ICIDC 2022 Zuriati Ahmad Zukarnain, Ming Jin, Ong Tze San, 2022-10-13 The 2022 International Conference on Information Economy, Data Modeling and Cloud Computing (ICIDC 2022) was successfully held in Qingdao, China from June 17 to 19, 2022. Under the impact of COVID-19, ICIDC 2022 was held adopting a combination of online and offline conference. During this conference, we were greatly honored to have Prof Datuk Dr Hj Kasim Hj Md Mansur from Universiti Malaysia Sabah, Malaysia to serve as our Conference Chairman. And there were 260 individuals attending the conference. The conference agenda was composed of keynote speeches, oral presentations, and online Q&A discussion. The proceedings of ICIDC 2022 cover various topics, including Big Data Finance, E-Commerce and Digital Business, Modeling Method, 3D Modeling, Internet of Things, Cloud Computing Platform, etc. All the papers have been checked through rigorous review and processes to meet the requirements of publication. Data modeling allows us to obtain the dynamic change trend of various indicator data, so how to use big data information to model and study the development trend of economic operation plan is of great significance. And that is exactly the purpose of this conference, focusing on the application of big data in the economic field as well as conducting more profound research in combination with cloud computing.

Driving Reform: Digital Health is Everyone's Business A. Georgiou, H. Grain, L.K. Schaper, 2015-08-07 Around the world, healthcare planners and governments are engaged in activities to stimulate innovation and reform health systems as part of the drive to deliver safe, effective, quality care to patients. ICT is both a critical component of health system innovation and key stimulus for reform. This book presents papers from the 23rd Australian national Health Informatics Conference (HIC 2015), held in Brisbane, Australia, in August 2015. The conference brings together researchers, industry groups and healthcare providers from Australia and around the world to share cutting edge research, technology updates and innovations, and the papers included here provide valuable evidence and information about the diverse role that ICT plays in the health, elderly and community care sectors internationally. They encompass a wide spectrum of work, from major theoretical concepts and examples of key applications of new technologies to important new developments in the field of health informatics. The book represents an important contribution to the health informatics evidence base and will be of interest to all those working towards better healthcare provision worldwide.

Regulating Long-Term Care Quality Vincent Mor, Tiziana Leone, Anna Maresso, 2014-02-06 The number of elderly people relying on formal long-term care services is dramatically increasing year after year, and the challenge of ensuring the quality and financial stability of care provision is one faced by governments in both the developed and developing world. This edited book is the first to provide a comprehensive international survey of long-term care provision and regulation, built around a series of case studies from Europe, North America and Asia. The analytical framework allows the different approaches that countries have adopted to be compared side by side and readers are encouraged to consider which quality assurance approaches might best meet their own country's needs. Wider issues underpinning the need to regulate the quality of long-term care are also discussed. This timely book is a valuable resource for policymakers working in the health care sector, researchers and students taking graduate courses on health policy and management.

Understanding the Australian Health Care System Helen Keleher, 2008-10-30 The text provides an overview of the Australian Health Care System at a level suitable for 1st year undergraduate students. It describes the 'architecture' of the system and its key components (public hospital sector, private hospital and health insurance, GPs and primary care, community health, public health), some of the things that shape the system and introduces key concepts that underpin it such as the idea of the welfare state or a universal health system.

Improving Health Care Safety and Quality Judith Healy, 2016-05-13 Responding to the public concern caused by recent hospital scandals and accounts of unintended harm to patients, this author draws on her experience of analysing the health care systems of over a dozen countries and examines whether greater regulation has increased patient safety and health care quality. The book adopts a new approach to mapping developments in health care systems in Europe, North America and Australia and pieces together evidence of which regulatory strategies and mechanisms work well to ensure safer patient care. It identifies the regulatory bodies, the regulatory principles and the implementation strategies adopted to improve governance in health care systems and suggests a conceptual framework for responsive regulation. The book will be of interest to government actors, health care professionals and medico-legal scholars.

MEDINFO 2017: Precision Healthcare Through Informatics A.V. Gundlapalli, M.-C. Jaulent, D. Zhao, 2018-01-31 Medical informatics is a field which continues to evolve with developments and improvements in foundational methods, applications, and technology, constantly offering opportunities for supporting the customization of healthcare to individual patients. This book presents the proceedings of the 16th World Congress of Medical and Health Informatics (MedInfo2017), held in Hangzhou, China, in August 2017, which also marked the 50th anniversary of the International Medical Informatics Association (IMIA). The central theme of MedInfo2017 was Precision Healthcare through Informatics, and the scientific program was divided into five tracks: connected and digital health; human data science; human, organizational, and social

aspects; knowledge management and quality; and safety and patient outcomes. The 249 accepted papers and 168 posters included here span the breadth and depth of sub-disciplines in biomedical and health informatics, such as clinical informatics; nursing informatics; consumer health informatics; public health informatics; human factors in healthcare; bioinformatics; translational informatics; quality and safety; research at the intersection of biomedical and health informatics; and precision medicine. The book will be of interest to all those who wish to keep pace with advances in the science, education, and practice of biomedical and health informatics worldwide.

OECD Health Policy Studies A Good Life in Old Age? Monitoring and Improving Quality in Long-term Care

Managing Health Services - E-Book

Mary G. Harris, 2005-10-01 Managing Health Service: Concepts and Practice 2nd edition E-book provides a valuable practice resource for the health service management students and managers. While new concepts and strategies of multidisciplinary health service management and leadership have been added, the focus remains on providing comprehensive coverage of management topics and issues faced by health services managers. The text is arranged according to six major themes - health service managers and the changing organisational context; health service management practice - working with people; health service management practice - working with information; health service organisations; improving organisational performance; and case studies in health service management. Written by over 40 health service management academics in cooperation with the Society for Health Administration Programs in Education and the Australian College of Health Service Executives, Managing Health Services 2nd edition continues to make a valuable contribution to health service management theory and practice.

Regulating Aged Care

John Braithwaite, Toni Makkai, Valerie A. Braithwaite, 2007-01-01 'Regulating Aged Care is a significant achievement and addresses areas of personal caring which do not usually receive attention. [It] is an important book which draws attention to the central problems of providing care for large numbers of vulnerable people. . . [it] should be required reading on undergraduate and postgraduate courses relating to applied social science, health and medical sociology.' Alison M. Ball, Sociology 'This book provides an impressive evidence base for both theory development and reassessment of policy and practitioner responses in the field.' International Social Security Review 'They have given us a fascinating case study here, rich in detail, and masterfully interpreted against the backdrop of evolving regulatory strategy. It is rare indeed to find this depth of analysis made accessible, laced throughout with humanity, compassion, and humor.' Malcolm Sparrow, Harvard University, US 'This book offers an intelligent and insightful account of the development of nursing home regulation in three countries England, the USA and Australia. But, more than that, it intertwines theory and

more than a decade of empirical work to provide a telling and sophisticated explanation of why and how good regulatory intentions often go awry, and what can be done to create systems of regulation which really work to produce improvement.' Kieran Walshe, University of Manchester, UK This book is a major contribution to regulatory theory from three members of the world-class regulatory research group based in Australia. It marks a new development in responsive regulatory theory in which a strengths-based pyramid complements the regulatory pyramid. The authors compare the accomplishments of nursing home regulation in the US, the UK and Australia during the last 20 years and in a longer historical perspective. They find that gaming and ritualism, rather than defiance of regulators, are the greatest challenges for improving safety and quality of life for the elderly in care homes. *Regulating Aged Care* shows how good regulation and caring professionalism can transcend ritualism. Better regulation is found to be as much about encouragement to expand strengths as incentives to fix problems. The book is underpinned by one of the most ambitious, sustained qualitative and quantitative data collections in both the regulatory literature and the aged care literature. This study provides an impressive evidence base for both theory development and reassessment of policy and practitioner responses in the field. The book will find its readership amongst regulatory scholars in political science, law, socio-legal studies, sociology, economics and public policy. Gerontology and health care scholars and professionals will also find much to reflect upon in the book.

Managing Improvement in Healthcare Aoife M. McDermott, Martin Kitchener, Mark Exworthy, 2017-10-10 Reflecting the challenges and opportunities of achieving improvement in healthcare systems, the contributions of this innovative new text lend depth and nuance to an increasing area of academic debate. Encompassing context, processes and agency, *Managing Improvements in Healthcare* addresses the task of attaining, embedding and sustaining improvement in the industry. The book begins by offering insight into the different valued aspects of quality, providing specific examples of national and organizational interventions in pursuit of improvement. The second part focuses on strategies for embedding good practice and ensuring the spread of high quality through knowledge mobilization, and the final part draws attention to the different groups of change agents involved in delivering, co-creating and benefitting from quality improvement. This inventive text will be insightful to those researchers interested in healthcare and organization, looking to transform theory into policy and practice.

Employee Voice at Work Peter Holland, Julian Teicher, Jimmy Donaghey, 2018-12-16 This book addresses the contemporary aspects of employee voice through theoretical and practical analysis. In addition to case studies of employee voice in the workplace, it also looks at emerging forms of voice associated with the use of technology such as social media.

Because of the breadth of the concept of employee voice, the focus of the book lends itself to an international perspective on employment relations and human resources management – analyses and experiences drawn from one country will be usefully considered or applied in relation to others.

Duty of Care in the Human Services Rosemary Kennedy, 2009-11-12 The human services are established to support the most vulnerable and marginalised people in our society. Yet media and other reports frequently highlight a disturbing picture of industry failures, malpractice and abuse. This book addresses the response of legal and quasi-legal bodies to human service failures. It outlines those areas of law which are most likely to be activated by human service shortcomings, and those aspects of direct human service delivery which are most likely to attract legal attention. Essential reading for those studying or working in human services and social work, this book is designed to alert people to the legal risks arising as a result of inadequate human service delivery.

Ageing and Spirituality across Faiths and Cultures Elizabeth MacKinlay, 2010-03-15 This book examines ageing in the context of the many faiths and cultures that make up Western society, and provides carers with the knowledge they need to deliver appropriate care to people of all faiths. Chapters are written by authoritative figures from each of the world's major faith groups about the beliefs and practices of their older people.
