Animal Law Worldwide Federico Dalpane, Maria Baideldinova, 2024-11-18 This book offers a unique panoramic survey of the state of animal law in twenty-six countries and in the legal system of the European Union. The authors give a brief introduction to each jurisdiction, examine key issues, and formulate recommendations. The contributions provide ample opportunities for legal comparative studies touching on constitutional law, criminal law, civil law, environmental law, and administrative law, and discuss the crucial role of NGOs and civil society in raising awareness for the plight of animals. The contributions show the mature stage reached by the discipline of animal law, which is gaining attention in wider circles. The book discusses wildlife, agricultural animals, experimental animals, service animals, stray animals, and others. One of the topics is the constitutionalisation of animal welfare (with a growing number of countries amending their constitutions to include the protection of animals or considering such amendments). Other topics include the trend of moving away from the age-old legal classification of animals as mere things, and the persistent weaknesses in the implementation of legal provisions for the protection of animals. This book will be of keen interest to the worldwide animal law community, legal comparatists, legal theorists, policy makers, judges, law enforcement officials, as well as veterinary doctors. Federico Dalpane is an assistant professor at KIMEP University, College of Social Sciences. Maria Baideldinova is an assistant professor at KIMEP University, School of Law.

**Treaties, Trenches, Mud, and Blood (Nathan Hale's Hazardous Tales #4)** Nathan Hale, 2014-05-13 Learn about the most well-known battles (and little-known secrets) of World War I with author-illustrator Nathan Hale's *Treaties, Trenches, Mud, and Blood*, a Hazardous Tale from the New York Times bestselling graphic novel series. "These books are, quite simply, brilliant. . . . Thrilling, bloody, action-packed stories from American history." —New York Times In 1914, the world's biggest countries (and some of its smallest, too) were gearing up for a massive fight. Land, history, geography—each country went to war for different reasons and with different resources. But most ended up the same: sending their young men to fight for their lives in the mud, on the sea, and in the air, in a conflict that would eventually claim more than nine million lives. World War I, "The Great War," or "The War to End All Wars," was fought along thousands of miles of frontline trenches, with mechanized weapons, and dangerous new weapons like machine guns and mustard gas. It left behind a world that was scarred, angry, and traumatized. Its horrifying lessons are still being examined today. Nathan Hale's Hazardous Tales! Read them all—if you dare! **Prehistoric Art in Europe** Nancy K. Sandars, 1995-01-01 Until around 10,000 BC art in Europe appears to have been in advance of the rest of the world and throws light on the total history of early man. The great masterpieces of cave-painting at Lascaux are well known, and one tradition of early sculpture is from the first surprisingly classical. With the shelter paintings

of the Spanish Levant and the clay modelling and painted pottery of eastern Europe in the fourth and third millennia BC fresh artistic problems were tackled. Later still evolved the high technical accomplishment of the metal-workers, and this study concludes with an account of the new departures of Celtic La Tene art of the last four centuries BC.

**THE SECOND REPORT ON THE STATE OF THE WORLD'S ANIMAL GENETIC RESOURCES FOR FOOD AND AGRICULTURE** Food and Agriculture Organization of the United Nations, 2018-06-06 Animal genetic resource diversity underpins the supply livestock products and services across a wide range of production environments. It promotes resilience and serves as a basis for adapting livestock management to changing conditions. It is vital to livelihoods of many of the world's poor people. It can contribute to the delivery of ecosystem services such as landscape management and the maintenance of wildlife habitats. However, it is often undervalued, underused and under threat. This report updates the global assessment provided in the first report on The State of the World's Animal Genetic Resources for Food and Agriculture, published in 2007. It focuses particularly on changes that have occurred during the period since the first report was published. It serves as a basis for a review, and potential update, of the Global Plan of Action for Animal Genetic Resources, which since 2007 has provided an agreed international framework for the management of livestock biodiversity.

Drawing on 129 country reports, it presents an analysis of the state of livestock diversity, the influence of livestock-sector trends on the management of animal genetic resources, the state of capacity to manage animal genetic resources, including legal and policy frameworks, and the state of the art in tools and methods for characterization, valuation, use, development and conservation.

**Ethnic Germans and National Socialism in Yugoslavia in World War II** Mirna Zakić, 2017-03-21 This is an in-depth study of the ethnic German minority in the Serbian Banat (Southeast Europe) and its experiences under German occupation in World War II. Mirna Zakić argues that the Banat Germans exercised great agency within the constraints imposed on them by Nazi ideology, with its expectations that ethnic Germans would collaborate with the invading Nazis. The book examines the incentives that the Nazis offered to collaboration and social dynamics within the Banat German community - between their Nazified leadership and the rank and file - as well as the various and ever-more damning forms collaboration took. The Banat Germans provided administrative and economic aid to the Nazi war effort, and took part in Nazi military operations in Yugoslav lands, the Holocaust and Aryanization. They ruled the Banat on the Nazis' behalf between 1941 and 1944, yet their wartime choices led ultimately to their disenfranchisement and persecution following the Nazis' defeat.

**Trends in game meat hygiene** P. Paulsen, A. Bauer, F.J.M. Smulders, 2023-08-07 Game meat, previously often

considered as an 'exotic' food, or being relevant only in remote regions, is becoming increasingly popular. In order to provide sufficient quantities of nutritious, wholesome and safe game meat, a number of measures have to be implemented along the food chain- from the forest/field or fenced area where the animals are harvested, to the point of consumption. These involve monitoring and control of diseases of game animals transmissible to man, technology and hygiene of game meat processing and specifics of products manufactured from game meat. This book combines 30 contributions of various experts in the field, addressing four main topics: i.e. 'hygiene and management of microbial contamination in fresh meat from game', 'zoonoses and epidemiology', 'risk assessment and quality assurance along the game meat chain' and 'quality issues in game meat products'. The focus on Europe is expanded by presenting specifics of the game meat chain in African and Asian regions, with a view to provide information on 'bushmeat' consumed by the indigenous population. Similar to the first volume in this series, this volume follows a 'from forest to fork' approach and is targeted at scientists in academia and industry, graduate students as well as at governmental officials in veterinary public health and food safety.
