Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day, including individuals from related disciplines like Jürgen Habermas and Clifford Geertz, whose theoretical contributions have informed historical debate. Additionally, the Encyclopedia includes some 200 essays treating the development of national, regional and topical historiographies, from the Ancient Near East to the history of sexuality. In addition to the Western tradition, it includes substantial assessments of African, Asian, and Latin American historians and debates on gender and subaltern studies.

**Humanism and the Culture of Renaissance Europe** Charles G. Nauert (Jr.), 1995-09-28 This new textbook provides students with a highly readable synthesis of the major determining features of the European Renaissance, one of the most influential cultural revolutions in history. Professor Nauert's approach is broader than the traditional focus on Italy, and tackles the themes in the wider European context. He traces the origins of the humanist 'movement' and connects it to the social and political environments in which it developed. In a tour-de-force of lucid exposition over six wide-ranging chapters,

Nauert charts the key intellectual, social, educational and philosophical concerns of this humanist revolution, using art and biographical sketches of key figures to illuminate the discussion. The study also traces subsequent transformations of humanism and its solvent effect on intellectual developments in the late Renaissance.

A History of the Bibliography of Philosophy Michael Jasenas,

*Writing the Other* Mike Pincombe, 2009-10-02 An international group of scholars working in early modern English literature and culture have been invited to reflect upon one of the most dynamic dialectics of the period: the opposition between the concept “human, humanist, humanism” versus the concept “barbarous, barbarian, barbarism.” The result is *Writing the Other: Humanism versus Barbarism in Tudor England*. The essays in this volume range widely across the literary and cultural field mapped out by this opposition, thus revealing a rich multiplicity of voices and approaches to one of the fundamental processes by which self-fashioning and also “other-fashioning” operated during the Tudor reign. The focus moves from England to North Africa, to Hungary and to the New World in its panoramic display of the vast theatre in which identities were forged. The volume as a whole demonstrates how the cultural Other was as much invented as described—“forged” in the sense, perhaps, of “counterfeited” —during the early modern and especially the Tudor period. This invention occasionally led to the demonisation of the object of its gaze, at other times its rehumanisation; sometimes we may detect evidence of a painful act of distortion, and at others we see the purposeful and profitable creation of a self-identity with an eye on the rhetorical, religious, poetic, national expectations of the readers in the new context of print culture. But everywhere we witness the remarkable energy and fertility of the primary opposition which gives this collection its central theme.

**Encyclopedia of Renaissance Philosophy** Marco Sgarbi, 2022-10-27 Gives accurate and reliable summaries of the current state of research. It includes entries on philosophers, problems, terms, historical periods, subjects and the cultural context of Renaissance Philosophy. Furthermore, it covers Latin, Arabic, Jewish, Byzantine and vernacular philosophy, and includes entries on the cross-fertilization of these philosophical traditions. A unique feature of this encyclopedia is that it does not aim to define what Renaissance philosophy is, rather simply to cover the philosophy of the period between 1300 and 1650.

*The Renaissance in National Context* Roy Porter, Mikulas Teich, 1992 *The Renaissance in National Context* aims to dispel the commonly-held view that the great efflorescence of art, learning and culture in the period from c. 1350 to 1550 was solely or even primarily an Italian phenomenon. These essays address the development of art, literacy and humanism across the length and breadth of Europe, showing that the Renaissance had many sources independent of Italy, meeting numerous local needs, and serving diverse local functions, specific to the political, economic, social and religious climates of various regions and principalities. The authors show that though the Renaissance was in a fashion backward-looking, recovering the

culture of antiquity, it nevertheless served as the springboard for many specifically modern developments, including the rise of diplomacy, education, printing, nationalism, and the new science.

**Hellenic Knowledge Preservation** Olivia Clark,AI,2025-05-03 Hellenic Knowledge Preservation explores how ancient Greek intellectual achievements survived and influenced subsequent civilizations, a pivotal topic for understanding the roots of modern thought. The book highlights the essential roles of institutions like the Platonic Academy, libraries such as the Library of Alexandria, and the translation of Greek texts into languages like Latin and Arabic. These efforts ensured that Greek philosophy, science, and mathematics were not lost, demonstrating that the transmission of knowledge was an active, multifaceted endeavor. The book traces the journey of Hellenic knowledge from ancient Greece through the Roman Empire, the Middle Ages, and into the Renaissance. It examines key educational centers, translation movements, and the rediscovery of Greek texts in Europe. By adopting a chronological approach and blending historical narrative with in-depth analysis, Hellenic Knowledge Preservation provides a comprehensive account of how Greek thought shaped Western civilization.

**Early Modern Humanism and Postmodern Antihumanism in Dialogue** Jan Miernowski,2016-10-14 This book employs perspectives from continental philosophy, intellectual history, and literary and cultural studies to breach the divide between early modernist and modernist thinkers. It turns to early modern humanism in order to challenge late 20th-century thought and present-day posthumanism. This book addresses contemporary concerns such as the moral responsibility of the artist, the place of religious beliefs in our secular societies, legal rights extended to nonhuman species, the sense of 'normality' applied to the human body, the politics of migration, individual political freedom and international terrorism. It demonstrates how early modern humanism can bring new perspectives to postmodern antihumanism and even invite us to envision a humanism of the future.

*Kyoto in Davos. Intercultural Readings of the Cassirer-Heidegger Debate* ,2023-12-28 What does it mean to be human? We invite the reader to discuss this most fundamental issue in philosophy and to do so in an intercultural framework. The question of the human was the starting point for a legendary discussion between two German philosophers who met in Davos in 1929. We return to this historical event and re-imagine the debate between Martin Heidegger and Ernst Cassirer from a global perspective. Generating twenty papers from elaborate discussions, our authors contribute to the thought experiment by inviting the Japanese philosopher Nishida Kitarō from Kyoto and other Japanese thinkers into the debate to overcome the challenge of Eurocentrism inherent to these historic days in Davos.

**The Concept of Woman** Prudence Allen,1997 The culmination of a lifetime's scholarly work, this pioneering study by Sister Prudence Allen traces the concept of woman in relation to man in Western thought from ancient times to the present. Volume I uncovers four general categories of questions asked by philosophers for two thousand years. These are the categories of opposites, of generation, of wisdom, and of virtue. Sister Prudence Allen traces several recurring strands of

sexual and gender identity within this period. Ultimately, she shows the paradoxical influence of Aristotle on the question of woman and on a philosophical understanding of sexual complementarity. Supplemented throughout with helpful charts, diagrams, and illustrations, this volume will be an important resource for scholars and students in the fields of women's studies, philosophy, history, theology, literary studies, and political science. In Volume 2, Sister Prudence Allen explores claims about sex and gender identity in the works of over fifty philosophers (both men and women) in the late medieval and early Renaissance periods. Touching on the thought of every philosopher who considered sex or gender identity between A.D. 1250 and 1500, *The Concept of Woman* provides the analytical categories necessary for situating contemporary discussion of women in relation to men. Adding to the accessibility of this fine discussion are informative illustrations, helpful summary charts, and extracts of original source material (some not previously available in English). In her third and final volume Allen covers the years 1500--2015, continuing her chronological approach to individual authors and also offering systematic arguments to defend certain philosophical positions over against others.

Humanism and Early Modern Philosophy Jill Krayer, M.W.F. Stone, 2002-11-01 This volume examines the distinctive and important role played by humanism in the development of early modern philosophy. Focusing on individual authors as well as intellectual trends, this collection of essays aims to portray the humanist movement as an essential part of the philosophy of the 15th, 16th and 17th centuries.

**The Middle Ages** Tom Streissguth, 2009-06-24 This encyclopedia provides an abundance of information on the Middle Ages. The Middle Ages began with the fall of the western Roman Empire in the fifth century and ended with the fifteenth century Renaissance. Readers will learn about important religious, political, social, and cultural transformations. Entries cover people, events, and philosophies of the medieval age.

*Philosophy of the Novel* Barry Stocker, 2018-11-02 This book explores the aesthetics of the novel from the perspective of Continental European philosophy, presenting a theory on the philosophical definition and importance of the novel as a literary genre. It analyses a variety of individuals whose work is reflected in both theoretical literary criticism and Continental European aesthetics, including Mikhail Bakhtin, Georg Lukács, Theodor Adorno, and Walter Benjamin. Moving through material from eighteenth century and ancient Greek philosophy and aesthetics, the book provides comprehensive coverage of the major positions on the philosophy of the novel. Distinctive features include the importance of Vico's view of the epic to understanding the novel, the importance of Kierkegaard's view of the novel and irony along with his other aesthetic views, the different possibilities associated with seeing the novel as 'mimetic' and the importance of Proust in understanding the genre in all its philosophical aspects, relating the issue of the philosophical aesthetics of the novel with the issue of philosophy written as a novel and the interaction between these two alternative positions.

"The" Quarterly Review, 1893

**Reinventing Hippocrates** David Cantor, 2017-03-02 The name of Hippocrates has been invoked as an inspiration of medicine since antiquity, and medical practitioners have turned to Hippocrates for ethical and social standards. While most modern commentators accept that medicine has sometimes fallen short of Hippocratic ideals, these ideals are usually portrayed as having a timeless appeal, departure from which is viewed as an aberration that only a return to Hippocratic values will correct. Recent historical work has begun to question such an image of Hippocrates and his medicine. Instead of examining Hippocratic ideals and values as an unchanging legacy passed to us from antiquity, historians have increasingly come to explore the many different ways in which Hippocrates and his medicine have been constructed and reconstructed over time. Thus scholars have tended to abandon attempts to extract a real Hippocrates from the mass of conflicting opinions about him. Rather, they tend to ask why he was portrayed in particular ways, by particular groups, at particular times. This volume explores the multiple uses, constructions, and meanings of Hippocrates and Hippocratic medicine since the Renaissance, and elucidates the cultural and social circumstances that shaped their development. Recent research has suggested that whilst the process of constructing and reconstructing Hippocrates began during antiquity, it was during the sixteenth century that the modern picture emerged. Many scholastic endeavours today, it is claimed, are attempts to answer Hippocratic questions first posed in the sixteenth century. This book provides an opportunity to begin to evaluate such claims, and to explore their relevance in areas beyond those of classical scholarship.
