temática sobre el poblamiento en llano del Guadiana Medio. También aquí situamos el estudio paleopaisajístico por proceder de este entorno la mayoría de los datos palinológicos

recogidos en el mismo. Por último, concluye el volumen con el tratamiento del tramo bajo, donde, junto a los datos de la provincia de Huelva, adquieren especial protagonismo los estudios portugueses que también cuentan con puntos fulcrales ya clásicos como Mértola o Castro Marim, en los que se han realizado nuevos trabajos, junto a otros que ahora se revisan, como los de Azougada, Neves-Corvo o las necrópolis de Ourique y, además, con los resultados de los sitios recientemente descubiertos en el Alentejo Central, linderos ya con el curso medio, que tantos datos novedosos han aportado en los últimos años.

Sustainable Development and Renovation in Architecture, Urbanism and Engineering Pilar Mercader-Moyano, 2017-03-17

This book provides an overview of the environmental problems that arise from construction activity, focusing on refurbishment as an alternative to the current crisis in the construction sector, as well as on measures designed to minimize the effects on the environment. Furthermore, it offers professionals insights into alternative eco-efficient solutions using new materials to minimize environmental impacts and offers solutions that they can incorporate into their own designs and buildings. It also demonstrates best practices in the cooperation between various universities in Andalusia in Spain and Latin America and many public and private companies and organizations. This book serves as a valuable reference resource for professionals and researchers and provides an overview on the status of investigations to find solutions to improve sustainable development in terms of materials, systems, facilities, neighborhoods, buildings, and awareness of the society involved.

War and Society in Habsburg Spain I.A.A. Thompson, 2024-10-28 The historical study of war in the Spain of Philip II forms the starting point for the articles in this volume. They approach this not so much from a military angle, but as a problem of organization, procurement and finance. In a sense, the articles represent an assessment of the effectiveness of the Spanish government and so, given the apparent precocity of government growth in 16th-century Spain, they can also be seen as a critical commentary on the operational capabilities of the early-modern absolutist state. Six of the essays here focus on the Spanish Armada, in terms of its political and military objectives, but demonstrating how these were conditioned by basic systems limitations, not least in the procurement of suitable cannon. In the final articles Dr Thompson turns to the impact of war and its financing on the social structure, bearing in particular on the definition of nobility (and its sale), and on local democracy, and making full use, here as elsewhere, of the relatively unexplored local sources. Two of the papers here appear for the first time in English, whilst a third has been newly prepared for this volume. L'étude historique de la guerre sous Philippe II, roi d'Espagne, est à la base des articles contenus dans le présent recueil. Ceci est abordé non tant sous l'angle militaire, mais comme un problème d'organisation, d'acquisition de matériel et de financement. En un certain sens, ces documents représentent une évaluation de l'efficacité du gouvernement espagnol et peuvent par conséquent, étant donnée

l'apparente précocité de la croissance gouvernementale en Espagne au 16^e siècle, être considérés comme un commentaire critique quant aux capacités opérationnelles de l'Etat absolu proto-moderne. Une demi douzaine des essais font l'examen de l'Armada espagnole, en terme d'objectifs politiques et militaires, tout en démontrant comment ces derniers étaient conditionnés par des contraintes structurales,
