Presents the latest research in Egyptology on the theme of Ancient Egypt in a Global World This selection of 23 papers from the 15th annual Current Research in Egyptology symposium addresses the interregional and interdisciplinary theme of 'Ancient Egypt in a Global World'. This theme works on a number of levels highlighting the current global nature of Egyptological research and it places ancient Egypt in the wider ancient world. The first section presents the results of recent excavations, including in the western Valley of the Kings and analysis of the structures, construction techniques, food production and consumption remains at Tell Timai (Thmuis) in the Delta. Part II focuses on the cross-cultural theme with papers including discussions on the presence in India of terracotta figurines from Roman Egypt; the ancient Egyptian influence of Aegean lion-headed divinities; Libyan influence in New Kingdom and Third Intermediate Period Egyptian administration and the identification of ancient Egyptian finds from the British countryside reported to the Portable Antiquities Scheme. The third part of the book includes current research undertaken across the world of Egyptology, including analysis of late Roman crocodile mummies through non-invasive radiographic imaging techniques and the study of infant jar-burials in ancient Egypt and Sudan to identify differences in regional socio-economic contexts and the interaction between people and local resources. The editors of this volume are all PhD candidates at University College and King's College London

The Ancient Secret of the Flower of Life, Volume 2 Drunvalo Melchizedek,2000 The sacred Flower of Life pattern, the primary geometric generator of all physical form, is explored in even more depth in this volume, the second half of the famed Flower of Life workshop. The proportions of the human body, the nuances of human consciousness, the sizes and distances of the stars, planets and moons, even the creations of humankind, are all shown to reflect their origins in this beautiful and divine image. Through an intricate and detailed geometrical mapping, Drunvalo Melchizedek shows how the seemingly simple design of the Flower of Life contains the genesis of our entire third-dimensional existence. From the pyramids and mysteries of Egypt to the new race of Indigo children, Drunvalo presents the sacred geometries of the Reality and the subtle energies that shape our world. We are led through a divinely inspired labyrinth of science and stories, logic and coincidence, on a path of remembering where we come from and the wonder and magic of who we are. Finally, for the first time in print, Drunvalo shares the instructions for the Mer-Ka-Ba meditation, step-by-step techniques for the re-creation of the energy field of the evolved human, which is the key to ascension and the next dimensional world.if done from love, this ancient process of

breathing prana opens up for us a world of tantalizing possibility in this dimension, from protective powers to the healing of oneself, of others and even of the planet. Embrace the expanded vision and understanding that Drunvalo offers to the world. Coincidences abound, miracles flourish and the amazing stories of mysteries unveiled arise as the author probes the Ancient Secrets of the Flower of Life.
